PREDICTIONS FOR 1976

Introduction

Join me for a prophetic preview of the next twelve months.

More than fifty of the world's leading psychics have participated in our prophetic panel. Their predictions offer an interesting view of world events during 1976. There are forecasts from astrologers, spiritualists, mystics, tarot card readers, and practitioners of ESP.

Naturally, such a large and diverse group has prophetic disagreement about the future. One psychic sees only darkness and doom ahead; another sees 1976 as the dawning of a new age. Surprisingly, our panel of phychics shows considerable agreement about the national elections. Few of the psychics see President Gerald Ford in the White House for a second term.

By the time you read this, an occasional prediction may have become old news. This isn't an error of the psychic's intuitive powers, nor is it an attempt to cheat on accurate forecasts. The predictions were made by the psychics to a deadline of June 15, 1975. They've had to forecast up to eighteen months in advance; a few events they forecast may have happened by the time you read this book.

The addresses of the psychics have been included so that readers may write directly to them. Many of our phychics offer a counseling service. Your request will bring additional information on their services and fees charged, and other data. When writing to any psychic, it is important to enclose a stamped, self-addressed envelope for his or her reply.

CHAPTER 1

GRETA ALEXANDER

Psychic of the Prairies

Greta Alexander of Delavan, Illinois, is a well-known midwestern psychic. This is her first appearance in our annual *Predictions* Series. She reports that her psychic awareness was triggered when a bolt of lightning struck her home in the Central Illinois valley. "I was pregnant with my fifth child in 1961 and resting in bed," she related. "Suddenly, a bolt of lightning struck the house. The bedroom window was shattered and torn from the wall. Suddenly, the bed was in flames and my husband, Ed, rushed in to put out the fire."

Fortunately, Mrs. Alexander suffered no physical injuries. The incident did change her mental processes. "The electrical force seemed to have opened up my ability to sense, feel, and know psychically," she reported. "Since then, I've been able to foretell a person's past and future."

In *Predictions for 1975* we carried a report of how Mrs. Alexander, psychic Bertie Catchings, and Peoria psychic Don Davis worked to psychically pinpoint the murderer of coeds in central Illinois.

Mrs. Alexander has "read" for such celebrities as Ruth Warrick, who plays the role of Phoebe Taylor on "All My Children," Debbie Reynolds, and Jane Powell. She has a radio show over WTAX, Springfield, Illinois. She also writes a psychic column for newspapers and teaches people to use their ESP. Currently, Mrs. Alexander is doing research into mental telepathy at the University of Wisconsin.

Her forecasts for the coming year follow.

Look for gasoline prices to soar. We'll see 75¢ a gallon prices at the pumps early next year. Before 1976 has ended, we'll be paying 1 dollar a gallon for gasoline. This will be due to price increases made by the Arabian oil producers and new taxes imposed by the United States government. This upward trend will start in the fall of 1975 and top out in May of next year. There will also be a scare about gasoline shortages, but that will end. Gasoline will be available for those who can afford it.

I foresee government funding to get the railroads into action again. This funding will be in the form of low-interest, long-term loans rather than outright subsidies. The money will be used to rebuild the track bed and railroads will be quite prosperous in the years ahead.

Next year will begin a trend to pass laws to control the amount of land that a corporation may own. This will be particularly strong in farm states.

Spring 1976 will bring considerable replanting in farm fields of the Midwest. Soybean prices will stabilize. Corn prices will rally in the coming year and farmers will make up for the last few years of poor prices. Crops will get off to a slow start, but we'll see a bumper harvest.

Food prices will decline slightly during the summer. They will start rising again in the fall of 1976.

Watch for the start of a trend to reevaluate state, local, and federal tax structures.

Shoplifting will rise dramatically next year.

There will be a shortage of feed cattle next year.

Funds for welfare programs will be tightened next year.

A new type of fabric will be introduced in the near future. It will be a synthetic, yet have the properties of cotton. It will be extremely long-wearing and very comfortable.

Men's clothing will continue to be colorful.

We're going to hear about oil off the ocean floor by mid-July. This announcement will please United States economists.

India will have started to change politically by the time you read this sentence. India will have widespread famine, high winds, and scorching heat in 1976.

I predict an earth tremor off the coast of California that will create a massive tidal wave. This great wave will roll toward land, destroying resort property and numerous homes. This will take place between March 15 and April 1.

We will exchange diplomats with Cuba.

Aided by a cane, Governor George Wallace will walk again.

Secretary of State Henry Kissinger will enter a new field next year. When I think of Mr. Kissinger I always hear a baby's cry. Mrs. Kissinger will be a mother within the next few months.

Look for a cancer breakthrough in April 1976. This will be a procedure to implant a capsule-like device that shrinks

cancerous cells. A blood transplant procedure will also deal with cancerous viruses.

We can expect a change in our form of government. This will start next year and be completed in 1981. We will look back to the past to attempt to learn from our mistakes.

We'll know the truth about life in outer space next year.

Jackie Onassis will find new happiness with a new man. There will be a ring on her finger by October.

England will be severely crippled by labor strikes. Inflation will continue to be a problem there.

CHAPTER 2

COUNTESS AMAYA

The Gypsy Seeress

Countess Amaya (P. O. Box 6001, Santurce, Puerto Rico) is Puerto Rico's resident clairvoyant. She is the proprietor of the Russian Tea Room in the Condado Hotel, where she prepares both Russian and Gypsy cuisine for her guests. She forecasts the future by using ESP, tarot cards, tea leaves, palmistry, and astrology.

"Gypsy"—as she is known to her friends throughout the world—was born in a circus in Milwaukee. Her father was a Romany Gypsy; her mother was Egyptian. "I was raised in Shanghai and educated in a convent," she related. "When my parents divorced I came to the United States and lived with an aunt and uncle."

Following her parents into the entertainment field, Gypsy started playing the accordion in night clubs when she was a teenager. By World War II, she had become a headliner and was appearing throughout the world.

"I came back to the United States when war broke out and volunteered for the USO to entertain troops," she recalled. "On my first flight with the USO, our flying clipper ship crashed in Lisbon. This was the same crash that crippled singer Jane Froman. I have undergone thirty-two operations as the result of the injuries in that crash. Being Catholic, I believe in the power of prayer, and that has helped me overcome the pain. Being Gypsy, I believe in and use my psychic powers."

Gypsy moved to her home in Puerto Rico several years ago. Since then she has become a celebrity there. She also offers advice by mail. "I charge a fee of 10 dollars for the psychic answers to three questions," the Countess says. "I can't tell you the exact way in which I will get these answers. I may use the crystal ball, ESP, or simply psychic intuition. Sometimes my world predictions come from outside of me and they may appear in dreams, feelings, or intuitive thoughts concerning a particular person or event."

Here is what Gypsy writes:

In *Predictions for 1975* I said: "Jackie Kennedy Onassis

will have a stormy year with her husband, Aristotle Onassis. Whenever I envision Onassis, I see him surrounded by darkness. This could indicate he is in some future financial danger. However, I have a feeling that Jackie may be a widow for the second time. . . ." This year, I continue to feel that the future for Jackie will not be good. Saturn is in her twelfth house of trouble and, as this planet goes through the sign of Cancer, matters will grow worse instead of better. She may marry again but the union won't last long. Saturn will be in Leo, her sun sign, in September. It will remain there for about two years. She will be in contact with elderly people—someone who is ill and troubled. If Jackie remarries, love offered to her will not be sincerely given. This will hurt her pride because she is a very proud woman. Jackie will also have complications with her children. This is particularly true of Caroline, who is Sagittarius. This child's independent attitude will hurt her mother. She will also deceive her mother; there seems to be some sort of scandal around both the girl and Jackie. There is also some sort of involvement with a relative.

A noted sports figure will be involved in a paternity suit. This matter will be kept hushed for some time and then erupt in headlines.

Investments: Look for good returns from medical drugs, paper, clothing, and copper issues.

Canada will have several large mineral strikes, including a big oil field found there.

I don't foresee inflation continuing indefinitely. Prices will soar until around the end of 1976, then the economy will stabilize. Until then, there will be high unemployment figures.

Gold, silver, and other rare metals will take a drop in value this year.

Currencies will remain shaky throughout the world.

People will be more conservative-minded and will be interested in ecology and energy-saving devices.

The era of the big, luxurious automobile is past. Smaller cars will continue to take their place in the market. A practical electrical car that operates on batteries will be introduced in 1976. This vehicle will be the first practical application of an electric car.

California's big earthquake will not take place this year. There will be only minor tremors along the San Andreas fault line. Alaska will have several small quakes. Earthquakes

will strike Mexico, South America, and Central America and there will be a big one in China.

Clothes in 1976 will be more original and outlandish than ever before. Jupiter will be in Aries, the sign of appearance, and we'll see numerous bizarre fads in clothing.

Hair on men will be much shorter. The era of the long-haired man is now passed.

Women's hair will be cut shorter. Long stringy hair is completely out.

The planet Earth will continue tipping on its axis. This is the prime cause of the freakish weather we've had recently.

The middle western states will suffer with lower crop and dairy production. I also see flooding in these states next year.

There will be a considerable number of floods in 1976, particularly in places that have never known high water until now.

People suffering from cancer of the throat will be helped by a startling new medical discovery. This breakthrough will be announced and introduced in 1976.

Psychic healing will continue to be a controversial subject throughout 1976.

Puerto Rico: A well-known figure will pass on. The weather will continue to change. Hailstones will be seen there.

UFOs: They're reported frequently here in Puerto Rico. These sightings will continue through 1976 both in Puerto Rico and in the western United States.

Even with tight money, we'll see new restaurants opening all over the country. Money will be spent lavishly on food and beverages. All sorts of gimmicks will be used to attract customers to these places.

People will learn to live with less money. Shopping habits will change; people will be concerned with getting their money's worth in any purchase.

Strikes: Not as many as we might expect. Look for them in the entertainment field, airlines, and television.

Several American political figures may be abducted.

Robberies will increase as the economy gets worse.

Drug use will increase as hard drugs flow to the United States in huge quantities. Millions in contraband drugs will be seized by the police. A high official in the Caribbean Islands will be caught in a drug scandal.

The Presidency: I still say that a change is coming in the American government. Possibly this means that only one house will rule with the President a puppet of Congress.

I do not see Wallace as President.

Teddy Kennedy will try again and if elected, there is great tragedy and disaster ahead. The "curse of the Kennedys" will continue on this family.

For many years I have been for Nelson Rockefeller. But I know that the presidency cannot be for him.

The new President is going to be a great surprise for the entire world. A younger, more energetic man will be elected to head the nation.

Schools will begin to change, creating rapid systems of learning to allow students to progress at their personal rate of learning.

Two very important men in Washington, D.C., will pass away.

I also foresee death for a powerful young man in Arabia.

Bob Hope, John Wayne, and six other older movie stars have shadows over them during the coming year.

Movie theaters will lower their prices and attract even larger crowds.

Television sets will be introduced with even better color.

Elizabeth Taylor will come to the world with a newer, more glamorous image.

Richard Burton will marry a much younger woman.

Johnny Carson will enter a new type of show and be better than ever.

Merv Griffin will also change the format of his show.

Because of a lack of work and money, racial tension will increase in the larger cities.

Hospitals will find a reduction of patients due to higher costs.

The Middle Eastern countries will continue to battle over the Israeli question.

There will be exciting news about discoveries linked to the pyramids and possibly a form of healing inside a pyramid.

Look for a trend in the Catholic Church for priests to be allowed to marry.

There will be widespread famine in India.

CHAPTER 3

DOC ANDERSON

The Man Who Sees Tomorrow

R. C. "Doc" Anderson (302 Gordon Avenue, Rossville, Georgia) is a robust, king-sized giant who has been counseling people for more than thirty-five years. Many book and magazine articles have been written on his remarkable life and talents.

Anderson's prophetic talents manifested themselves when he was a young boy. His first vision concerned the death of his brother, Nels, in a battle in World War I. Frightened by this experience, Anderson refused to develop his talent for many years. "Instead, I concentrated on the physical aspect of life," he drawled recently. "I developed into a strong young man. Eventually, I toured the country billed as 'Little Samson.' I lifted automobiles, tore telephone books into two parts, and became a bullfighter."

Anderson settled in Georgia after his travels and opened his ESP studio, launching his career as a psychic. Anderson forecasts the following:

The larger cities will begin, if they haven't already begun, to train their police departments in control measures to stop food riots. There will be a food stortage like we have never faced.

The influential Arabs are worming their way onto the boards of directors of various major oil companies. They will also be leasing land for future drilling in the United States. Arabs will buy banks and other financial institutions to finance their oil and refining industry in the United States. This is an attempt by the Arab countries to control world oil. They will also refuse to accept American currency for oil.

The next world war will start through China, as I have predicted previously. Russia will be our ally against China.

The union demands and harrassment of industrialists and independent businessmen will result in such a small margin of profit, if any profit, that many firms will close down, causing a major Depression.

Expect more trouble from North Korea and Indochina within twenty-two months.

More lawlessness in the streets in the major cities. People in the major cities will assist law enforcement to cope with it.

George Wallace is destined to be the President of the United States.

1976 will be the year of the UFO. They are visiting the Earth from outer planets.

Actual value of the dollar will drop.

Weather conditions are changing in this country and throughout the world.

The stock market will be so erratic it will be hard to foresee any visible gains or losses. The best investment is energy—oil, coal, or electricity.

In due time, democracy in our country will be strengthened as a result of an informed public. People will demand facts instead of political smokescreen.

John Wayne, a great and staunch American, could pass from this Earth. This would be a great loss. This will change if Wayne eliminates the use of tobacco and takes his doctor's advice.

Bob Hope will see illness in the near future unless he cuts his heavy schedule of work.

Ann-Margret should be very careful about heavy food and alcoholic beverages.

Jane Fonda will travel for the next year and will do well.

Teddy Kennedy's political star is descending as far as the public is concerned. However, there will be a behind-the-scenes bid for President.

Jackie Onassis will face legal problems about the Onassis estate. The next man that she will consider marrying will be after her money and fame.

President Ford is a good man of tremendous courage. He will display this courage during his term in office.

Ronald Reagan will continue to be a statesman in the political field, not a politician.

Patty Hearst is being controlled by fear. At a later date she will return to normal.

Rona Barrett, a great lover of animals, has recently lost a beloved pet. She will become one of the greatest novelists in the next decade.

Doris Day, another great lover of animals, will devote much time to animal care. She will be offered several TV specials and a TV series.

Clint Walker will grow in stature and, in time, will be considered the second John Wayne.

In 1976 look for continued trouble in all of Asia. North Korea will attempt to gain some support from Communist China. The Middle East will not see peace in 1976. The Jewish and Arab situation is a powder keg that could explode at any time.

The automobiles for 1976 will not be as good as previous models were. They will be of inferior quality and will cost more money.

The Gulf Stream will change, bringing about many weather changes.

There will be earthquakes around the Arctic Circle and at sea off the coast of California.

Dr. Werner von Braun, the father of rocketry and of the space program, will come up with some astounding discoveries. However, he will be hampered by governmental agencies that cannot fathom this man's great mind.

In 1976, interest rates will fluctuate. They will not stabilize as long as inflation runs unchecked.

Militant groups will plague the nation with false ideals and complete lack of common sense.

The majority of the professors in most institutions of higher learning will pass their students, regardless of qualifications, due to threats of violence from militant groups.

The laser beam will be used for medical, military, and various industrial purposes.

The American public will accept inferior and mediocre products, because something is better than nothing.

Dr. Clark Vincent of Clements, North Carolina, will soar to new heights in the field of mental health, particularly in marriage counseling.

Dr. Alf Hofman will do great things in the field of mental health for children.

CHAPTER 4

AQUARIUS

The Psychic Physician

Aquarius is the pseudonym of a medical doctor now practicing in the Midwest. During the past few years, Aquarius has demonstrated his ability to accurately forecast the future.

"I'm still relatively new at the use of psychic abilities," the doctor stated. "Psychics are naturally suspect in the medical world. This is why I've used the name of Aquarius. However, I know many excellent medical diagnosticians who frequently rely on their intuitive powers to find an illness. Naturally they run tests to check their intuition."

Aquarius will answer three questions for a fee of $5.00. Letters to Aquarius are forwarded to his office from P. O. Box 897, Clinton, Iowa 52732.

Aquarius emphasized his opposition to psychic healing. "If people are ill, they should first see a medical doctor of their choice," he said. "Psychic healing can be used in conjunction with a good physician. It shouldn't be used as the sole method of treatment. There are some fraudulent operators in the so-called psychic healing field. There's going to be scandals when these healers are exposed."

Aquarius also feels some psychic healers charge fees that are much too high. "There's a guy in Texas who claims to be a healer," Aquarius said. "One of my patients was charged $500 for a so-called healing. These fast-buck operators are giving all forms of natural healing a distasteful reputation."

Below are some of Aquarius' forecasts for 1976.

Look for riots and demonstrations to mar the Bicentennial celebration.

Pope Paul will be in great danger if he visits the United States. His security men will have to be extremely cautious during the Pope's public appearances. There is an unresolved medical condition around the Pope.

Drivers will be paying up to 80¢ a gallon or more for gasoline when the New Year rolls around. Don't look for anything except rising prices in gasoline and other fuels.

There will be considerable controversy over the abortion laws. Despite opposition, the right to legalized abortions will

stand. A book about the abortion controversy will be a best seller.

1976-1977 will see power outages, fuel oil and natural gas shortages, and a cold, frightening winter.

Look for something surprising and unexpected in the 1976 Presidential elections. Ford may drop out before the completion of his term; this will be due to a health problem or the health of someone near him. Wallace won't get the Democratic nomination. 1976 is not the year for Ted Kennedy's candidacy. At the moment it looks like Rockefeller vs. a dark horse. The voting results will be confused.

More colleges will go bankrupt. Small private colleges will be in desperate situations by the middle of 1976.

I don't foresee a cure for cancer this year.

Look for more strikes against city, state, and federal governments.

The Stock Market: If you're inexperienced—stay away. Times are too critical, the market is too shaky for a person to risk all of his savings. The world is now, and will be in 1976, in a critical state. The smallest incident can trigger a stock market decline.

If you must invest, select stocks of companies that are in a cash-rich position. These companies should also enjoy a good share of their marketing areas, such as:

Bristol-Myers: A conservative management, good products, and a lot of cash makes this an attractive stock.

Howard Johnson's: This firm has $10 in cash for each dollar of debt. They'll expand their profitable "Ground Round" restaurant chain in 1976 while going slow on new motel construction.

Maytag: Cash-rich and a top product.

If you're interested in high-yield investments, buy food and make 25 per cent annually on your money. Store gasoline and make 30 per cent.

Household Bills: Power, heat, taxes and food are up, up, and away out of sight.

Hospital Costs: still rising in 1976. Doctors' fees will remain stable. The big increase in medical costs are due to the cost of a hospital stay.

Despite this rather bleak look into the future, we will all survive. We will have to change our life-styles, have less disposable money, and tighten up on our spending.

CHAPTER 5

REVEREND LAWRENCE A. BALL

Clairvoyant Minister

A brush with death convinced a California minister that he should use ESP to counsel people. "My wife and I were victims of a head-on automobile collision," explained Reverend Ball. "By all medical standards, we should have been dead upon arrival at the hospital. However, we survived, and I considered that a second chance in life."

Reverend Ball believes the accident was God's way of telling him and his wife to use his natural psychic abilities. Although he had experienced psychic powers since childhood, Reverend Ball had failed to use his ESP abilities. Two years after the accident, he moved to California and decided to assist people with his psychicism. Since then, he has amassed a thick stack of data from persons who attest to his abilities. Readers may contact Reverend Ball at 13934 Taft Street, Suite 4; Garden Grove, Cal. 92643. His predictions for the future follow.

There is a dark cloud around Richard Burton. He will become quite sick with a hospital stay. This could take his life if he doesn't listen to his doctor.

The United States and Cuba will make trade agreements. Cuba will start to open her doors to the people of this country.

Look for trouble again with North Korea. I see fighting starting up again. I see American troops being sent to help this country.

Ted Kennedy is going to be drafted to run for the Presidency. He'll win the election. Jacqueline Kennedy Onassis will back him with money and confidence.

Japan will have a hard earthquake this year, causing much damage to a large city.

Women's skirt lines will become longer. Long hair for girls and short hair for men will be back in style.

Richard Nixon will be in the hospital again with his old illness. The book he's writing will become a best seller. He's going to have bad news about his daughter. She and her husband are going to have marriage problems.

John Wayne will be back in the hospital. If he does what he is told by his doctors he will be OK. The problems will be in the lung and heart areas.

There will not be a Depression, although times will be rough for a short time. I see factories making war materials. We're going to be involved in Korea again with both men and materials.

There are going to be hard restrictions put down at our borders to stop drugs and illegal aliens from coming into the United States.

CHAPTER 6

ELIZABETH BURROWS

Mystic and Psychic

Reverend Elizabeth Burrows is an attractive Christian mystic from Tacoma, Washington. A minister in the Unity Church, Reverend Burrows has a clean-scrubbed appearance and the aura of a prophet. Her first psychic experience occurred when she was ten years old and living on her grandparents' farm in Idaho. "I was able to foresee the future even then," she relates. "I could meet someone and I knew what was going to happen to him. I always received these psychic impressions when meeting someone new."

Three years ago she had a mystical experience that changed her life. "I witnessed a divine manifestation," Reverend Burrows explained. "I was told to walk away from all worldly things. I left that same night—my husband, who preferred to remain in the physical, material world, my married daughter, my job, and my possessions. I left everything."

Since then she has traveled thousands of miles to teach that "all people are psychic." In addition, she has founded the School of Mystical Sciences in Tacoma.

"People seem to believe that psychics receive great visionary pictures in their minds," she stated, "or that we receive powerful, unusual hunches about an impending event. This just is not true. The vast majority of the time a psychic deals with thought impressions just like any other person. Psychic power is not unusual. It goes back in history for 250,000 years."

By the time you read this, Reverend Burrows will be studying in India at a Vedanta school near Bombay. Mail will be forwarded to her from The School of Mystical Sciences, P.O. Box 185, Fernhill Station, Tacoma, Washington. Her forecasts for the coming year are as follows:

An Atlantic ship disaster takes the headlines though few lives will be lost. The *Andrea Doria* and *Titanic* come to mind when I relate this ship disaster. I must assume that the details will be similar. It is connected with an explosion.

The tug of war in the Mideast continues through 1976. Everyone will hope the new President will restore the old

United States. Yet the elections show apathy. Even the conventions will be dull, particularly in the Republican stronghold. This election will even mention a woman or two, as potential Vice-Presidential hopefuls. But their reign will not be forthcoming this election.

It will be found that the assassination of President John F. Kennedy, Senator Robert Kennedy, and the destruction of the office of Presidency are linked together by an attempt to overthrow the United States government. There are to be numerous disclosures relating to this possibility within the next two years. Some will indicate that the plots were worked out to the minutest detail, that there was a link between the two assassins. The entire thing has been masterminded by a great power group which has contacts and workers in all lands. There is a possibility that this stems indirectly from Russia and Communism.

The power of veto will be removed from the office of President in the next two or three years, as will other powers. Final decisions will be made by an equivalent of a judiciary committee. This next year brings many changes in the structure of the office of President. There will even be talk of runing in India at a Vedanta school near Bombay. Mail will be heretofore unheard-of maneuver.

Egyptian diggings among the pyramids will bring to light some very important artifacts that will fill in gaps in the history of the building of the pyramids. One such discovery is a large vase, approximately three feet high, with green markings like lightning around the neck. It apparently belonged to the family of King Tut.

1976 brings a climax to the steadily progressing economic turbulence which has plagued the United States. The stock market faces its most serious upset since the stock market crash of the 1930s. Millions of dollars are lost as near panic begins on Wall Street.

The Vatican is compelled to realign its fundamental structure. Pope Paul will suffer illness brought about by a weakened heart. His reign will soon end. He will be replaced by Pope John, who will bring greater reform and changes into the church than any other pope in history. Pope John will be the first Pope to strive for world peace by unification rather than segregation.

Queen Elizabeth's remaining reign is short. Within the next two years she will abdicate the throne to Prince Charles. He

faces difficulty as England's King because of serious unrest and difficulties. His reign will also see England in war.

Princess Grace and Prince Rainier of Monaco will have difficulties. Princess Grace returns to her homeland, the United States.

The United States will successfully launch space probes. Communication with beings from other planets will become more accepted. The beings from other planets can read the thoughts of the human mind. Separation is by dimension, rather than time and space. A predominant contact will be with Neptune, which is a planet of love. Here spaceships are launched from atop buildings by intensified solar beam, resembling the laser beam. The beam of light with power to beam off spaceships is taken directly from the sun.

There is strain upon Governor Wallace, though he intends to campaign for the election. There are signs he may be forced to seek retirement.

There is darkness around Kennedy. Regardless of public opinion, he will answer to the call of his mother. In spite of two losses by assassination, Mrs. Kennedy is still in the political field. She will see her grandson who lost his leg enter the Senate. She will encourage the current Senator Kennedy to seek the White House post. In spite of his denials, he will remain a White House contender. However, I cannot see his nomination as the number-one Democrat.

Gerald Ford shows blue skies around him. He is growing in the esteem of the American people. The Republicans will want to run him and he may elect to run. If so, he may take the number-one Republican spot with Governor Reagan second. It is almost a toss-up between Rockefeller and Ford, though I do not expect either one to be the next President.

The White House looms large in Reagan's background in spite of his denials. We'll see a change of tune around convention time. The next President will be a Democrat. The name of Joseph Murphy plays a role someplace in the convention highlights, though not necessarily as a nominee.

Whoever becomes President will have difficulties with the economy. War will plague him. The lineup in 1976 is perhaps the poorest in the history of the nation.

Jacqueline Kennedy Onassis will be linked with more than one suitor. However, she knew what she was doing when she married the Onassis millions. She wanted wealth and power greater than that of the Kennedys. She bought and paid for

this power. Now, she's free to marry a man of her own heart. He has known her since his children were small. She took them skiing. When they marry she will, at last, drop to greater quietness and greater obscurity. He will be the one most seen with her the latter part of 1976.

CHAPTER 7

RALPH CAMPO

Clairvoyant

Ralph Campo was born in Argentina in 1922. At that time, his father was a symphony orchestra conductor and a composer. While in Europe, his mother became interested in psychic healing and clairvoyance and became a private disciple by constant mail correspondence with the Lady from Lonquimay (La Pampa), a famous spiritual healer from Argentina. In 1948 his mother started the Spiritualist Movement known as the Little Schools of Basilic in Argentina. There are now over 300 of these "Little Schools" in the city of Buenos Aires alone. The last convention drew 300,000 people to Buenos Aires' Luna Park.

At the age of three, Ralph and his parents left Argentina and moved to Europe where his father was to give a series of concerts for a 9-year period. During this time, Ralph attended numerous European schools. In reference to this period, Ripley's *Believe It Or Not* states that Ralph Campo attended a total of 114 different schools during a 13-year period.

In 1946, at the age of twenty-four, Ralph was introduced to the Lady of Lonquimay. From clairvoyant reading, she told him that he would travel to the USA and eventually perform his life's mission of teaching the metaphysical truths across the country. Many years before, she had made the then unbelievable predictions of the splitting of the atom, World War II, and UFO sightings.

At the age of twenty-nine Ralph was invited by the United Nations to come to New York to do some radio broadcasting work to Latin America. While on the airline flight, Ralph saw the etheric projection of the Lady of Lonquimay appearing as a real physical person on the plane. He wrote to his mother about the occurrence. She replied that the Lady had written to her describing the event.

From these experiences of etheric projection Ralph was prompted to learn more about metaphysics and the occult. He studied most of the major philosophical and occult organizations from the Rosicrucian Order, Rosicrucian Fel-

lowship, to Religious Science, Divine Science, and Transcendental Meditation.

His turning point came when he began his private studies under Vincent Vocero, a White Brotherhood Master. It was through these personal studies that he developed into a clairvoyant. He also developed the unusual ability to travel astrally on three planes: The physical plane, the macro plane and the micro plane. Ralph found the micro plane the most interesting, projecting into his own body for a 6-month period, traveling psychically through the bone structure, the circulatory system, the nerves, hairs, etc.

Ralph Campo can be contacted at the New Clear Universal Foundation, 6716 Drexel Avenue, W. Hollywood, California. His predictions for the coming year are:

1976 will be a great year for spiritual revelations. Millions of citizens will turn to metaphysics for healing, illumination and guidance. The young generation will have a wonderful new awareness of spiritual growth. They will become more attuned to cosmic consciousness than any previous generation.

1976 will also see marvelous new inventions in practically every field. New motors for cars that run on water, sun energy and applied energy (from electricity concentrated into condensers) will come on the market.

1976 will be the first time an international award will be given for psychic healing, psychic findings, and psychic books in the same manner that the Nobel Prize is given. It will have its headquarters in the USA but the money will come from Iran.

1976 will see contacts with people from outer space. Look for these headlines in all the papers.

Look for new animals brought from other planets.

Many children will be born with horrible handicaps because of the drug scene.

Women will become more sports-minded. The outlook in clothing will be absolutely daring. Partial nudity will be accepted. A woman will have such a high position in politics that she will almost rule the United States, but she will do this without exposing herself.

Jacqueline Kennedy Onassis will surprise everyone with a new, rich marriage that will be the talk of the century.

Look for more lesbianism than ever before.

New marriage arrangements of a conditional type will be

current. Many women will openly live with other women as mate-partners.

More magazines with naked men will be on the scene. The magazines will try to claim that women are buying them. The truth is that 80 per cent of their sales are to males.

A spiritual-metaphysical singer will introduce a new concept in singing. Oriental music with a modern arrangement will be heard on many stations.

Katherine Hepburn will have another successful year.

The movie about Clark Gable and Carole Lombard will bring debates and finally end up in court.

Men will travel more to leave their women and children behind. There will be secretive places in the mountains, deserts, and some cities where men will meet to counteract the women's liberation movement.

Unfortunately, a large number of children will be handicapped by alcohol and pills. They will be abandoned by their parents.

Many children will show psychic abilities like Uri Geller's work. A child healer will make headlines!

We will see many children in mass exodus through the USA.

New ideas in food will prevail. Mushrooms will be used more. Scientists will prove that insects, worms, and flowers have protein and other useful substances. They will try to camouflage the origin of these findings, with the consent of governmental authorities.

Instead of medicine, man will choose natural herbs and psychic healing. Many doctors will give up their practice for a more natural way of healing. Acupressure will become known much better this year than ever before.

Indian remedies, old Mexican herb formulas, and new diets will be followed by millions of people.

Electronic acupressure will be tested by doctors.

There will be more movies made this year than in the last ten years. Cowboy feature movies will make a strong comeback.

Clint Eastwood will be named for an Academy Award in this year.

This year will be the passing year of several celebrities.

Grace Kelly's daughter will be offered a part in a movie. It is quite possible that she will accept it. She will play the part

of her own mother in a picture depicting Grace Kelly's life and her marriage to Prince Rainier.

Milton Berle will try straight acting roles and will receive an Academy Award nomination.

Despite the rumors, Greta Garbo will not make a comeback.

Marlon Brando will have a very difficult year with the press, public, and his popularity.

Natalie Wood will regain popularity in a role quite different from what she has portrayed in the past.

Frank Sinatra will marry a young starlet.

A female impersonator will be offered the title role in Judy Garland's life story in a movie that will be the talk of the year.

San Francisco's Chinatown and other Chinese areas will suffer epidemics of gang fighting.

A Korean influenza will practically sweep over the world in December 1976.

New cases of bubonic plague will be reported in several countries.

The finding of a gold city in the Incan country will stir desperadoes to rob it. Anthropologists will need the army for protection.

Gold will be found in Brazil, Argentina, and Chile. This will start a new gold rush.

Look for many UFO landings in many parts of the USA.

Several families will be transported in UFOs to other planets.

The reason that many people report different shapes and occurrences when they identify flying saucers is that they come from many different planets. Each planet has a vehicle designed differently from the others.

Rockefeller and Reagan will gain great popularity in 1976.

President Ford will lose his popularity due to a foreign affair that will involve him.

One of President Ford's daughters will marry in 1976.

The entire country will participate in the Bicentennial celebrations. However, many of them will be controversial and interracial fights will develop.

East Germany will try to become the 53rd state.

Generalissimo Franco will either retire from public life or pass away. The picture is not clear, except that he will no longer hold office.

Black people will act in many of the most important shows on TV with great popular acceptance.

Late-night TV will broadcast certain programs that will be considered pornographic.

CHAPTER 8

BERTIE CATCHINGS

The Texas Seeress

Bertie Catchings and her son, John, are a unique mother-son psychic team with considerable accuracy in their prognostications. Bertie first gained national attention when she predicted a tragedy connected with the tower at the University of Texas. This forecast was made several months before sniper Charles Whitman climbed the tower and fired down on people below. Since then, Bertie has become a full-time psychic, providing psychic counsel and lecturing at many psychic seminars.

Bertie and John now host their psychic radio talk show, "Psychic Line," every Saturday morning from 11:00 until noon over Station WRR, Dallas. They utilize what they term "voice vibration" to gain the information necessary to answer callers' questions.

They answer any question by mail except for those concerned with medical or legal matters. The fee is $2 per question. Readers may contact Bertie and John Catchings at P. O. Box 12264, Dallas, Texas 75225.

Bertie's forecasts for 1976 are:

An explosion on an oil rig in the Gulf of Mexico near New Orleans will leave eleven dead and will injure several others.

A barge loaded with thousands of barrels of oil will meet with disaster near New Orleans and spill its oil into the Mississippi River.

Lady Jane Wellesley, the daughter of the Duke of Wellington, will be in an automobile accident in 1976.

A rare white tiger will be stolen from the Cincinnati, Ohio, zoo in 1976.

Evidence will be provided in 1976 that will prove that Sirhan Bishara Sirhan did not assassinate Senator Robert Kennedy.

An overpass on a major superhighway in the United States will collapse and take two lives and cause several injuries.

A freight train loaded with toxic chemicals will be derailed and force the evacuation of a town in Ohio in 1976.

Liza Minnelli will spend part of 1976 in the hospital because of a serious illness.

Furniture made of real wood will be very rare and valuable in the near future. Synthetic materials that look like wood will take over the market.

A cave underneath a massive Mexican pyramid will be discovered in 1976. Inside will be found gold, copper, and many valuable artifacts, including an ancient Spanish treasure chest filled with coins and jewels.

High-potency vitamins such as vitamin A and D will become "prescription only" items in 1976.

Good profits can be made in 1976 in aluminum, chemicals, health care, and heavy machinery. Be very cautious of investments in automobile companies, tires, and other rubber goods.

Construction will start on several deep-water oil ports in 1976.

A Russian airplane will crash at a London airport in 1976.

A new hot drink will be released onto the market in 1976. The drink will be made from compressed spinach leaves. It will be a good health food drink and will be called Spinach Tea.

I feel that a murderer will strike in the Detroit area and take the lives of many girls.

Several girls that have been missing for some time will be found in a marsh area near Houston, Texas. The letters "DWP" and "S" seem to be important.

The relationship between China and the USSR will become very bad during 1976. This could result in armed conflict.

The cause of a large fire at a paper manufacturing company in Dallas, Texas, in 1976 will be traced to arson.

The economic position of the American farmer will improve.

There will be a flood in Mississippi that will leave many homeless.

A train crash in Chicago will take at least fifteen lives.

The United States and the Soviet Union will make much progress together in space.

Many people will drown in a flood in New Mexico.

There will be a large and cooperative scientific group set up between the United States and the USSR.

There will be an accident that will involve a new type of train.

A high official in the government of the United States will commit suicide.

Solar energy will begin to be used in some new homes in the United States.

The population of both Arizona and New Mexico will rise sharply.

There will be an important advance made in eye surgery. It may soon be possible to transplant the cornea of the eye.

There will be riots and rebellion in Argentina.

West Point cadets will be permitted to marry before their graduation.

A ferry loaded with over a hundred people will sink south of the Philippines.

There will be a large forest fire in the middle Rockies.

An airplane will collide with a high-rise building that is under construction.

President Ferdinand E. Marcos of the Philippines will be wounded during an assassination attempt.

In Haiti many people will die from an unusual illness aggravated by malnutrition.

Governor Ella T. Grasso of Connecticut will be nominated for the office of President of the United States.

Thailand will fall to the Communists within a short time.

Three people will be taken hostage during a prison uprising in the state of Illinois.

The movie *Logan's Run* will be an Academy Award nominee.

Jacqueline Onassis will soon write a book that will be made into a movie.

John Mitchell and a girl with the initials "M.D." will marry soon.

I foresee marriage for Gene Kelly and Joyce Haber sometime during 1976.

Many European airlines will soon provide air beds for their passengers' comfort. Within a few years air beds will be used in most American long-distance night flights.

The price of coffee will go up.

A new prime minister will replace Indira Gandhi in India.

Sales of furniture, air conditioners, refrigerators, and drapes will continue to be slow. However, good sales can be expected in sporting goods, garden tools, small appliances, motor homes, televisions, and indoor plants.

Greece will receive full membership in the Common Market.

Jackie Onassis will sell some of her jewelry.

Rudolph Hess will be released from prison.

Sonar glasses for the blind will soon be made available at a price that everyone can afford.

A forest fire near Los Angeles will destroy many homes and take several lives.

I see an auto accident for J. Paul Getty, III.

Johnny Carson will be hit by a "Love Pie" while doing the "Tonight" show.

We will be in for rainy weather in the United States. There will be drought in South Africa in 1976.

A big ship will be lost in the Devil's Triangle. The name of a bird and a color seem to be important.

The largest diamond ever discovered will be found in Africa.

Landslides in Canada, Oregon, California, and Brazil will take the lives of many people and destroy many homes.

A great treasure will be removed from the waters near Baja California.

A child will be lost in the mountains of the West near a resort. He will be found within one mile of his lodging under some brush on the north side of a mountain.

Earthquakes in Iran and Turkey will take many lives.

An airplane will go down in 1976 and the letter "D" will be connected in some way.

There will be a disturbing report of caskets floating down a stream of water in the United States.

Although there will be romantic rumors around Prince Charles all year, he will remain single throughout 1976.

A ship will sink off the coast of Africa.

A cave under an ice mountain in the Arctic Circle will reveal a hidden Garden of Eden.

Body-scanning will be used in many American hospitals to quickly diagnose illnesses.

Medical people in Brazil will discover a new cure for cancer.

While an old building is being remodeled in Detroit, Michigan, the workmen will discover money hidden in and on the walls of the building.

A Dallas, Texas, woman, missing for a long time, is a prisoner of a maniac. She is being held in an old two-story

building in a secret room upstairs. I pick up this information: "B"; "Swiss"; and the numbers "WO5."

I see illness and tragedy for Queen Elizabeth.

A UFO will be sighted by the passengers of an airplane traveling over the Western part of the United States.

There will be a report by fishermen of a UFO landing on a large body of water.

Spain's General Francisco Franco seems to be in some physical danger. This could prove to be fatal.

CHAPTER 9

JOHN CATCHINGS

Psychic and Lecturer

John Catchings, now twenty-six, began his psychic career on the Fourth of July, 1969; he was literally electrified into psychic awareness when he was struck by a powerful bolt of lightning. Following this frightening experience, John realized that he had psychic ability and worked hard to train himself for a metaphysical career. In addition to providing psychic counsel, he has made his first lecture tour before audiences seeking new age awareness.

Readers may contact Mr. Catchings at P. O. Box 12264, Dallas, Texas 75225. His predictions for the future include:

A young singer from England, Leo Sayer, will rise to fame in the United States in 1976.

Many people will be left homeless by floods in Brazil in 1976.

Prime Minister Pierre Elliott Trudeau will be very near an explosion and fire in 1976, but he will survive.

Experiments with hormones that are given to babies to increase their IQ will be begun in 1975. The experiments will be successful; however, in some instances, the children may become too aggressive.

A great abundance of oil will be discovered in the North Sea, the Shetland Islands, Turkey, Indonesia, and Peru.

There will be an oil fire in Turkey in 1976 that will take many men and a lot of time to put out.

The Prince of Wales will be in a startling automobile accident in 1976.

There will be a bus accident in Mexico in 1976 that will kill seventeen people.

Ultra high frequency radio waves will be used to control animals on farms of the future. It will be necessary to simply press a button and the roundup will be automatic.

Floods will strand hundreds along the Alaskan highway in 1976.

Mrs. Martin Luther King will marry another clergyman in 1976.

The federal government will become active in investigating

UFOs in 1976. There will be much evidence released to prove that UFOs could be of extraterrestial origin.

A new international boundary will be declared by the United States in 1976. This will be done to protect American fishermen and miners.

A new cold drink made from soybeans will become very popular in 1976.

Ladies of fashion will be wearing blankets during the cooler months of 1976. This fad will catch on quickly and sweep the country. There will be blankets of every design imaginable and also very plain ones. In the beginning the blankets will be worn only by ladies, but later they will also be worn by men.

An American military plane will crash in Alaska. It will be a long time before it is located.

A woman missing in the Dallas, Texas, area will be found in a creek in 1976. The letters "LHG" and "R" will be involved.

Governor George Wallace of Alabama will make more of a physical recovery than he expects.

A large hurricane will strike the Texas coast near Corpus Christi in 1976.

Stricter laws will be enacted in 1976 that will require more caution in the dispensing of drugs, but the new laws will also allow pharmacies to advertise the prices of their drugs.

A bank building will be blown up in downtown Manhattan in 1976.

Senator Edward Kennedy will not accept the nomination for President of the United States under any circumstances.

The stock market will continue to rise slowly.

Consumption of fish will go way up.

The gasoline situation will improve despite all the talk to the contrary.

There will be another big scandal in Washington, D.C., in 1976—this time in one of the houses of Congress.

The Los Angeles Dodgers and the Texas Rangers will play in the World Series; the Rangers will win.

The Dallas Cowboys will end up as the top team in the NFL.

Shreveport will end up as the top team in the WFL.

A black girl from the United States will make a strong surge in tennis in 1976.

Spain will undergo a change of government.

Earthquakes will occur in large numbers in 1976, especially in Central and South America.

Red China will have a new leader.

A tornado will strike near Austin, Texas, during the spring.

An international law will be passed that will protect whales and prevent them from being slaughtered into extinction.

1976 will prove to be a disastrous year for Italy. There will be many drastic changes in the government. Dissension among the people will cause uprisings and riots throughout the country.

National health insurance will be enacted into law.

A volcano off the coast of Iceland will become active.

A very big hurricane will hit Cuba.

Mayor Daley of Chicago will retire.

An American ambassador in South America will be assassinated.

A bridge will collapse in Ohio and several people trapped inside their cars will drown.

Charter flights for tourists will be cheaper; we can expect more travel by air.

Look for price wars between supermarkets and you'll find many good bargains.

Expect much flooding in the Mississippi River, Ohio River, and Red River in 1976.

An oil drilling platform off the coast of Louisiana will catch fire and explode, causing the death of several men.

Evil Knievel will be in a serious accident.

The relationship between Syrian President Hafez Assad and Crown Prince Fahd Ibn Abdel Aziz, the ruler of Saudi Arabia, will be strengthened in 1976.

The rumblings of war will be heard between Pakistan and India.

A gas leak in Texas City, Texas, will cause an evacuation of many people.

A famous editor will meet with sudden death in Los Angeles.

Several new oil fields being drilled in Venezuela will produce abundant oil.

I see a fire very near the White House.

Some brands of baby food will be recalled because of harmful ingredients.

Cattlemen will suffer great losses from cattle rustlers. The Southern and Midwestern states will be hit the hardest.

Drugs from Vietnam will begin to come into the United States in large amounts.

An airplane will crash onto a school in California.

More home-grown vegetables will be sold in local grocery stores as amateur gardeners raise more than enough for their own needs. This is a way for some housewives to add income to the family budget.

Stories will tell of a swamp monster in Georgia.

A fire in the Everglades of Florida will destroy much property and take the lives of several people.

In Utah and California I see a trail of blood left by a hatchet murderer who will kill and mutilate many people.

A fire will break out in a skyscraper in New York City while a party is in progress on the top floor and many people will be killed.

I see some old bones being discovered near the Amazon River.

An airplane missing for many days will be discovered in the jungles of Brazil. There will be no survivors.

A UFO will crash on a hillside in the northeastern United States.

A fire will break out in the World Trade Center in Chicago.

Alaska will be the scene of a terrible earthquake.

A fire in a copper mine in South America will cause the death of at least three men.

A candidate for a high political office will be shot in a hunting accident.

A new oil strike will be made in the fields of Oklahoma.

A vast amount of gold will be discovered in both Canada and Colorado.

A tornado will flatten a city in Mississippi, and another one will strike in Ohio on the same day in 1976.

CHAPTER 10

ALLENE CUNNINGHAM

Psychic Astrologer

Allene Cunningham once thought that psychic gifts were "of the devil." Now the former singer has returned to her hometown of Wichita, Kansas, and is actively engaged in psychic work.

She has always had psychic insights, but in childhood she believed everybody "saw." As an adult involved deeply in religious work, including singing for a recording company related to the Billy Graham organization, she suppressed her psychic experiences. But the unexplainable kept happening.

Since childhood she has seen auras about people, often with numbers or symbols that give her insight into their past, present, or future.

"I see pastel colors. It is gray-blue if a person is not well or is very, very negative in thinking. Or it can be a sort of rosy-orange if the person is well or if their vibrations are good," she said.

Religious experiences such as reading the Bible regularly when she was a teenager intensified her psychic abilities, she believes. But simultaneously her religious beliefs prevented her psychic development. Even during those years, however, she says she felt compelled to sneak off occasionally to consult other psychics.

When she did get back into show business, recording for awhile and appearing in clubs in Los Angeles, Hollywood, New York, and Las Vegas, she also began to study and develop her psychic talent.

Current interest in the occult is making many people unhappy, she says. "Since *The Exorcist* came out, you wouldn't believe how many people call me to tell me they are possessed." She derides such beliefs and reassures those who believe they are "hexed" or "jinxed" that they have no reason to fear.

"My beliefs have broadened considerably," she smiles. "I believe there is a universal God and a universal truth. I believe psychic insight belongs to all humanity. It is a scientific

part of man. Someday we will understand it. What man doesn't understand, he often attributes to evil."

Miss Cunningham still sings with the soprano voice that once seemed guaranteed to lead her to fame. She was "discovered" when, at the age of nine, she was singing popular songs and shining shoes in the barbershop of her father, the late George Cunningham.

As the protegé of a wealthy Wichitan, she went to Hollywood, where she was signed by Paramount, and later to Chicago, where she had a contract with NBC.

Each time family misunderstandings and religious beliefs came between her and show business, she says. News clippings relate the career of the child known as the promising "Singing Bootblack" up through her marriage, including such ventures as the time she and her husband set out to "save" Hollywood, gaining entrance to stars' homes through her show business contacts.

To those who have followed her career, she wants to report, that life is good now. "I am never tired. I have so much energy because I have learned to turn off negativity. Man thinks in mental pictures, and when we hold negative pictures in our minds, it saps our energy."

Readers may contact Allene Cunningham at 3700 E. Douglas, Clifton Square, Suite 10, Wichita, Kansas. Her forecasts for 1976 are:

We will view a further decline in a number of the orthodox churches. Many churches will alter and change some of their dogmatic, rigid views in an effort to gather in the sheep that went astray. The Catholic Church will surface and make national news after the passing of Pope Paul.

A woman will lead a new religious movement in the United States and Europe. This new religion will move quickly to gain acceptance.

A "one world" banking system is near. The plans are complete. A prominent American politician has much to do with this. The operation of the system will be unique. Some of the top bankers and economists are involved. An old, reknowned banking family has much to do with this.

A Southern governor needs to watch his health. Too much tension can effect the heart. He also has a drinking problem.

A lot of upheaval around the car industry; talk about merging companies and finding a foreign buyer is forthcoming. I feel this is the Chrysler Company.

What appears to be progress in the opening of the Suez Canal is the groundwork for war. The long-range plans of the Arab nations are brilliant and shrewd. Watch the head of gold. Money buys the power, power controls the world. We are looking at the struggle for world power, which goes to the Middle East.

Jacqueline Onassis will be asked to do a movie. Jackie has always secretly been interested. She projects herself dynamically and has a good imagination.

Governor Wallace will present the American people with an amazing and sincere campaign for the presidency. He has not explained his views on dealing with the corrupt, sick state of the nation. His plans are all well-formulated as I write this on June 16, 1975. His approach on foreign policy will be sharp, direct, and cutting. He will refuse to pussyfoot around with phoney smiles and say "peace" out of the corner of his mouth, knowing it is a meaningless and silly game.

Look for a revival of musical comedy with some new musical comedy hits.

One of the Gabors will suffer with a health condition in the abdomen, kidney and bladder infections, also pains in the lower back region and some pains indicating gall bladder trouble.

Look for a return of a moral code for marriage and the home. The present insanity regarding the home has frightened many couples away from getting married. Look for a new desire for home and security.

Some banks will be in trouble because of loans made with weak collateral and inflated financial statements. Watch for dishonesty of some bank officials.

The medical world will learn what emotion triggers the endocrine glands that results in hormonal imbalance in the chemistry of the body.

CHAPTER 11

MALVA DEE

Seeress of Enchanted Acres

Malva Dee, who lives on Enchanted Acres, West Gilford, Ontario, Canada, bas proven her prophetic insight for several years. She has a large list of clients who receive psychic consultation by mail. Mrs. Dee works as a psychometrist and seer. Her psychic gifts are heightened if a client provides a sample of his handwriting, preferably in a Biblical verse, and a photograph. These items enable Mrs. Dee to create her psychometric analysis.

Malva and her husband, Ken, left southern California several years ago and moved to the highlands in Ontario. "This beautiful area gives an environment of calm and serenity," Malva said. "Enchanted Acres is a truly marvelous place for a psychic. It's an island of happiness in a chaotic world."

Mrs. Dee received a vision while she and her husband were searching for a new homesite. "A map of Canada was revealed and, at the bottom of Hudson Bay, a white-robed figure stood with his arms stretched out. The figure beckoned to me. There was no doubt that we were to live in Canada and we came here searching for our new home."

Eighteen months after leaving California they found Enchanted Acres. "The place had been for sale all of that time," said Mrs. Dee. "It was empty when we arrived and I like to feel it was waiting for us."

Malva Dee's forecasts for the year follow.

Today, as I sit in the silence and tranquility of my studio here on Enchanted Acres, it seems incredible that nine years have passed so quickly. It has been nearly a decade since I first wrote my predictions for a book entitled *Strange Powers of Prophecy,* a book which heralded the beginning of what has become an annual gathering and compiling of the various psychics.

The years have been both enriching and rewarding because of the many friendships made throughout this time, without whose faith and encouragement I could not, in all honesty, continue in my mission as "working psychic."

Now come with me as I go into the silence of psychic

concentration to listen for the vibrations of the coming year, into a world of timelessness, where all things are and all things can be.

If first ask that my attunement be centered upon the far side of the Earth. In my screen of vision, it seems that over the lands of the Far East and Mideast there is a heavy dark cloud. Thunder and lightning streaks through the darkness of storms which seem to bring an unceasing rain upon these lands. This, needless to say, is symbolic of the many material conflicts of these individual countries. Each, in its own way, strives for independence and leadership.

I see the creeping tide of Communism seemingly gaining victories in all of these areas. With this comes anti-American demonstrations that are to be brutal and shocking to our Western world.

I see Laos and Cambodia swallowed up by this tide. These conflicts leave the land ravaged so that famine and pestilence follow in the wake of war.

India will know internal troubles. Continued famine will cause great privation to its people. A plague will arise from the contaminated waters of the great Ganges River, to be met by mercy airlifts of medical supplies, much-needed food, doctors and volunteers from other countries such as the United States, Canada, England, and Russia. I also see a leader emerging who will be strong enough, in the years ahead, to reshape the destiny of this nation. India will have border troubles with both Pakistan and the Republic of China.

I see now on my screen of vision an attempted assassination of a very revered and high-ranking woman of India. This seems to take place in front of a temple. The high white columns of such a building are shown. I see a group of women in white saris going towards this edifice with no hint of trouble. Suddenly, there appears an angry mob led by a very violent-looking man. He is about thirty years old, with dark, curly, shoulder-length hair. Behind him is a smaller man with a shaven head and a thin face. The second man is the leader of this attempt, as will later be disclosed. This attack will be the work of a cult of devotees to the drug hashish.

Earth tremors of severe magnitude will be felt in Sumatra and down through Java. A volcano will erupt in this area that will sink the island upon which it stands.

I see New Zealand coming into the spotlight as acts of atrocity are committed by the Maoris of this small island.

Australia will have its problems with the bushmen. Severe drought will be felt over most of this land. I see a fabulous gold discovery that will attract many people.

Japan will extend its trade agreements with the Western world for unprecedented economic growth. Japan's automotive industry will hit a new high. It will become the "in place" to go on a vacation.

China, however, will retain an air of inscrutability and mystery, seemingly withdrawing behind the Great Wall. Behind this wall, a very powerful nation is being forged. Great technological and scientific strides are being made which would surprise other nations.

British influence in Hong Kong will be seriously undermined and threatened. I see the bombing of an embassy, either British or American, and threats made on the lives of visiting dignitaries.

Jerusalem: for this ancient, holy city, I am only given these words: "an uneasy peace." I reported last year the only solution would be to proclaim this a "free" city under the jurisdiction of the United Nations. I still feel this. Many visitors from foreign lands will make this their destination.

Saudi Arabia: I see pacification talks on the part of the United States as Arabian oil wields its power.

King Hussein of Jordan: Certain of his decisions will be questioned by those around him. This will result in squabbles and mistrust. I also see an unsuccessful attack being made on his person.

Mr. Kissinger will be asked to mediate at a special meeting called between the Mideast countries. Once again, oil comes to the forefront.

A commercial airliner will be shot down over Iran with loss of life. This could result in a delicate and explosive incident.

The power of the United Nations will be lessening in world affairs. The great powers pay token homage to the UN, then go ahead with plans that suit their purposes.

England will continue to have economical difficulties. More strikes will affect the shipping industry. Look for a scandal in the Royal Court. I see the Queen Mother planning a trip to Australia, but remaining home due to her health. Some country under British rule will break ties with the Crown.

In Russia, Soviet leader Leonid Breshnev's power is weakening. His health, not of the best, will be carefully concealed from prying eyes.

Weather: Several freakish summer storms wreak havoc on the midwest of Canada and United States, greatly affecting the crops. A tidal wave originating far out in the Pacific will hit the Pacific coastline, causing many boats to be lost and creating great property damage. There will be a series of minor quakes felt along the San Andreas fault, but nothing that will bring great loss. One very severe tropical storm will hit Florida. This seems to strike the New Orleans area as well.

I see the Mississippi Valley under discussion for control of its watershed. There will be plans to stop the annual flooding. I see dams and dikes which will relocate many citizens. One town will be completely moved. Delays in this project will be due to the reluctance of people to accept these changes.

Water rights and controls will be in the news. A special legislative body will act as intermediary between different factions who want to ruthlessly exploit the watersheds in the Western states.

I see several new plants being built to recycle water for human consumption. Plants will also be built to convert sewage into usable products to alleviate shortages caused by the fuel and energy crisis.

Construction will go forward on a plant to harness tidal power for electricity on the Eastern seaboard. Such projects will be considered by Russia, Britain, and France.

The sea will offer a challenge to the adventurous. Several sunken galleons will be discovered. These treasures will bring on a rash of piracy. Ships that are doing the salvage will be fully armed to stand off looters.

Divers will discover a submerged submarine in the Pacific. It carried much experimental and revolutionary equipment. The sub vanished several months ago; however, this is a well-guarded secret.

Consumers will realize that better management is needed in purchasing goods. This will bring about a better economy, but will cause bankruptcy or near-bankruptcy for several credit card companies. I see better economic stability for our countries. The credit will go to you, the individual. Rather than darkness at this time, a lightness is viewed as each person conserves in all areas of his life.

I see a trend back to the clean-cut, shaven look of the

forties. I see a trend away from the permissive society. I foresee a return to marriage which will stabilize our country. The social conscience of the individual will assert itself and demand a return to respect and authority. This will include greater discipline in our educational system, law enforcement, and equal justice. Reform bills will be passed to curtail the activities of certain factions who seem to bend the laws to their own purposes. There will be laws to enforce greater gun control.

A well-known prosecutor in the Watergate scandal will not like it when his private life is investigated. This could lead to disclosure that will swing public sentiment toward understanding of Mr. Nixon.

It seems that there will be better trade relations between the United States and Cuba. Look for a meeting of the President with Fidel Castro.

An unprecedented boom in Alaska and Northwest Territories due to the rapidly expanding oil and mineral fields.

New laws will be passed in favor of mental patients confined involuntarily to institutions. These laws will provide constitutional rights to accept or reject treatment, rather than submit to the treatment such institutions prescribe.

I see a dental care plan similar to the Medicare plan to be officially passed.

A curious sight on our highways will be methane-powered vehicles.

I see methane gas recognized as an alternative source of energy. Many companies will devise ways of handling and using this fuel. Methane could easily replace the dwindling supply of natural gas.

I also see a water-powered internal combustion engine being proven as workable and efficient. The fuel here would be very clean-burning, having no harmful effects on the ecology of the countryside.

There will be booming sales in windmills, as homesteaders and ranchers look to wind as a possible source for their household current.

A theft of famous European jewelry or museum pieces will hit the headlines. The only way the police can describe this is that "they came out of the air."

The Mafia will be in the news as the disappearance of a well-known Mafia member touches off extreme discord within the Family.

There will be a sabotage attempt made on a hidden ammunition depot south of the border. This will cause repercussions on both sides of the border.

A smuggling ring seems to be based in Florida. The smuggled cargo is rum.

I see for the building trade a new metal compound which will be resistant to heat, extremely durable, and capable of carrying greater stress loads than steel.

A new diamond discovery will benefit a small, impoverished country of South America.

Fashion: A new style in evening dress will look similar to the 1860-1870 ballroom gown. The tight skirt will give the impression of a bustle. Materials used for these will be rich velvets and brocades of dark hues. The men, not to be outdone, will favor modish velvet and brocade jackets.

I see a new breed of cat introduced that is larger than the average cat. It looks like a small tiger. This will be extremely popular with those who love cats.

A tragic accident in the running of a major horse race at Epsom Downs came to me. At least one, possibly two horses will have to be destroyed. One jockey will lose bis life.

At a national convention of doctors or dentists, a number of gay men cause great embarrassment.

Look to Texas for radical changes in its political legislation. Watch for the possible division of this huge state into five smaller ones.

I see a great fire burning in the city of Rome. This will wipe out the oldest part of the city. Many relics will be lost.

A new Pope will head the Roman Catholic Church.

The Olympic Games in Montreal, Quebec, will be heralded as an unqualified success. The Russians are going to be successful in competition, along with the Japanese. A Canadian girl is going to win applause for her ability in water. The canoe competitions are going to be greatly favored by the spectators, as well as the cross-country horse events. However, marring this event, members of one nation will be ostracized because of their uncooperativeness.

There will be a public investigation of soaps. The claim will be that these products are causing allergies and illness to users. These will result in a solution to allergies that have caused doctors and patients untold aggravation.

I see laws to place polar bears, seals, and whales under protective custody.

The return to the land will continue with many people turning to organic farming. They will learn to work with nature for surprisingly good results.

The forestry industry will be greatly distressed over an unknown blight which attacks fir trees. Before this is brought under control, many valuable trees will be lost. The great redwoods of the West Coast are threatened to extinction by this blight.

Also I see a great swarm of migratory birds swept off their course by a tremendous gale or storm. Many people will be excited to see these birds pass over unfamiliar routes.

Dragonflies will be recognized as the greatest enemy to the black flies which make the north country so unbearable. Every effort will be made to introduce dragonflies into these areas.

Tobacco will take a considerable jump in price in both Canada and the United States.

The beef industry will market grass fed beef. But the price will remain high. In fact, I do not foresee any lessening of prices of consumer goods.

On TV, comedy will compete with the violence of police and detective shows. Not loud, brash comedy, but something light and sophisticated, with elegant sets, inspiring wardrobes and well-chosen plots and dialogues. These will be 90-minute specials once a month.

Russian players will certainly inject new excitement into hockey and prove a boon to the box office.

I am given the view of a tragic auto accident which will take the life of a well-known race driver. This occurs while he is coming home with his family and driving at normal speed.

Prime Minister Trudeau will meet criticism on his turn about-face involving wheat exportation from the Prairie Provinces to foreign countries. He will find unexpected support from two members of the Conservative Party on an issue involving fuel oil consumption and exportation.

Judy LaMarsh, a well-known figure in Canadian politics, will surprise everyone by announcing her retirement to a more private way of life.

A very well-known blonde Hollywood actress, known for her charity work, is going to sponsor children from a war-ravaged land. She will set a precedent that will catch on with her colleagues and the public.

John Wayne: I felt heaviness around him last year as I made my annual predictions. He is still coping with a health condition in his silent manner. Because of this, he will face hospitalization which will make known his grave illness.

A person destined for success is Carla Emery and her "School for Country Living."

James Stewart will have a grave illness. I feel severe pain in the lower right side of his body.

Olivia Newton-John will have a juicy movie role offered to her.

Paul Newman should watch for personal danger in the making of a new thriller.

James Mason: I see him with a young, dark-haired girl on his arm.

Sophia Loren: Another baby for the Pontis?

Burt Reynolds: A switch of affections will cause eyebrows to raise. He'll have bigger and better roles as his career grinds into superstardom.

Richard Thomas (better known as "John Boy" Walton): His marriage will fail.

Sonny and Cher: A reconciliation will not be of a lasting nature.

Phyllis Diller to be on the sick list.

Karen Valentine's career will skyrocket.

Elvis Presley must watch his weight or suffer health complications.

Mary Tyler Moore's doctors will insist that she take a rest.

Mac Davis will become an established favorite with the public. Personal happiness seems to shine for him.

Dean Martin and Jerry Lewis will do a show together for old times' sake.

A band of northern Eskimos will be looked upon as public heroes as they rescue survivors of a ship that gets caught in ice floes in northern waters.

I see a settlement of a dispute between the Apache Indians and a local government in Arizona. This will set a precedent for better conditions for all Indians in United States and Canada.

A lottery winner will set up a care center for neglected and aged domestic animals. In doing so, he sets off a "tempest in a teacup" as to whether or not he is doing the right thing.

UFOs: Yes, I believe in unidentified flying objects. They do create fear or apprehension, but this is because we don't

understand them. It is natural to fear something that we do not understand. How can we communicate with them? Our communication with the "beings" will not be through the spoken word. We'll use a type of mental telepathy, which has not yet been established as being of value for communication. It is still confined to the realm of psychic phenomena, as are UFOs. I cannot honestly say that I believe UFOs will bring harm to our planet. In fact, as time unfolds, I believe these strange vehicles may bring answers to our scientists.

Now, flashing across my screen of vision, I see a crash of an unidentified Flying Object . . . luckily this seems to occur in the ruggedness of the wilderness of the Rockies, perhaps Utah. Many people will see a blinding flash as it makes its descent in a fiery arc. This will touch off a forest fire that will take many days and man hours to contain. The fire will obliterate the scene of the actual origin of the fire. At a later date, prospectors will come across remains of twisted metal and leave it there. The prospectors will think it is the wreckage of some lost and forgotten plane.

Texas seems to hold an attraction for UFOs. Texans will become quite used to seeing them. California will know many, many sightings.

In my own backyard, here on Enchanted Acres, I have personally witnessed UFOs. There is far more activity during the winter months than at any other time of the year. Not only my own sightings, but those of others around me also have always been on cold, clear, and frosty nights. I've looked out on the beautiful vista of snow mantled hills and lakes to suddenly observe a fast-approaching object which disappears, then reappears just as abruptly, to finally settle down like a silent snowflake on the ice. This has happened time and again.

I am impelled to add before leaving you to remember that we psychics are human. We're subject to the same cares and emotions as anyone else. Yet, as we tune into the higher vibrational force field, we relate faithfully that which is given to us at the time of our contact or tuning in. I feel that no one person is given the whole picture or view. So many times merely a fragment of those events are revealed which has its effects on the future. Only when all fragments are gathered together, like putting together a jigsaw puzzle, can the entire view or picture be seen. This now brings that element known as time to mind. In the limitless vastness of the Cosmic Universe, our time factor has little meaning. Therefore, in this issue there shall be those predictions perhaps that will not unfold within 1976.

Remember that as the paths of destiny and trends are given, these can act as guidance. Do not be fearful of what the future holds. Each of us, in our separate and unique way, can work toward the fulfillment of our chosen paths. We can have the faith that in so doing, we are helping to bring unity and peace to ourselves, to our nation, and to the world as a whole.

CHAPTER 12

JOSEPH DONNELLY

Spiritualist Healer and Seer

Joseph Donnelly is a psychic whose writings have appeared in many periodicals and books. He has investigated more than 100 mediums since his interest in the paranormal started in 1917. While Mr. Donnelly earned his living as a professional man, he found time to study the religions of the world, white magic, develop breath control, and investigate various phases of the occult, hypnotism, and ESP.

He has personally experienced many phases of psychic phenomena and he uses these in his healing work. The method is known as thermal electric magnetic healing. This phase was taught him by Dr. Anton Mesmer, while using a materialized spirit form.

Mr. Donnelly has developed a universal diet, which he used to reduce his weight from 185 to 140 pounds over a period of time. He is 5 feet 10 inches in height, was born 1899, and is in perfect health. His teachers and spirit master teachers have told him he would live beyond 100 years on the Earth plane.

His type of healing can be done by his spirit teachers at a distance, by manipulation of the etheric body. He has many testimonials in his files to document the results.

Readers who write Mr. Donnelly should enclose a stamped, self-addressed envelope. He answers three questions for $7. Enclose a snapshot that will be returned. His address is Lazy Pines Ranch, Rt. 3, Box 28, Lake Placid, Florida 33852.

Mr. Donnelly's forecasts for 1976 are:

Certain areas in Florida have been overbuilt, especially in the Keys. This has brought on a shortage of water and created a carbon monoxide problem. Warning: the first bad storm or hurricane to hit the Keys will destroy much of the overseas highway. This will strand many residents and tourists. It will be costly to get autos back to the mainland. Many newcomers to the Florida area have not experienced a hurricane.

Ted Kennedy should not run for President. If he defies

fate, he will be assassinated. The Kennedy family calamities are not over yet.

John Wayne should take it easy and slow up to last longer.

The new members of Congress will control. Ill will between Congress and the Presidency will be prevalent.

Effective vitamins will be bootlegged, because the AMA will want to restrict their use. This will bring the bugaboo of socialized medicine that much closer.

Water problems are increasing. Best advice is to boil all water used for drinking and cooking.

Inflation and the inability of many to go to the hospital and/or doctors will curtail the doctors' practice and reduce the number of hospitals.

Free love will equal an increase in VD.

When a new Pope is elected, he will make many radical changes. All churches will have less people attending than ever before. The younger generation is looking for something tangible, not pie in the sky a million years away. Burning in fire and brimstone forever is a poor way of describing a just and merciful God.

These ridiculous pants that women wear will be passé. Women will go for flowing gown styles of Greek and Roman ancient times.

Petitions will circulate for the abolishment of the United Nations.

It would be a good idea for people in crime areas to buy metal protectors for doors and windows. Large estates should use sentinel dogs and armed guards. There will be roving bands of unemployed and others bent on destruction of other peoples' property, including pilferage of unprotected areas. Food stores will be prime targets. Some areas will be patrolled by vigilante citizens, because of little or no police protection. The days of unlimited auto pleasure travel are about over. No car will be safe on any road, especially long back roads with no protection in open spaces of long distances. Trucks will have to travel in convoys and be protected by shotgun riders. Railroad trains will be wrecked.

The world's most wealthy people, the oldest ones, will soon have their six feet of earth allotted to them. Their moneyed empires will fade away.

Some far-seeing people fear that food shortages and economic disaster will tear the fabric of our city society. More and more people are leaving the cities to seek self-sufficiency

in the country. You will find them in isolated areas in the Western states.

As time passes, our currency will become almost worthless. This will create panic and wall-to-wall riots.

The Arabs showed the way so other small nations will begin to blackmail the United States for vital materials. There are approximately thirty-five of these countries. We are short of about 100 different types of raw materials and some are no longer available in the world.

Regardless of the money problem, as a nation we have to step down a peg or two in our standard of living.

Worldwide food production is in peril, especially in the United States, where crop land is being reduced. The projected United States population will be in excess of 300 million before the turn of the century.

There is a strong possibility that Mr. Ford will not complete his term in office.

CHAPTER 13

JOSEPH EAST

Psychic Consultant

Joseph East is a spokesman for The Group, an organization of 200 psychics throughout the country. They are dedicated to improving their skills in ESP, handwriting analysis, palmistry, astrology, healing, and psychic counseling. The Group meets regularly on the third Tuesday of each month (except July, August, and December). Meetings are held at 7:30 P.M. at 30 West Chicago Avenue, Chicago, Illinois, and interested persons are invited to attend.

In his personal psychic consultations, Mr. East uses clairaudience, palmistry, and psychic impressions to gain information for his clients. Personal advice is given by appointment only, which can be obtained by writing to Mr. East at P. O. Box 5863, Chicago, Illinois 60680.

Mr. East's wife, Alexandria Russell East, is an expert in handwriting analysis. She is the author of *What's In Your Signature?*, a guide to handwriting analysis. Mrs. East devotes a considerable amount of time to marital and premarital counseling using handwriting traits. She is also doing research for Dr. C. Norman Shealy, a neurosurgeon from LaCrosse, Wisconsin. Dr. Shealy runs a pain clinic to assist people who live in severe pain.

Mr. East's predictions are:

There will be a great leaning towards the 32-hour work week because of the lower birth rate and healthier senior citizens. If cancer is ever controlled, start looking for the 28-hour work week. The Social Security pyramid will be top-heavy and will fall over. People should not worry; how long they work is not as important as the fact that they will be earning enough salary to cover expenses.

Elvis Presley will be worked into movie parts that were formerly handled by Clark Gable. He will even play cowboy parts.

There will be a move to nominate God the Father for President as we need his knowledge, honesty, and perfection. It will make people think.

The only way to get this country out of the mess it is in is

to use the plan that Harry Truman used when he was President. He balanced the budget and got us out of a war without a Depression. He took the responsibility with the comment: "The buck stops here."

John Wayne is due to make a good comedy without Indians.

George Wallace is the only Democrat with enough campaign money to get elected President. He could be another Franklin D. Roosevelt. Expect George Wallace to pick a black woman for his running mate to get votes and bring him close to winning.

There will be a tendency for one person to start the ball rolling in the conviction of politicians as happened in the Watergate scandal with the guard who found the door taped open and those who revealed information.

Some of our greatest robberies will be pulled off with a computer and telephone.

Ronald Reagan will make the best Republican candidate for President. He could balance the budget by playing his old movies on TV. An Aquarian is needed to pull us out of the hole because Aquarians have altruistic tendencies of loving the world and those in it. He is afraid of bringing in astrology because of its mysticism.

In order to beat the Arabs in the energy squeeze, along with the oil companies, we will have rationing of oil, sugar, gas, and food.

Teddy Kennedy feels the hex is on his family and feels good to be alive. He knows the Presidency is not worth it if you are dead.

Expect a big dog food manufacturer to advertise: "Our products are safe for senior citizens" and then raise the price. It will take the government three years to prove that it is not safe.

Jackie Onassis will lose a great deal of weight; a person is affected that way when she constantly is surrounded by death.

Heroin will be easy to get. The only way to stop it is to take the profit out of the sale.

Many politicians will take lie detector tests to prove that they are honest. They will be elected.

Large corporations will refuse to kick in with campaign funds. If they get caught this time it will be a stretch in the pen. This will be a cheap election.

Baseball will have more stars, bigger crowds, and one scandal.

Ex-President Nixon will have internal family troubles. Much will be made over a speeding ticket and an accident, more than over Watergate.

The stock market will slip to 750 because of a stock scandal. One big company will go under, taking several others with it.

Fish farms will be the latest craze, with milk barns being turned into fish barns.

Food grains will have bumper crops but prices will stay up. There will be moves to lease tropical islands to can tropical vegetables right there on the spot and ship them home to us.

Expect a Christian Democrat Party with several religions banding together. Billy Graham will be offered a top spot.

The youth will be disgusted with the politicians and will refuse to vote.

Politicians and government officials are afraid of finding a cure for cancer, heart trouble, and old age. Overpopulation would ruin the country. Some feel it would be like having your car last forever.

Smog will start lifting around the Los Angeles area.

Car prices will go up with the emphasis on smaller cars. Bumper stickers will read: "Buy Japanese and win a free trip to the Tokyo unemployment office." An American is somebody who will buy foreign cars and TVs even if he loses his job doing it.

Big cities like New York City, Philadelphia, and Newark will have their credit problems and will cut back on services—all except Chicago, due to Mayor Daley's effort to stay solvent, which is why he has been in office so long.

Fashions: Dresses will be slinkier and sexier than usual. If women would combine their money, sex, and votes, they would have it made in the next election. They could flood the ballots with female candidates.

Education will slip in importance as the emphasis will be to be your own boss.

A quick service food chain will slip as the word "horsemeat" hits the papers.

Death and destruction will still win the Oscars.

Food: The middleman will keep the prices up but homegrown fresh vegetables will take the sting out of high prices.

New Ideas and Inventions: Inventories in old items must

be pushed and cleaned out before new ideas are put on the market. Don't expect any brainstorms to hit the market. Need creates inventions and I do not foresee any for the next year.

Religion: There will be a switch to praying to God the Father, Our Creator, instead of Jesus Christ. People will feel they need plenty of superforce to straighten out the country and their lives. High-level spirit guides like Pope John XXIII will be used as he knew how to change the entire structure of the Roman Catholic Church. He is going to be close to us.

Israel will get to use the Suez Canal as Egypt will need the fees to pay the bills.

More people will see UFOs but the government will still call it hysteria. One of our fighters will be lost chasing them.

Psychics are getting better than the experts in predicting and looking into the future. There will be a clearinghouse for predictions. We will find out that certain weather conditions produce better results.

Space: There will be a pullback because of a lack of interest. The United States-Russian venture in space will not be as fact-finding as it is played to be.

The stock market will slip from 925 to 750 because of the little guy getting out of the market.

An attempt will be made to tell the truth about the big traffic in pills. The layman cannot visualize the scope of such an evil generated by so-called legitimate business and man's inhumanity against man.

Crime: Doubled due to dope which requires money.

Ford will think about resigning many, many times. If you think Congress will get even with Ford, watch what they do to Rockefeller.

War in 1976: The North Koreans will look for a reason to attack the South Koreans and draw us into the conflict. They hope we will withdraw help from our old allies. Their plan is to make the United States a second-rate power. The Orientals are wise because they study history. The United States created the 38th parallel and we try to maintain it. We did the same thing with East and West Germany, North and South Vietnam.

Housing: This will be a serious matter as there is a need for more housing. There is plenty of vacant land but there is also a need for longer mortgages with about 8 per cent interest. Mortgages should and will be a 50-year duration so the youth of the country will be able to buy for their future and

their children's future. I see this happening in 1976 in the Southern part of this country. Once it starts it will spread like wildfire and the building industry will boom.

Sports: Football—Baltimore will get into the Super Bowl. Baseball—Cincinnati will get into the World Series. Basketball—The Bulls will get into the playoffs. Horse racing—A filly will be the horse of the year. O. J. Simpson will get hurt.

CHAPTER 14

BETTE EGLER

Indiana Psychic

Bettie Egler, a newcomer to our compilation of forecasts, has received national publicity for her predictions. Her address is 1728 Sussex on Berkeley Square, Kokomo, Indiana 46901. She writes:

"For five years I have been an accredited astrologer and practice professionally as time permits. I've also taught astrology classes and done some writing on the subject.

"For the past year I have also instructed a Mind Dynamics Training Course for Ivy Tech, the Kokomo YWCA, and private classes. The course is the result of personal training. I did a great deal of research on the various mind training programs, transactional analysis, Gestalt therapy, and metaphysical and spiritual teachings.

"I had the further advantage of consulting with a friend who is a clinical psychologist before offering the class. This eliminates the inherent dangers of some mind-training programs. The classes have been very successful and directed my interest to the potential of this training in the medical and mental health fields. Professionals in these areas have offered their cooperation and this is one of my leading interests at present.

"Time for this and other 'nonpsychic' activities is limited due to appeals for help or counseling as a psychic/astrologer.

"I've known for some time that I would have certain responsibilities along this line. It is only in the past couple of years that my work has been at more than a semiprivate level. Since the first of the year, I've been inundated with hundreds of letters and phone calls from people seeking help and guidance. It should be a full-time job to keep up with them. Unfortunately, the need for financial survival doesn't permit this. I do my best in the time I have available. It is most rewarding to help when so many are distressed and in need of someone who cares.

"However, it saddens me to know that all people reaching for help to a 'psychic' could easily and safely—with the right methods—develop their own psychic abilities. They can

discover within themselves the help, guidance, and potential fulfillment they need.

"There is nothing weird, spooky, or supernatural about these abilities. They are as natural as breathing, eating, and sleeping. Over the centuries, we suppressed them as we sacrificed wisdom for knowledge of a material nature. Now, however, these natural abilities are again emerging—often spontaneously in those who experience what they had scoffed at. Many are finding these powers are neither good nor evil, but based on energy. They are like all great powers or energies—above both good and evil. They can be used for either. This is the challenge we face—to use them for good.

"Expansion of consciousness will increase rapidly because the new age's higher vibrational level will increase in intensity. Our mental, physical, and spiritual natures must adapt or collapse.

"Those who want to help others adapt to these changes will be setting up centers throughout the world. One such center is the responsibility of my oldest son, Terrance. Under his direction, it will open shortly. Another son, Tony, is involved in the work of the center, which will be called Transition, Inc.

"In regard to my predictions, I'm sure every psychic is reluctant to share some things we've seen for the future. Yet, the time has come when we must reveal some of it. It is possible now that by predicting the future we can help to prevent it."

Bettie Egler's forecasts are:

History will repeat itself in 1976 with revolution marking the end of a cycle for the United States. The Bicentennial brings us full circle in a 200-year cycle. This emerged in my research on the pattern of the Earth's "wobbles" as it shifts on its axis. In simple terms, the Earth doesn't rotate steadily on its axis, but wobbles as it shifts. A study of the degrees of these wobbles indicates that greater wobbles coincide with the rise and fall of nations, great natural and manmade disasters, and wars.

Further research points out that the magnetic axis rotates counter to the Earth's rotation, completing one rotation every 200 years. Wobbles peak in intensity at the end of each 200-year cycle.

Since Earth wobbles change the meridian line, they affect individuals and nations by creating inner tension, anxieties,

stress and fear, etc. This is due to disturbance of electromagnetic energies. The degree of these effects peaks at the end of the cycle. This results in psychological trauma for individuals. They erupt in all the violent, passionate, desperate, heroic, hysterical, and fanatical actions that create empires, nations, and civilizations—and destroy them.

In my study of the 200-year historical cycles, I discovered a positive-negative pattern. History consistently repeats itself in reverse, so to speak. Thus, the Revolution in 1976 will violently tear apart what our founding fathers sacrificed to join together in 1776.

Following the inevitable cycle, the American Eagle, like the ancient Phoenix, must perish in revolutionary flames before it can rise anew from its ashes.

In a karmic sense, 1976 is the time of reckoning for the United States—the reaping of what we've sown as individuals and as a nation. Some of our seeds, unwisely sown in the past, will bear bitter fruit.

We've already started to harvest our crop by experiencing the early climax of this 200-year cycle in the scandals, deceptions, dissent, discontent, and economic hardships. These events have already stamped this as an unprecedented time in our history.

My psychic analysis of future events bears out the evidence compiled in scientific astrological research on the 200-year cycle.

History repeats itself because certain parts of the country (and world) are magnetic centers to which action is drawn when certain cycles are completed, beginning again at the same origin manifesting alternately the positive-negative quality of the cycle.

Thus, for the second time, a "shot heard round the world" will be fired in Boston, as America's positive cycle ends and the negative cycle begins.

The shots will be fired by federal troops ordered into Boston by President Gerald Ford, who will declare martial law in that city to quell violent rioting. Looting and other disruptions will begin in July 1976 and grow in intensity through August.

The violence will be rooted in racism. It will be deliberately organized by certain elements of the federal government. The uprising in Boston will be related to the takeover

of the United States government, which was completely accomplished in the mid-1960s.

After several "dry runs" to test the reaction of the public to provoked rioting, strikes, etc.—such as the demonstration at the 1968 Democratic Convention in Chicago—the power group which has secretly controlled our country for a decade is now convinced that the time is right to create conditions which will enable them to surface and openly consolidate their power.

Through their agents, who have infilterated government, military, industry, business, media, etc., and have found the CIA a particularly useful cover, this power group has actually been running the so-called "radical" and "revolutionary" organizations. They have instigated most demonstrations, strikes, and riots, been responsible for the "fuel shortage," most food shortages, and planned the economic depression.

They arranged for the assassinations not only of John and Bobby Kennedy and Martin Luther King, Jr., but also of heads of other nations, certain entertainment personalities, and rock stars who posed a threat. Certain Watergate figures were deeply involved in these activities, some knowingly, others unwittingly.

These actions are part of a master plan originating out of Nazi Germany after World War II. The goal is total world domination by a small group of individuals whose identity is scrupulously hidden, even from their most powerful agents.

Before their assassinations, John and Bobby Kennedy became aware of the operations of this group. They had compiled enough information to begin taking action against them.

The master plan's next phase is declaration of a state of national emergency, martial law, and a virtual police state—in that order. The fuse has been lit to go off in Boston in the summer of 1976.

A second Boston Massacre will occur during August 1976. In a series of violent riots, several people will be killed by federal troops. It will be apparent that the troops were more a show of power than a necessity, public reaction will be quick and angry. Nationwide demonstrations and riots will gain momentum as fall approaches.

Critical economic conditions, food and fuel shortages, will fan the fire of revolution. The nation's economy will fluctu-

ate, then go into a sharp decline. When summer employment ends, there will be a steady downward plunge.

Many critical problems will erupt simultaneously as the economy declines. With many people unemployed and frustrated, the employed will tend to "dig in" to defend what they have.

Young radicals will find themselves unemployed, politically resentful, actively hostile. The chaotic scene will arouse many Vietnam veterans to rebellion as they protest what they see as political oppression.

As rioting, looting, and bloodshed gain momentum, there will be a tendency to split into factions representing religions, politics, social standing, etc., all factions fighting each other—either verbally or physically.

Basically, racism will underlie the violence and pit employed against unemployed. Competition between the races in the depressed labor market will cause race riots.

Different areas of the country will experience these conflicts in various ways. None will be exempt from the repercussions.

The political arena will reflect this confusion and disruption in 1976. Primary votes will be divided so that both parties will come up with candidates without full support of the entire party. This will result in alienating many dedicated party members.

President Ford's bid for reelection will be weakened by grave errors he will make prior to the convention. Selection of Nelson Rockefeller as his running mate will lose even more support for Ford.

A Republican party split will become obvious before the convention. Former Governor Ronald Reagan and Senator Charles Percy will successfully challenge Ford at the primary polls.

At the convention, a major thrust to oust Ford by Reagan and Percy forces will fail. Lack of unity will make it impossible to organize support against Ford and Rockefeller.

A sufficient number of votes will be rallied to elect Ford and Rockefeller as the party nominees. Reagan will withdraw, leaving his votes open. It will be impossible to fabricate a show of party unity—even for the television screens.

The Democrats, prior to their convention, will be squared off behind Senator Ted Kennedy, Governor George Wallace,

Senator Edmund Muskie, and a half-dozen less prominent candidates.

Senator Kennedy's final position in 1976 is still not completely clear. Possible events could alter the picture. He will probably stick with his decision not to seek the presidency. This would be his wisest course; he is sincere in saying he has chosen it.

As time for the conventions nears, the explosive situation nationwide will deteriorate and candidates will propose many solutions. They will privately recognize the hopelessness of conditions and be reluctant to win the election.

As the winter of 1976 approaches, the fuel crisis (especially on the East Coast) will worsen, intensifying the nationwide chaos. Rioting, looting, and bloodshed by then will have become large-scale. Not only large cities, but most metropolitan areas—especially industrial centers—will be the scenes of unprecedented outbreaks of violence.

A delusion will be perpetrated by agents of the power group as it successfully accomplished each step of its master plan. Those who participate in the rioting will be labeled "revolutionists" to generate hostility against them. It will be convenient to lay the blame for economic problems, crime, etc., on the groups protesting.

Actually, much of the rioting will be provoked by covert agents, employed by government factions under the guise of internal security. They are convinced that their methods and goals are best for the country.

These agents will control many of the organizations of "young radicals." With a state of national emergency as its goal, the power group must first create enough turmoil to justify it. Thus, the protestors will be made scapegoats and outcasts in their own country—reminiscent of the Jews in Nazi Germany.

Against this turbulent background, the political candidates will continue their uninspired efforts to win the presidency. It will become obvious that a clear majority of votes for any one candidate will be virtually impossible.

At the Democratic Convention, less prominent candidates will battle for votes. Each will lack the strength to rally a majority. Then Governor George Wallace will appear likely to be the Democratic candidate. The impasse will be broken by some of the major politicians consolidating their support be-

hind a "dark horse." They will feel he is equal to the responsibilities of the office.

The name of this man could change due to later influences. At this time, it appears the 1976 Democratic nominee for President will be Senator Birch Bayh. If something interferes to alter Senator Bayh's destined role, another dark horse candidate will be chosen.

Governor Wallace will refuse to be blocked as a candidate and will run as an Independent.

A series of decisive events in the history of the United States will begin with the incapacitating illness of President Ford. This will develop between the convention and election. Pressures of his office will cause a mental and/or physical breakdown. He will be forced to resign, or at least turn over his duties to Vice-President Rockefeller.

The reaction to this crisis will cause the country to explode so violently that Rockefeller will declare a state of national emergency. This will automatically suspend any election.

It is at this point that America's future lies in balance. Only the people themselves can write the next chapter. Two paths are open, destiny having left the choice to those who must live with it.

If the declaration of national emergency goes unchallenged, a police state will sacrifice our freedom.

Indications are that the Democratic Presidential candidate will use certain powers of Congress to override the declaration of national emergency. This will lead to impeachment proceedings against Rockefeller.

With strong public support, this measure will be successful. The Democratic candidates will be elected to office. Under their leadership, the nation will begin to recover.

Certain cycles are inevitable. It should be remembered that, to a great degree, the future is fluid. Individually and as a group, we have the freedom to create our future through choices.

We should view these coming events as objectively as possible, remembering when they occur they're less dramatic and dreadful than they appear.

Life has a way of going on at an individual day-to-day level regardless of what's happening on a larger scale. Individuals adapt rapidly to circumstances. They will probably wrap garbage in the newspapers reporting these predicted

events, then go back to coping with their own personal problems.

Weather Conditions: Throughout the remainder of 1975 and in 1976, erratic weather conditions, frequent tornados, hurricanes, and earthquakes will plague this country and add to the overall distress. I have felt for some time that the area of Southwestern Indiana, Northwestern Kentucky, and Southeastern Illinois and Missouri are vulnerable to a severe earthquake. This will occur in 1976. Floods and droughts will contribute to food shortages in 1976.

Catholic Crisis: The Roman Catholic Church faces a prolonged crisis which will begin with the incapacitating paralysis of Pope Paul, due to a stroke, before or during 1976.

A new Pope will be elected but opposition among the College of Cardinals over his election will result in his resignation within a few months. The Cardinals will be unable to reach agreement on a successor. Papal functions will be taken over by a Board of Cardinals.

There is a strong likelihood of a split in the Church. Two cardinals will emerge as leaders of Eastern and Western factions. They will be referred to as "Popes" by their followers, although not officially holding that station.

Before the end of this century, opposing factions will unite and rally around a new Pope. He will institute a complete renovation of Catholicism. The Church will become stronger than ever in its history. It will be a great force for peace in the world. This is what many would refer to as "the Second Coming"—although the traditional interpretation is not entirely accurate.

The man who will accomplish this as Pope is a priest today.

Alien Visitors: Archeological discoveries in 1976 will have vitally important implications if properly interpreted. Records similar to the Dead Sea Scrolls will be found in Turkey and Egypt. They will contain a complete log of a visit from highly evolved beings from another planet in the distant pasts. If these scrolls are translated for what they actually are—a factual record—and not as a myth, they will contribute greatly to our understanding of the past and the future.

UFO Reports: A number of UFOs sighted during 1976 will have their origin on this planet. They have been fabricated to generate additional fear by those seeking more power in this country. While there will be contact from dwell-

ers on other planets, they will arrive in spaceships, but this will not be for several years.

The general fallacy is the belief that beings from other planets must arrive in a spaceship. This is not the case. Many living today, with whom we work, study, and associate are not of this planet. They have used other means to help, teach, and influence us.

Russia-China Clash: An incendiary border clash between Russia and China will take place. The United States will play an important role by arbitrating the hostilities.

European Depression: The Commonwealth of Europe will experience a severe general Depression stemming from the spread of Communism, specifically in Italy and France.

Loss of Leaders: The government of West Germany will suffer a severe blow when the head of government and other leaders will be killed in a plane crash.

Irish Hostilities: Hostilities between England and the IRA will erupt into a full-scale civil war during the coming year.

Mideast War: War will break out between Israel and Egypt between January and May of 1976. Before this, the United States will have withdrawn its support of Israel due to this country's internal problems. The trend I perceive is the steady decline of Israel as a nation, beginning with this war. It appears that Israel will no longer exist as a nation in about two years. Jerusalem will become a free city-state.

CHAPTER 15

ELLEN EVANS

Georgia Seeress

Until a few years ago, Ellen Evans was a wife and motber of four children in Buford, Georgia. She would never have guessed that she might have psychic ability. She was asleep one night when something strange and unusual occurred to change her life. She popped wide awake to see a large yellow ball of light hanging in midair in her bedroom.

Mrs. Evans woke her husband, Gene, but the light vanished before he could see it. The couple decided it was either a dream or an hallucination. But a few nights later, Ellen awoke to see the image of a face and shoulders outlined against the window curtain. For three months the image appeared on the curtain. The face never moved and didn't make a sound. When she woke her husband to see the image, it vanished each time.

Finally, the apparition vanished to be replaced by a sort of voice. "It's not really a voice but a knowledge of things," Mrs. Evans explained. "It's more like a radio news broadcast."

The light, the face, and then the "news flashes" were the start of Ellen Evans' psychic career. "I don't know what the voice will tell me before I make a prediction," she related. "Sometimes I receive insight from a spirit I call Ruth Mitchell. This spirit was the face I saw on the bedroom curtain. Ruth Mitchell is my subconscious."

Mrs. Evans now does psychic readings by mail. "I work best from a photograph, a birthdate, a color and a number," she reported. "When I look at someone's picture, it's like seeing an X-ray. I can detect illnesses and other discomforts. Colors also appear around the picture like an aura. I do get a bit sleepy, but I'm not in a trance. I much prefer to work from a picture and a person's letter." Readers may write to Ellen Evans at 3837 Sudderth Road, Buford, Georgia 30518. Her predictions are:

Several times during 1976 the United States will be hit with epidemics of various new diseases. Deaths and overcrowded hospitals will be in the news. Many lives will be lost

in a resort town due to food poisoning. Rocky Mountain spotted fever will increase; many cases of sleeping sickness, death from another insect bite. Major breakthroughs in cancer, arthritis, and multiple sclerosis. A popular soft drink will be found to aid in the prevention of heart attacks. This drink helps burn excess cholesterol and lessens hardening of the arteries, especially in men. A machine will be used in the treatment of alcoholics and drug addicts. More doctors will be sued for malpractice, causing many to change locations.

An interesting year in politics: George Wallace will gain in popularity with the people. He must be on guard against another attempt on his life. A health worry surrounds him. He receives a great deal of threatening mail. Very much in the news: President Ford, Ted Kennedy, Barry Goldwater, and Ronald Reagan, also some senators from the South.

The United States will maintain good relations with foreign countries. People will enjoy travels abroad, trade and commerce will flourish. Some of the aid and loans to foreign countries will be paid back. Canadian imports will suffer losses. Red China continues as a threat. The sea is no longer a barrier. Mysterious disappearance of submarines will be in the news.

Improvements will be made in conditions in prisons. Juvenile offenders and unwanted children will have special homes and will not be jailed. More judges will be added to the courts, stricter penalties will be set for some crimes. Minimum fees set for lawyers will be so that both rich and poor can have good legal counsel.

More money will also go into our youth programs—new methods of education, fewer subjects taught, young people oriented more towards life ahead than towards education only. Loans will be easily available for college and special training after high school.

Computers are still going strong in business. They'll be used in medicine and other related fields. Publishing and literary fields will flourish, also television and cosmetics.

Much in the news will be about the CIA, FBI, and top telephone officials. Some shocking headlines here. Scandals as to how illegal drugs are being smuggled into this country will predominate.

Some drugs, very much needed, will be very high priced and scarce. This is a controlled shortage.

Shortages of cotton will occur, especially for sheets and towels.

The building industry renews, with more compact homes being built. Many will be built with less conveniences due to high utility rates. Power for homes will come from generators and other sources in years to come.

Places of business will change their hours to suit the working people. Coming out of the recession, Americans will be in a better frame of mind. Economic recovery should be well under way during 1977.

A new interest shown in UFOs; they will be studied in schools. UFOs will be seen in the Southern and Eastern part of the United States; also in England. One very strange sighting near Memphis, Tennessee; some real facts will come to light regarding this incident.

Coming in later years is a new monetary system and an entirely new method of governmental ruling. This combines the United States with two other countries.

Oil will be found in Georgia in the near future; several locations.

Look for racial trouble in Southern cities. New groups will flare up. A terrorist group with no known base will destroy many large buildings. I get Chicago and New York here, and explosives.

Germany will lead the way in automobile sales and production. Used cars will hold good value here in the United States with the sales of larger cars up some.

Hoarding of firearms will be one of our major crimes; guns will be smuggled in from Italy and other foreign countries. Arson for insurance will hit factories and stores. I see insurance company representatives with criminal connections associated with this.

An injury shows for President Ford's youngest son.

Some of the older stars will make comebacks, filming several good movies. Doris Day will star in a television series.

Some danger surrounds Carol Burnett's family. This could involve kidnapping.

Another marriage for Rona Barrett, continued success and popularity.

The death of two older western stars, an older band leader, and two of our greatest comedians will come in 1976.

Elizabeth Taylor moves into a new cycle around March of

1976. Here I see changes that revolve around her personal life. This includes Richard Burton.

The young will perceive the true way, their elders will follow. Crutches of alcohol and drugs will be put aside as people seek a new high, a new way of life. Prayer and meditation will be a new part of daily living. People will know what they are is their true gift to God. He needs not sacrifices, offerings, or meaningless words. The world conceives and erases the mist of thousands of tears. A heartbeat of prayer, it heralds a new birth, a new age. I go in peace, know love.

CHAPTER 16

ANN FISHER

Albany Psychic

Psychic Ann Fisher (75 Willett Street, Albany, New York 12210) has appeared frequently on TV and radio while on tour in the US. In 1974 on Halloween she conducted a Houdini seance at the Houdini Museum in Canada. Witnesses agreed she had successfully contacted Houdini's spirit when she repeated three statements only known to Houdini.

Miss Fisher holds a B.A. in psychology from Hartwick College, Oneonta, New York. She had been a teacher in parapsychology at Russell Sage College, Albany, New York, and Schenectady Community College, Schenectady, New York.

Ann accidentally discovered her psychic ability while attending a Spiritualist service in 1965. A medium picked Ann out of the audience and told her of this ability. Medium Alice Hughes, who worked with Arthur Ford, was able to show Ann how to control her psychic ability. On the day she was discovered, Ann said: My third eye opened. I can really see."

Ann's forecasts for 1976 are:

Scientists and government officials will admit that UFOs exist. They are from other planets. Some space people are here already. They come from civilizations more advanced than our own.

We hit the bottom of the recession in summer of 1975. Early fall, 1975, will show a steady rise in the economy. I do not see a Depression. 1976 will be a good year. The next two years will have a good healthy economy pattern. We hit a new high by 1978.

Look for a good healthy upward revival of stocks. I feel stocks in the areas of construction, housing, chemicals, machinery, spending services and recreational lines will be the ones to rise fast.

I see a new drug coming out that will slow the aging process. The life expectancy at the end of this century will be close to 100.

There will be a new cancer cure that will be endorsed by the AMA.

I do not see any serious food shortages in this country. We will see an increase in farm production. Prices will be high for meat, poultry, and dairy products, but the supply is good. There will be a major economic confrontation between the Arab states and the United States. This will result in a lower price on Arab oil.

Governor George Wallace will be the spoiler.

President Gerald Ford will not run in 1976. The Republican nominee will be Nelson Rockefeller. He will be defeated by Ted Kennedy, Democrat, in a close race. Ted Kennedy's election will help the economy and the nation. We will become more popular abroad.

The American political system will receive a major jolt in disclosures of CIA surveillance. The President will be removed from all intelligence-gathering information.

The Secretary of State will no longer be the only voice to the President.

John Wayne: I see black aura. Bad news ahead.

Bob Hope: I see him still active and healthy.

Ann-Margret: It is all onward and upward for her in all stages of her career.

Ted Kennedy: Our next President.

Grace Kelly and Sophia Loren are not getting divorces.

Johnny Carson: Could be a divorce ahead in two years.

Mike Douglas: Will have his show another year.

Merv Griffin: He will expand his TV holdings.

John Glenn: Success in higher political aspirations.

Jackie Onassis: She'll marry within two years to an American whom she has been seeing. She needs love and companionship.

I see lower interest rates in 1976.

1976 seems to be a good year for most people and for our nation.

CHAPTER 17

REVEREND BENNIE GARRISON

Psychic Magician

Reverend Bennie Garrison (P. O. Box 675, Marion, Indiana 46952) has been in psychic work for more than three years. He reports. "I am a magi, or magician, and I have performed a considerable amount of magic. I was jumping and swinging on an iron bar one day when I was about twelve years old. Something snapped in my head that afternoon and left me in the astral. My body was separated from me for several minutes until I merged with it again."

Following this incident, Reverend Garrison said he became aware of latent psychic powers. "However, I never did anything with them until just the past few years," he stated. "Recently I have studied witchcraft and other related subjects. I embarked on a program of mental discipline and mind control that works most of the time. I do mail-order readings today and my clients continue to consult me, so I must be helping them."

After his forecasts and biography appeared in *Predictions for 1975*, Reverend Garrison received several hundred letters. "Everyone wanted to know what a psychic magician is," he reported. "First, I am psychic. Second, I also use magick. *Magick* is a term applied to universal laws and forces. This has nothing to do with common stage magic. Magick works in the spiritual areas. I use magick to help people with problems when all else has failed. Last year I helped nineteen people who were planning to commit suicide."

Reverend Garrison is a member of the American Society of Spiritual Healers and Counselors and the Midwestern Institute of Parapsychology. Some of his forecasts for this year are:

I see the United States firing a missile by mistake at another country. I see a missile being fired back at the United States. I see blackness for the United States this year. There will be much turmoil because of many mistakes between France and this country. The Bicentennial will help heal many wounds; however, some will use this celebration to pro-

mote riots. The Castro-controlled government will behave in an ungrateful manner, but will align itself with this country very soon. The United States is going to be greatly influenced by England this year.

There will be 16,000 dead in an earthquake.

Energy will be short again this year. Many homes will be without heat. Some individuals will begin building their own solar heating systems, because industries will have failed to start mass production, although a demand for solar heating is very high. Many people will have their electricity turned off this year and run lights off a 12-volt car battery, charging them in their car as a second battery. There will also be home construction of wind generators to charge these batteries.

I see much fire around New York this year. A black man is involved in this.

People will be watching the sky and be awed at what they see this year.

The words that we will see in the news this year are *failsafe, fallout, danger.*

We will have no leadership for a long time to come. Conditions will not permit a real leader to emerge. I see more and more demands for unity and a world government that will work.

Bob Hope will be in blackness.

Nixon will be active in politics again soon.

A very large UFO will be seen this year by many. This will be in the news.

The Statue of Liberty will have a broken right hand for the people of this country. I feel this will have much to do with welfare and help for the needy.

A man will emerge that will have a solution for the world's ills. He will be rejected by those with little insight.

Silver will be released by the government which will lower the price for awhile. Brass and copper will go up in the years ahead.

Inflation will get worse as time goes on. In the years ahead, we will have solved the energy problem. We will have leadership in the distant future.

Many cures will come in medicine, but no real cure for cancer will ever come. We will start working on the cause of cancer, rather than the cure.

CHAPTER 18

DR. GIL E. GILLY

Psychologist and Psychic

Dr. Gil E. Gilly (P.O. Box 14827, Phoenix, Arizona) is well-known as an entertaining lecturer, psychic adviser, and talented industrial psychologist. Known professionally as "Mr. ESP," Dr. Gilly offers a consulting service to business firms. "After I have worked with a client a few times, they frequently become interested in my psychic consultation," he revealed. "I try to give my clients—whether they are people seeking to expand the psychic dimensions of their mind, or a large firm—the same degree of personal attention."

Dr. Gilly also teaches classes in psychic development. "I utilize the Freudian concept of teaching combined with the Jungian psychic methods," he explained. "We're currently continuing our research with computers to determine the exact ways in which our minds work. Our workshop classes meet once weekly and the group usually runs from fifty to seventy-five persons. I have also been offering an intensified course in ESP in other cities, a 4-day seminar that will double the average person's ESP ability."

Dr. Gilly answers all letters sent by readers of this book. He notes that some of his previous predictions have been "hits": "I hit the Dr. thing, where the abortionist was charged with murder. Other readers have written that there have been 'hits' throughout their area on things I've said . . . a suicide in the White House, etc." Dr. Gilly's forecasts for the coming year follow.

Man is less than one minute from eternity, the eternity of when you live you live and when you die you live also.

Ten seconds that a heart may stop can cause brain damage. This is the same for all races, all animal life, all mankind.

The most pathetic thing I see in the future is man's continual inhumanity to man.

I predict the world's greatest upturn in religion, all based on faith healing.

1976 will become known as the year of the evangelist. Laying on of hands will be the number-one religion of the

world. This will change the world as we know it today. A huge religious crusade of 1977 will give the biggest death blow to Communism that we've ever seen. Metaphysics will come into a whole new realm after this time.

I believe that out of Europe somewhere there'll be a new ingenious invention that will replace life rafts. It will actually permit people to walk on water, something that straps onto your legs and allows you to walk on water, swim or whatever. This will be sun-powered.

I see a new type of plague that will work like a fungus, from a flea, due to man's lack of ecological sense. This will be followed by another deadly plague that will work on lungs, another type of fungus. This will sweep China, the USSR, and Europe.

The mammoth economic growth we've witnessed by Japan is going to be surpassed by a physical growth, not in numbers but in size and stature. This will be shown to be caused by the atomic pollution of the waters and food they eat.

A very fabulous nation will revive. Armenia in 1976 will be the originator and propagator of a world banking currency and this can replace and save the shrinking dollar and save the economy.

This is the year that will start the earthquake years that have been predicted for many years. There will be six earthquakes in California, each progressing toward the biggest one, to be there in 1980. Tidal waves, monsoons, and earthquakes will hit the entire world. This will be caused by an outer space crash in the middle of one of the oceans.

I predict that we are in the beginning of another ice age. The temperature has already lowered 2 degrees from the past, and when this reaches 10 degrees we'll have ice everywhere that won't quit, but will keep growing and growing until finally it engulfs the world in another ice age. This will be another cause of the mammoth food shortage.

I predict the Pope will pass away this year unexpectedly. I predict that the new Pope will come from Portugal.

I foresee a discovery this year of an Amazonian tribe of beautiful people. They have outlawed any rights a man could have. The Amazonian women have usurped all powers of men. Men there are regarded as three steps lower than the dogs that run in the streets of their village.

We're also going to hear about riots in Russia; student riots, rebelling against their masters. The way we treated our

students will be child's play compared to how they will be treated. It will be another death blow against the Communists as far as the world is concerned.

The unhappy political-religious situation of Ireland is going to have a massive direct change, this year. This will have something to do with the faith-healing and revival I earlier talked about.

I predict tbis year is going to be one of the highest in peaks and valleys in history. Unemployment will reach 15 per cent this year. The gas rationing that we've all feared is coming about this year. This is the beginning of the end, culminating in 1979. The worst crash we've ever seen will be forthcoming. Store food and water that will keep for a long time, in order to help yourself through these bad years.

I predict that Zaire will be running a battle to can and sell human meat.

I predict that in 1976 cars are going to be improved. They have to be. Economy and ecology demand it. We need better mileage, more power, less ohms. A tire improvement is also coming. There will be a tire invented that you can drive on for more than fifty miles even after it goes flat. A lubricant exuding from it will prevent it from burning up. By 1977 autos will be produced without a spare tire, because they won't be needed. Firestone will be the first company to bring this tire out.

A lot of progress next year in the field of education, journalism, and publishing will be seen.

Right here in Phoenix 90 per cent of all refuse is being used intelligently. Paper and other products are recycled into all kinds of usable items. This pattern will be followed by the entire world before too long. The most necessary business of the century will be the reclamation business, starting right here in Phoenix, predicted by yours truly many years ago.

In Louisiana this year there are places using 5¢ telephone calls. The telephone company is a profitable company everywhere. I predict more litigation and legal battles in the telephone company than any other company in the world. Look out, Ma Bell.

Corruption in stock market and banking institutions coupled with government will be unveiled.

A big sex scandal will be revealed in government.

This will be the year of fourteen big bank failures. This will have far-reaching consequences, resulting in printing of

new money, runaway inflation, and a major economic depression.

Extreme weather conditions are going to result in more crop failures; the wheat belt, corn belt, cotton belt, even vegetable crops will fail.

Prostitution and businesses such as pornographic magazines, X-rated films, topless-bottomless entertainment will be rampant.

I don't expect to see any UFOs this year. This is the year there'll be a dramatic lack of UFO sightings.

I believe Ford is going to run for President with Rockefeller as his running mate. I don't see him winning, but if he should he'll step down afterwards and Rockefeller will run the country. You know who I see winning? Wallace. Not that I want him to, but that's who I see winning.

The stock market is at an all-time high now, but it will hit a lot of valleys that will be lower than ever.

Ex-President Nixon will be back in the White House, not as President, but there's a job there for him yet to do.

Congress and the President will be juggling the two most vital problems they have: rails and energy.

I predicted last year we'd be up to a 10¢ stamp, then 13¢, then 15¢. And that's going to happen this year. Fifteen-cent stamps to send a first-class letter. Private industry has to take over the mails for it to be a success.

Gas prices will continue to rise. The Arabs are talking of higher prices for oil. We must conserve our fuel.

Fifty years ago Theodore Roosevelt said if we didn't abolish the income tax in fifty years we'd be a police state. This is the year business is going to holler—small business, large business, all business.

A lot of Atlantic and Pacific oil drilling will take place this year. They'll find oil if it's there at all. New methods of energy will be forthcoming.

There'll be broke cities and broke states this year. Lotteries will be the answer to saving these cities, so they feel.

I see more people using the metric system, but I don't feel Congress will ever pass a law making it essential.

The post office will be using electric postal cars, in the interest of ecology and energy. This will begin in California this year.

This is the year of vacations. Go to the national parks this year. Next year it will be too expensive.

Auto rental business will improve. Auto business itself will be off. There will be a used-car boom.

Electronic banking and the beginnings of a checkless society have been already instituted.

Steel prices will be hiked again this year.

The next presidential election after this one will result in a woman Vice-President. I predict within fifteen years half the people serving on the Supreme Court will be women.

Men and women will both have Grecian-looking haircuts next year, combed forward and with ringlets around their foreheads.

Fashions will be what we've dreamed about for years—dresses up to the thigh and made of a transparent, shimmery fabric.

Six per cent of the old people will be stricken with a new disease this year. It'll be diagnosed with the name methothyleoma. It will be a wrong diagnosis as it was last year.

It won't be long before we have socialized medicine. It'll be like having a medical cafeteria where you can get any kind of treatment needed by man. We will even diagnose our own illnesses into a tape recorder.

New federal laws will be passed prohibiting hitchhiking.

We'll have more blackouts this summer.

Credit will no longer be tolerated by gasoline stations. They don't need it for business. They sell all the gasoline they want, and for cash.

The telephone company will find out that printing the telephone book will be more expensive than maintaining an information center.

Patty Hearst will be captured and granted probation after all this trial is over. They're going to reveal it was drug induced dependency, brainwashing.

Kissinger will resign this year.

Gold will go lower, down to $114 an ounce.

It will be discovered that auto pollution is what is causing metal poisoning, that undiagnosed feeling of blahs, due to inhaling and breathing the pollutants of metal.

There'll be a new way of diagnosing breast cancer with infrared photography that can be used at home.

I look for a national strike in France, affecting everyone in Europe.

A tax cut is going to worsen inflation in one year. This is the year we'll hear about it.

I predict that cows will be artificially inseminated, and then the embryo will be transferred to a rabbit for maturation, enabling a low-quality cow to give birth to a high-quality calf thousands of miles away.

There'll be a new kidney-stone-dissolving pill.

A new herb will be discovered to be a fabulous cure for arthritis. This was touted 800 years ago as a cure-all, but all it gave was a stomachache. But it will work on arthritis miraculously.

Reagan will have a health problem, a blood or kidney problem, this summer.

At the end of May we'll hear of John Wayne. He's going to be close to death.

Racquel Welch will be in the news. They'll run a look-alike contest for her. They'll find seven exact look-alikes for her.

Thirty-five per cent of the United States' population will be suffering from hypoglycemia. And the cure is so simple. Hypoglycemia will be proved to be caused by the lack of a trace mineral.

There'll be a new artificial elbow joint developed, ending all the painful elbow-joint diseases.

A cure for ulcers is being researched, a natural ingredient that does work.

There'll be a huge influx of policewomen in the police forces. They work cheaper and they're better.

I predict a strike by firemen over the high cost of insurance.

Cryotherapy is going to make real strides in medicine this year, being used to correct heart defects even in small babies. This will work on the theory that metabolism slows down when the body is cooled, reducing the oxygen requirement to allow surgery to be done safely.

This year the United States will be growing opium, sanctioned by Congress, as America faces a serious shortage of codeine and morphine, the principal pain-relieving derivatives of opium.

Both borders will discover a new trick used by drug smugglers—concealing narcotics inside of live snakes.

A new service called Telecheck will be instituted whereby elderly and ill people will have daily contact with someone. If no contact is made by the person, Telecheck will call. If no answer is received, an investigation will be forthcoming immediately. This will be a valuable service to humanity.

Fifty skydivers jumping from a plane over 1500 feet high will join hands in a circle on the way down, somewhere over Arizona or California.

A battery-powered bicycle will be manufactured this year, called the electrocycle.

I predicted there'd be a white marigold discovered last year. Now it's happened. Next will be a checkerboard marigold.

Boston will be a police town.

It'll be discovered there is a tropical fish that can be crushed and eaten that will improve heart disease.

I believe a Japanese-made glue will be used in a lot of surgeries to repair lacerations, aneurysms, and skull fractures.

It will be discovered that "airline brats" (children of airline owners) are flying coast to coast and country to country, merely to see movies.

It will be discovered this year that amphetamines are the cause of Hodgkins Disease.

Italy will build a huge memorial to Mussolini.

Plastic bags, see-through plastic bags, will be big in grocery stores soon.

A ghost will be seen haunting Sunset and Hollywood Boulevard—Marilyn Monroe!

A small radioactive tracer in the blood will detect pregnancy before the first period is missed. It will also distinguish between a normal and ectopic or tubal pregnancy.

A new cure for colds will be sprayed in the nostrils and into the throat. This will cure staph, strep, and viruses.

A Hawaiian plant called the aloe vera is a sure cure for baldness.

A famous Southern senator will expire this year from cancer.

It will be discovered that it isn't the nicotine or tars in cigarettes that causes cancer, but the radioactive dust in tobacco and the paper.

Bicycle tires that glow in the dark will be invented for safety purposes.

Someone is going to try a brain transplant.

This year all military services will accept osteopaths on an equal basis with M.D.s.

It will be discovered that people who own warm, loving dogs have less mental illnesses than people who don't.

In 1977 the federal government will be going into the insurance business, issuing a new type of insurance policy.

A fish flour will be marketed, made from fish heads, tails and entrails, that will be a great source of good protein.

The only instrument I've never seen used in hard-rock groups is the harp. I predict there'll be a new rock group on the scene this year that will feature the harp.

I predict there'll be metal bars placed on bank tellers' shoes which, when clicked together, will trigger an alarm system to the police station, foiling the many bank robberies taking place, especially in New York.

I predict there'll be a beauty contest in retirement villages for contestants over sixty, and it will draw worldwide attention.

By using corrective contact lenses correcting the curvature of the eye, people with poor eyesight can be cured.

I predict that Dinah Shore will have her recipes manufactured and distributed on the frozen food market.

Milton Berle will be coming back to TV.

A new TV series will be about backstage problems of actors.

It will be discovered that 50 per cent of childhood diseases can be traced to iron deficiencies in the child and in the mother.

Dentists all over the world are going to start checking blood pressure before they begin doing anything else.

College lecture circuits will be the hot spots for entertainers, comedians, and psychics.

There will be pirates around the Florida Keys this year.

Lead coins coated with gold are going to flood the market. Watch out when you buy silver or gold; check its authenticity.

I believe that soon women all over the United States will be putting on a test brassiere a few days every year to detect cancer by accentuating any hot spots.

There'll be a new viewing device that can look anywhere inside the body, even into the lower brain centers.

A new energy is being developed that will lead later on to gas wars and gasoline's eventually being on the way out.

It will be discovered that the assassination of Martin Luther King was a conspiracy.

Three very popular people in the next year will be moving

out of the country: one to Mexico, one to Iceland, and one to Brazil.

This year one of the states will legalize gambling.

I believe it will be revealed shortly before he quits that Henry Kissinger has several Swiss bank accounts running into millions of dollars.

Before the end of 1976 there'll be a changeover of leadership in the USSR.

CHAPTER 19

TENNY HALE

The Oregon Oracle

Tenny Hale (P.O. Box 125, Beaverton, Oregon 97005) is that state's foremost parapsychologist, psychic, and astrologer. She is also the president of Lazuli Productions, which publishes books and directs the activities of two healers, a graphoanalyst, a spiritualist medium, two tarot card readers, and Tenny's own psychic activities.

She is also president of the Tenny Hale Psychic Research Association, which has published research on kirlian photography, pyramid power, biorhythm, and medical astrology.

"Although I do astrology and lecture, I do not make predictions from it," Tenny reported. "To make predictions I fast and go into seclusion; this may take up to three days. Sometimes I do it longer if needed. I don't see visions, hear voices, see symbols, use photographs, or do psychometry. I can't read for a person if I see or talk to him. I would just simply pick up from his unconscious mind. I prefer not to know anything about the person or the situation."

How does she make forecasts?

"I just remember, nothing more," she explained. "I work differently than anyone I've heard about. And it's exhausting work. Eighteen hours a day. I also find that if I get into something else I have to literally almost 'go into training' to get prophesy out again."

One of her most dramatic predictions concerned the Watergate scandal. She made the forecast forty years ago. It was printed in a book two years before the burglary that led to the resignation of Richard M. Nixon.

Not only did she name the event, but she accurately forecast the name of the building and apartment complex in poetry as a young girl.

"I didn't understand the forecast when it came to me as a child," Tenny admitted. "I always felt it was an important event for the nation, so I included the poem in the book."

The book, *The Seventh Panel,* was published by Tenny's own firm and is available directly from her. The poem reads:

The Capital land, the water, the gate,
The East;
Where the feared and the famous gather
To feast;
This place no mortal designs
Many will lease.
The machine. The machine.
Becomes—a beast.

The unusual poem had no meaning in 1933. It really didn't make much sense when it was published a year before Watergate. "Now that the facts of the scandal are out in the open, the prediction is remarkably accurate," wrote editor Tom Valentine of *The National Tattler.* "The reference that this is a place that 'no mortal designs' is truly remarkable, because Watergate was designed by a computer."

Tenny Hale's forecasts for the coming year are:

Antitrust laws will be changed in the next twenty-four months to allow foreign control of United States companies and corporations; the law forbidding foreign ownership of more than 25 per cent of US corporations will be altered.

The USA will be in conflict with Mexico.

Alger Hiss will be allowed practice, or limited practice, of law again.

The USA will be in conflict with Russia in which Russia will not use conventional hardware.

A stunning surprise in the John Erlichman defense.

One or more of the Haldeman, Mitchell, Erlichman trio will be given a pardon or some sort of clemency. This may be a Supreme Court ruling.

Within eighteen months there will not be enough food in USA to feed pets properly.

Interest in land in the coming months will be everywhere except California, Colorado, or Florida.

Schools will be part-tuition within two years.

Look for some information to come out, possibly from H. R. Haldeman, regarding Nixon and the use of systems we call magic or occult.

Nelson Rockefeller will become President one way or another and possibly not in a way any of us will like.

CIA involvement will be established, or known, in deaths of both the Kennedys, Martin Luther King, and Medgar Evers.

Oregon will become the center of the greatest spiritual renaissance we have ever known.

There will be new sadness involving Jackie Kennedy Onassis. This is due to despondency on her part.

Jane Fonda will become beloved by Americans: They will see her in a new light.

Loss for John Wayne.

Professional change for Johnny Carson.

Norman Mailer's personal life hits the news again.

Acupuncture will be legalized out of the medical profession's hands.

Change in the postal rates: Look for a surprise here. Some things will go down.

Fires will sweep the country. These will be both arson and accidental fires, both in cities and in the country.

Relations between the USA and Iran will shift.

UFO rumors and sightings will increase but there will be no people or life forms found or communicated with in 1976.

What can we expect from inflation and economy? The worst. The market will continue to lose and inflation will continue to climb. There will be no recovery of the economy in the next two years.

Yes, we are in for the worst Depression we have ever had.

The trend in weather on the planet? Worse than last year. The country will continue to have unseasonal and unusual weather which will ruin food crops, destroy property, and cause deaths.

Pollution, more big business fraud, and theft will reach epidemic proportions.

Bankruptcies in colleges will spurt.

Liberal Protestant denominations will lose out to fundamentalist groups, especially as our government semi-officially backs the fundamentalists, even though this is against the Constitution.

Kissinger is revealed to be less than aboveboard.

Many deaths, more than usual due to freezing because of lack of heat during the next two winters.

Change in Elizabeth Taylor's marital status.

What is in store for the American political system? The two-party system will prevail but a little longer. Either Ford or the next President will suspend elections due to some crisis.

United States corporations will publicly use psychics.

Fine developments in molecular biology: especially in cancer, diabetes, and multiple sclerosis.

Rona Barrett will be involved in some psychic activity.

Curfews will be more abundant during the winter energy crisis.

It will be found that many of the "Watergate figures" are still in government, still at the same jobs, more or less.

Ronald Reagan's plans and hopes will be dashed or limited.

Fashions: Men become more conservative in dress and hair and women lower their skirts but still feature pants suits as at present.

CHAPTER 20

MR. HARMONY

The Psychic Artist

"Mr. Harmony" is the pseudonym of a psychically talented young man who has verified his precognitive abilities in recent years. Readers who wish to correspond with this new member of our psychic panel may do so by writing to "Mr. Harmony," P. O. Box 897, Clinton, Iowa 52732. Letters will be forwarded to him.

As an introduction, Mr. Harmony writes:

"I was born in northern New York with the postwar baby boom. I had a conventional upbringing and public schooling—graduating as an honors student with majors in French and art. I studied instrumental music for many years and competed in statewide competitions. I also won honors in several state and national art shows while in high school. Later I attended professional art school in New York City, graduating with a B.F.A. with a major in fine arts and a minor in art history. While at art school I studied all phases of creative work: music, sculpture, film, dance composition, graphic design, printmaking, drawing, painting, photography, and videotape. After receiving my degree I did some freelance artwork and copywriting.

"Since graduation I have worked as a therapist with the multiple-handicapped and have assisted with art therapy programs for the mentally ill.

"I began the study of psychology in 1966. Interest and work in parapsychology continued through years of residence in New York. I also studied hatha yoga with various teachers while in college.

"Accelerated study of metaphysics began in 1970 and has continued. Further study has led to greater use of clairvoyant faculties.

"My interest is of a comprehensive nature, taking in all areas of human endeavor. My concern has been the use of knowledge for synthesis, bringing viewpoints together to reveal the interrelatedness of all life.

"In my work there has been a practical application of theory and technique as they relate to the creative faculties, and

a study of the methods by which they can be employed in healing.

"It is my belief that clairvoyant ability is part of a larger creative framework which is present in all persons to a greater or lesser degree. It is not paranormal—only our perceptions and our ability to understand these faculties remain limited. With study and self-discipline these creative faculties can be in reach of those willing to make the required effort.

"I have prepared psychic readings for friends and have made accurate family forecasts. Some precognitive impressions: Agnew's nomination for Vice-President, 1968; death of De Gaulle, 1971; Nixon's Maritune/SpaceLab appropriations bill, 1971; hurricane Agnes, 1972; Nixon's exit, 1974; Ford's assumption of power and Rockefeller's confirmation, 1974; CIA/FBI scandals, 1974.

"I believe forecasts can be of value to the reader. Far from being just prophecies of doom, they are harbingers of the great changes that are yet to come. Thus the individual, forewarned, can make decisions about his life, knowing that certain forces will be operating, and can take the required precautions."

Mr. Harmony forecasts:

Paramount are the cosmic or stellar forces that will create a climate for change. These forces can only be reacted to as they affect our planet and its species. Within the control of mankind, however, are the forces which humanity exerts upon itself—these are within the range of man's manipulation. Thus if these human-created conditions be found unsatisfactory by individual conscience and group consensus, they can be changed. Such remains the ideal of democracy.

We are entering in 1976 the midpoint of the 40-year period of change predicted by Edgar Cayce. This period began approximately in 1958. These changes will occur in the Earth—in its electromagnetic field, its degree of inclination on the axis, and in the tectonic plates beneath the continents. There is also the interaction with these changes that will occur in mankind worldwide as people react to these stellar and Earth stresses.

It has already been predicted that the constellations are moving into a configuration approximating the same relative position as that during the breakup of Atlantis. Progress in human evolution must be allowed for, however. Humanity has developed organizations and methods of response that

can exert an influence as to the kind and degree of humanity's reaction to stress. Adjustments to changing world conditions then can be managed without bloodshed if there is the motivation and the desire for peaceful change more than anything else.

There is much to be deduced from the astrological standpoint as to the kind and degree of change that will occur. Little understood, but crucial to our advancement, is the study of comets: those known and those as yet unknown.

Great change is a challenge to each and every individual. Self-reliance and social responsibility will be qualities to be cultivated. In spite of shortages, there will remain many arenas to develop through creativity. In creative work, there will be achievements that will be inspiring to all.

These forces are a stress agent, understood by engineers and physicians. When the threshold of tolerance is passed, reaction will occur. Human organizations are vulnerable to this stress; so is our planet. Systems will break down; communications, businesses, political structures, educational and art institutions, economic, and religious organizations. Ultraconservatism and laissez faire attitudes will increase.

Former methods of problem-solving and old systems will be found inadequate. Conversely, other human systems now in their infancy will be stimulated for growth and expansion. The first phase of change will be seen as destructive, the second as constructive, as old systems are swept away before the new order can begin. New methods and new systems will be devised to suit the changed order.

General forecasts: There will be more of everything—political strife, drought, storms, economic distress, and famine. A system of priorities will be put into effect.

Politics: Expect the two-party system to change. Voter apathy may allow a "dark horse" candidate to unseat the incumbent. Reagan and Wallace will be a strong challenge to Ford. President Ford will have difficulty convincing voters that he is sensitive to their needs. The empathy shown by Wallace then would garner many votes.

Senators Jackson and Bentsen will be major figures in the Democratic party. Expect swift changes during the convention. In California, keep Governor Brown in mind as a Presidential nomination, possibly by 1980.

Nixon will continue to cast a curious pall on the Republican party and events in general.

Watergate: Expect further revelations—incredibly, from Nixon himself. Watch for a book that will chronicle the mysterious deaths of key witnesses in the Watergate affair. This will refer to other mysterious deaths of witnesses in the JFK, RFK, and Martin Luther King assassinations.

Francis Gary Powers, the U-2 pilot, will gain national recognition with a film biography and renewed interest in his book, *Operation Overflight*. Powers has surmised a link between Lee Harvey Oswald's defection to Russia and his U-2 crash several months later. This will bear investigation.

Secretary Kissinger will be in office as long as Ford is President. Expect great difficulty with Congressional investigations. A change is possible by October. Will Kissinger resign with honor?

I see a challenge to President Ford's health. It seems to be quite sudden.

Vice-President Rockefeller is a person to be reckoned with. He will take on many duties and new responsibilities. He'll take several trips during the year.

National Affairs: Throughout 1976 it will be apparent that our federal government cannot or will not respond quickly to urgent problems such as unemploment, inflation, and crime. In spite of a world Depression, work will be available in many fields: aerospace, maritime, medicine, pharmaceuticals, mining for energy, industrial and farming needs.

Earth Changes: There will not be a breakup of the land mass in California. There will be several strong earthquakes near Oakland and Los Angeles. These strong shocks will cause property damage and serve as warnings of greater changes to come. Elsewhere, there will be quakes in Japan, the Mideast, South America, and northern China. There will be more respect for the Japanese methods of earthquake forecasting. Also bird and animal life will be studied since they are sensitive to the minute electromagnetic changes that occur in advance of earthquakes. They're nature's early warning system; watching their movements could save lives. Other earthquakes will be felt in the continental US. These will be in the Midwest and Northeast (in a line running from Boston to Montreal). These Earth changes can be related to the lunar phases since the moon's pull will add stress over existing fault lines.

UFO: There will be several contactee events in the Midwest and the Far West. It will be deduced that some of

these do not manipulate a physical spaceship but are projections of consciousness from other systems and other galaxies. In a larger sense, some of these can be thought of as from our future. Time is not perceived by them but acts as a conditioner in our system (as gravity acts as a weight). Several people will be given instructions by UFOs. Some UFOs are less evolved and do manipulate a physical spaceship. These come from nearby star systems and their motives are more sinister. Watch for several flaps near US military bases—and there will be related military plane crashes that will be concealed.

Bermuda Triangle: Several planes and small boats will be lost in this area. Also several ships will be lost in the Devil's Triangle near the Sea of Japan.

Atlantis: As Earth changes accelerate, look for the rising of the ocean floor off Bimini. There will be the discovery of architectural remnants from Atlantis. Prior to the breakup of Atlantis, the Keepers of Knowledge sent out time capsules to other continents to preserve the history of human evolution. These records were hidden in temples until humanity needs the accumulated knowledge. I do not feel that the Sacred Seals guarding these records will be broken in 1976. Tablets already known refer to them. Mayan and Aztec relics contain the key. Investigation of their myths will reveal a sequence of events that we are only now beginning to comprehend.

Medicine: There will be a curious interchange between homeopathic and orthodox medical application. This will be highly beneficial to the patient. Extrasensory diagnosis and aura analysis will be areas of esoteric study to advance medicine. Music and art will be used extensively with psychiatric patients. Music can indeed "soothe the savage beast" and has great healing potential—especially classical music composed from the harmonic scale. Gemstones and minerals will be used in healing: this has to do with the vibration of the crystalline structure and the properties of energy transference.

It will be found that the atomic number is a coefficient as to function, as in zinc and its requirement in body tissues for health. More attention will be paid to the trace elements. Natural Earth remedies, or herbals, will be under much study. They will be found useful when synthetic drugs fail; there will be a return to the source—as in using quinine for malaria.

The black plague, cholera, typhus, and smallpox will make a return.

Several diseases originating near the equatorial belt will defy all known methods of cure.

There will be great interest in research on vitamin B-17, vitamin K, and vitamin P-4.

Cancer research will gain in the "whole body" approach to healing.

Meditation will replace chemotherapy for several ailments: hypertension, anxiety, ulcers, and migraine.

Much valuable research will be carried on at the McGarey clinic of the A.R.E. in Phoenix, Arizona.

Farming: A direct system of priorities must be effected if we feed ourselves in the near future. Millions of acres of farmland will be lost to strip mining, highways, and suburban sprawl. Several Congressional leaders will strive for a national land use plan. In view of the sweeping worldwide changes, such a plan is essential for survival.

Climate will again be a negative factor. Look for an association of sunspot activity to crop yield. Storms will inundate the South and cause delayed plantings in the Midwest.

Expect unusual insect plagues: locusts, moths, caterpillars.

Many city people will move to rural areas, upsetting the rural economy. High real estate values will thus make farming less "economic." A high number of young people will begin basic farming in spite of the difficulties.

In Europe, watch for excessive storms in the North Sea in January through March, followed by a hot, dry summer. Southern France, Portugal, Spain, Italy, and Greece will be hurt by these climate factors.

There remain methods to farm in areas of bad climate and poor soil. In Findhorn, the residents contact the elementary forces for their help. Much can be learned there.

1976 will be the year of the storm. These weather conditions are caused by changing jet stream patterns which redistribute hot and cold air over different areas. The jet stream alterations will precede the shift of the Earth's tilt on the axis. True North on the magnetic compass will begin to shift as the electromagnetic pole shifts south. This in turn will precede a minor ice age—probably by the year 2030.

By 1980, earthquakes will be more devastating. Areas of the South will be under water as will the Low Countries of Europe.

The Future of New York: The city will be the precursor for the changes elsewhere. By 1985, large areas of the city will be abandoned. Certain areas such as Wall Street will remain centers of commerce under the protection of a police state. There will be an exodus into inland areas. Many cultural resources and institutions will be lost outright—not by cataclysm but by human neglect. Political systems there will be forces for destabilization, not unification. Bankruptcy of cultural institutions will precede bankruptcies in other areas. The arts will be the first to go.

There will be an outraged public outcry that our government can give millions in aid to enemy nations, but not one cent will be given to New York, the source of great tax revenue. Mass protests will change little in federal policy.

It is tragic that our cultural assets will be lost. They can be a potent force for spiritual growth and expansion. Our artists are our great national treasures. Will we allow government to buy bombs or violins? As Beethoven pleaded for sensibility: "If the world were to understand my music there would be no more wars."

The Arts: There will be advances in music composition and performance. The synthesizer will give a greater range to the composer. It will gain recognition as a concert instrument. Interest in American music will be evoked by our Bicentennial.

Research in music in sensory physiology and synesthesia will gain wider reception. Vibration will be related to body rhythm through study of the "alpha" state. There are medical as well as esthetic applications of this research. The harmonic scale (as well as prismatic color) is a variation of vibration and velocity. These can be interpreted through the seven psychic centers of the human body. Each gland is associated with a distinct harmonic and color vibration. Thus will be deduced the application in healing.

Science: We are near the point when we can no longer expect our technology to correct our errors of excess. Still, much will be learned in these last days. Much of this knowledge exists in the "universal consciousness." It is our heritage from Atlantis and elsewhere. Additional information will come from another dimension perceived as the "Inner Planes." It will come in a flash of great personal illumination. Practical applications will be made in medical technology: in diagnosis, treatment, and surgery. Microscopy and neurological research will discover much about nerve pathways, perception of pain, and transference of information (from the left brain to the right brain and vice versa).

Research in the atomic field theory will bear fruit. Watch for further research of time as it is experienced, felt, and perceived. Time may be considered a fluid: analogous to a solid, liquid, and gas—each being less dense than the preceding form. Movement implies direction—movement plus direction implies velocity—movement plus direction plus velocity influences mass and "weight." Herein is a clue to much. (Time, perception, and UFO activity are related here.) A system of probabilities will be discovered, and will be thought of as "time travel" (incorrectly). Our perceptions will be expanded.

All reactions, both cosmic and mundane, leave a track in space which is a record of reaction to stress. Such tracks in space can be deduced or felt by psychics. Such psychic detective work is to be undertaken only with great care and much preliminary study. An "empathy" with such tracks in space can upset the untrained person by "drawing down" energy to a sympathetic level. This is a small fraction of the multiplicity within our ability of perception.

Education: There will be the opposing forces, with the ultraconservative gaining the upper hand. There will be more sympathy shown for creativity. This includes the psychic abilities which are part of the creative framework. This will gain many students. 1976 will be a year of much changeover for many schools and universities.

Religion: Persecution or inquisition will be in order for those who attempt change in orthodox churches. Such ultraconservatism will cause much suffering. Scandals will also be in evidence: tax-exempt holdings in real estate, housing, and nursing homes.

Personalities: During the year of 1976 a great many well-known people will leave the Earth plane. The increasing number of those deaths will cause more wonderment than the death transition itself.

Disasters: Each geographic area of people will seek solutions in its own way. While New York may seek political survival, other cities will attract outright physical destruction. A major midwestern city—either Detroit or Chicago—remains vulnerable to an atomic attack. International treaties made during this period (1972 on) will be proven worthless. Red

China is a source of treachery if we fail to interpret the symbols to our advantage.

Astrology: A study of siderial astrology and planetary astrology will repay the effort. Consider the transiting planets and the procession of the equinoxes. A study of sunspot activity and of comets will bear correlation with human behavior. Planetary conjunctions will influence earthquake activity. It will be seen that Earth changes can be worked out in advance by charting the equinoctal, lunar, and transiting planet positions, then working out the Houses of Aspect. The Sun and, to a lesser degree, Venus and Mercury will have a harmonizing effect. Extragalactic forces, exerting some influence, can barely be interpreted. These are quasars, black holes, and pulsars. Mathematics and computers will be useful tools to graph and interpret this astrophysical data.

Social Affairs: For the city and suburban dwellers more drastic changes are in order. A survival kit containing food and water for two weeks would be an excellent precaution. The US in all its difficulties will be far better off than the Third World countries. The US will be asked (coerced) to subsidize all the starving nations. Obviously, the moral/legal/karmic responsibilities will be tangled.

Above the turmoil of the planet and its people are the "Archangelic Guides" which have been caring for Earth since its beginnings. It will take time and great effort even for these exalted beings to bring balance and equilibrium to our sphere. They remain much concerned with our plight and condition and remain as a potent force for understanding and spiritual expansion. Though little can be said of them here, they have guided humanity through many stages of difficult evolution. Our further advancement depends on the exercise of our free will and our acceptance of our increasing responsibilities: we must strive for unification and integration in all human activity.

CHAPTER 21

LARRY HEADRICK

Psychic Pioneer

Another new member of our psychic panel, Larry Headrick, traveled extensively throughout the world during his career in military service. Although he was forced to retire because of an injury, Headrick managed to obtain a college education and teach for two years before giving in to his handicap.

"Since 1972 I've had to use my mind," Larry explained. "I began to toy around with mental telepathy in college. When I did a serious study of hypnosis, I realized that psychic ability is the result of an altered state of consciousness. This can be produced by hypnosis. After I resigned from teaching due to my old injury, I turned my full-time attention to the study of parapsychology."

Unlike psychics who have had awareness since childhood, Larry developed his talents through time and study. And unlike psychics who claim to have a God-endowed gift, Larry has proven—at least to himself—that study, practice, and strong belief are all that's needed to be psychic.

"Being psychic means more to me than just seeing the future through a cloud," he reported.

Larry feels that a study of parapsychology provides the student with a better understanding of himself and his fellow man. He is interested in anything that helps to gain insight into the existence of humanity. Currently, he is investigating two cases of missing people through ESP. He has been accurate in forecasts about the assassination of Robert Kennedy and other world predictions.

Larry donates his time acting as a counselor in many areas of the occult. He also provides psychic counseling upon request. "All I ask is that people include postage and a stamped, self-addressed envelope for a reply to any questions that they may have," he emphasized. Readers may write to Larry at P. O. Box 683, Spearfish, South Dakota. His forecasts are:

In 1976 the American public will become aware of many areas in the economy where they have been duped into think-

ing shortages where no shortages exists. Prices will fluctuate greatly and by 1977 many items of high price will remain in the inventory, untouched by the customer. Many goods with an age date will have to be discarded for spoilage.

Handyman methods will replace the expensive service calls for repairs on many home appliances and even automobiles. Repair and replacement will become greatly simplified in the coming five years. The trend has already begun in the auto industry.

Money problems will multiply for the world, and the easing of the economic problems in 1975 will be a calm just before the storm that will come in mid-'76. Fortunately, this trend will be short-lived. During the crisis there will be a staggering increase in the petty crime rate throughout the nation, but four of the ten largest cities will suffer most. Chicago is the fourth least affected by the problem.

Henry Kissinger will suffer ill health or accident on a flight from California to Hawaii during the fall of the year. I do not see death, just suffering.

The state of Kansas will reveal a revolutionary program in education in the very near future. The program will be mainly designed for elementary education, but grades five through nine will benefit most from it in the first few years.

A black female actress-performer will suffer death from other than natural causes in mid-year, probably June.

Oklahoma will be the scene of a murder attempt connected with a chemical company and a junior executive who bas been secretly falsifying documents. The executive will be accused, if not convicted, of murder in a previous case connected with the same situation. The company is in for some trying times before the condition clears. It will be realized that the superiors of the company have been kept in the dark about existing safety conditions.

Residents of Southern California will again clash with migrant labor. There may be attempts to physically drive the migrants back across the border. This will be the beginning of a clearing of the problem.

A deep dark line running from the coast deep into the state of Washington will cause Earth tremors as far inland as South Dakota. The vision is of a trench that opens up at the water's edge and narrows down to a fine line somewhere near the Idaho state line.

Storms will be the worst for North Carolina's coast in fifty

years. Inland damage will be slight, but the coast will be wiped clean, especially beaches.

Alabama's Governor George Wallace will recover from his present handicap by use of psychic healers and will run for the presidency in 1980. However, he will again suffer at the hands of a would-be assassin and resign from politics in 1983 and become a minister of some new pbilosophy related to his means of recovery.

"Ole Miss" will have its greatest year in sports since its establishment. But a dark cloud hangs over Auburn Alabama's team, involving one player and a coach. This does not appear to be a good year for Auburn in any way.

Many politicians will become more than mildly apathetic toward Republican politics during the latter part of the year. The Watergate influence will be part of the trouble, but a new party formation will finally result from both the apathy and the Republican Party's problems. A young politician will rally for the Democratic Party and soon become a national figurehead in politics, but not as the nation's President. The name sounds like Stoaks and has the letters *"S"* and *"K"* in it.

By 1978 there will be evidence that Richard Nixon was much more a victim of power and circumstances than be was guilty of leading the Watergate fiasco. This news will be heartbreaking for many who persecuted Nixon.

UFOs will be contacted in November. A scientist in the state of Arizona will find that thought attracts the ships and that he can communicate with the passengers aboard by use of tbought alone. The visitors to Planet Earth will not be bone and flesh as we know it, but will be of some less dense matter, if indeed it is matter at all. They will teach man many things, especially about thought and how it can be used to greater benefit.

People who now shun psychic matters for religious reasons will begin to demand to know more about them. This seems to be related to the contact with UFOs. Organizations now involved in making money from teaching ESP will have turned to nonprofit groups or disappear by 1979. Church-connected groups will offer courses and meetings on ESP. Telepathy appears to be the leader in interest at first.

One man who is now looking to discredit ESP will discover instead a connection between ESP and Universal Intelligence.

This discovery will explode many myths about the human mind and bring mankind closer to what we know as God.

The divorce rate, already on the decline in 1975, will take a strong dip in the next three years. There appears to be a 50 to 55 per cent drop by 1978.

Liberal arts will become the direction of college students once again. Specialist training will be on-the-job and in more specialist-oriented training centers.

The world's economic condition through 1975 has already opened avenues for a new route toward esthetic pursuits. Americans will find the year one of switch. They will no longer be willing to fight the tide. Massive and complicated machinery will no longer be sought, but will be avoided. Recreation will return to the simple pleasures of yesteryear, a complete slowdown for people in general.

New employment programs will be initiated in which more people will be permitted to work, but they will have fewer hours. This will provide more employment using the same economy that has been in the seventies thus far. Therefore, materially and economically, the world will turn about in its direction. Away from materials and on toward human development will be the new attitude. Yes, this will take some time, but it will have its roots in 1976-1977.

A new psychology is now in the making and will appear in late 1976. It will deal with much deeper and more profound matters than anyone, except perhaps Carl Jung, has ever dealt with before.

Some new recording device is soon to be revealed. It may seem complicated, but it will be a simple method of recording in a liquid in place of on tape. There will be problems with it at first, but once perfected it will be simpler and easier than any device yet developed.

CHAPTER 22

REVEREND ROBERT E. HILL

Piscean Psychic

The gift of clairvoyance, more recently referred to as extrasensory perception, is one that does not play favorites. Robert Erwin Hill considers himself just an average individual with an average education and an average job, yet he was born with ESP.

For many years Reverend Hill attempted unsuccessfully to ignore his premonitions: visions of tornadoes just before they hit; dreams of death that eventually came true; the faraway whine of a lonely train whistle that continued for days . . . until suddenly two trains collided head-on.

Several years ago, Reverend Hill came to terms with his gift and began to exercise it and sharpen it. He has made numerous successful predictions of the future based on dream revelations and clairvoyant visions. He has just finished his first science fiction novel, *Prisoner of Time*.

One of Reverend Hill's greatest interests at this time is the phenomenon of the Earth's ice ages. As the south pole continues to grow in size and the north pole continues to shrink, the Earth is building up tension that will result in increased volcanic and earthquake action. Eventually the Earth will act like a natural gyroscope to right itself by tilting on its axis, causing the next ice age and dramatic changes of the Earth's surface. Reverend Hill sees the inevitability of the next ice age within the next 300 years.

Readers may contact Reverend Hill by writing to him at Rt. 6, Box 349, Tampa, Florida 33617. His forecasts are:

This will be an unusual year as far as UFOs are concerned. A man, woman and child will be in the news.

News Flash!—An entire family has just returned from a space trip and lived to tell about it.

Look for a marked improvement in the economy.

The weather trend is terrible with more tornadoes. Hurricanes will be in the news. Drought in Africa will get worse.

Teddy Kennedy will be in the news as a potential candidate. An attempt on his life will make him think twice about a draft.

Wallace will change his mind about running for President. Reagan and an unknown will end up in the finals. The Democrats will come up with an unknown and win the presidency.

Congress will make a great effort to change the political system.

People in the News: John Wayne will win an Oscar.

Bob Hope's physical health will be touchy.

Ann-Margret will be very busy all year in some form of acting.

Jane Fonda will make a public apology.

Jackie Onassis will try to make some kind of international oil deal but it will blow up in her face.

President Ford will run for President.

Ronald Reagan will come on strong but will not win the presidency.

Look for an operation of some kind for Ex-President Nixon.

National affairs are going to come to the point of embarrassment. Promises that President Ford makes will be opposed by Congress.

There will be news about Watergate that will incriminate more political figures.

Automobiles will not make a comeback to stimulate the economy as hoped.

Food will be in the news, all bad. There will be talk of sharing with the underprivileged countries but Congress will say "no."

A new invention will revolutionize the space industry.

Good News! New changes in the Olympics will enable more athletes to join the United States team.

I feel a new ship on a shakedown cruise or maiden voyage, of Australian registry, will founder at sea. I saw the Australian ship and Australian troops go to the bottom. I bad the impression that it will cause a lot of international concern, maybe nuclear.

I saw the execution of a cardinal that will cause a lot of world concern.

We are in the midst of a slight polar shift which is affecting our weather pattern, causing earthquakes in strange places.

CHAPTER 23

DAVID HOY

From Skeptic to Seer

David Hoy understands the skepticism that some people direct toward psychics. A former Baptist minister, Hoy was openly antagonistic toward people who claimed paranormal abilities. Then, following a number of dramatic experiences which could not be explained away, Hoy discovered that he had acquired ESP.

Today, Hoy is a popular lecturer. He has gained an enviable reputation as a speaker on the correlation between good salesmanship and ESP. Many of his talks are before executives of major corporations such as General Motors, U.S. Steel, RCA, Bell Telephone, Sealtest, J. I. Case.

Hoy believes that ESP is within everyone and that these talents can be developed. To explain this thesis, he recently made a record album entitled *ESP According to Hoy.* In making predictions, Mr. Hoy utilizes what he terms "time-projected empathy" to gain a glimpse of the future. "I visualize something happening and then I verbalize it," he explained. "It is really an emotional and mental happening that is more like remembering the future. You know something, you have seen something taking place, but you also know that it has not yet happened." Mr. Hoy may be contacted by writing to Box 57, Paducah, Kentucky 42001. His forecasts are:

On the political scene in 1976, Ford will be out; Rockefeller will be out. There will be two new faces for Republican President and Vice-President.

The South, including Texas, will be the key to the 1976 elections.

The North Carolina coast will be battered by storms in March and April, suffering severe damage.

Three plane crashes on the East Coast in the spring will induce nationwide investigations into private flying.

Two federal benches will be vacated as a continuing result of Watergate.

A ship disappearance in the Caribbean; hijacking will be suspected.

Russia and China will be at odds through the uncovering of plans involving an attempt to overtake the Kremlin.

A new, innovative heat-producing unit will be unveiled in 1975.

There will be a strike at Disneyworld.

The economy will remain relatively stable overall, but with several extreme pockets of unemployment and discontent.

Detroit will be the scene of major riots in 1975, as will Miami.

A tax on gasoline is inevitable; it will be more than 10¢ per gallon.

Heavily armed gunboats from several nations will maneuver in the Near East, causing worldwide unease during the summer of 1975.

A train derailment in Southern Europe will be blamed on sabotage. Many injuries will result. The next so-called "shortages" will involve coffee and some spices.

A strange attempt to overtake a city of 100,000 here in the United States will occur in May.

A discovery of missing gold bars at the United States Depository will be the hush-hush story during the summer.

Telephone company profits will result in large public suits during 1975.

The Killer Bee from South America will be stopped by unusual weather patterns.

Two major Watergate participants will meet mysterious deaths in 1975.

Film clips involving Hollywood stars cavorting in the nude during a major film production will cause a minor furor.

A spectacular suicide attempt on a jumbo airliner will occur in June.

1975 will be known as the year of the avalanches. These will be principally in Europe and Asia, but two or three will be recorded in the United States.

Within ten years, an experimental pilot project will narrow lanes on superhighways to half their current size to allow roomy subcompacts, piloted by automation, to traverse the United States.

A new virus, oblivious to current drugs, will manifest itself in an outbreak of disease in Europe in 1979. This disease will be combated by the ingestion of a derivative of crushed flowers.

The 200th birthday of the United States will be more grandiose than anticipated, with talk of opening an official second capitol of the United States.

A boom industry is home gardening, with development of a "set-up" garden of exotic vegetables delivered by truck. Supermarkets will begin to sell fresh produce grown in their own stores.

Huge natural disasters and more rioting within the next eight months.

In 1976, we will see racial disturbances, not necessarily between blacks and whites, in small towns across the United States. Many cities involved will begin with the letter "S."

Freak weather patterns this winter will cause more sightings of the aurora borealis than at any time in the past. While all of these sightings will be natural phenomena, a greenish haze, sighted several times in the early morning hours, will cause some consternation.

The jumbled national political scene will cause tight security at both national conventions. The Democrats will win the national election in 1976.

The next two countries to heat up with Communist activities will be Korea and Thailand, with a strong Communist movement showing up in Germany, Italy, and the United Kingdom during 1976.

The United States will become increasingly absorbed with takeovers of South American countries, including difficult relations with Brazil.

The sexual revolution is not waning in the United States, and bisexuality will be the key word in explaining the late seventies.

In 1980, we will definitely see a woman nominated for Vice-President of the United States.

CHAPTER 24

IRENE F. HUGHES

Psychic Awareness

Irene F. Hughes is one of the best-known seers in the United States. Irene's biography and her *ESPecially Irene, A Guide to Psychic Awareness* have been very successful works. In addition to doing psychic counseling and teaching, Irene has been a psychic "ghost-hunter" and "crime-buster." Readers may write to her at 500 N. Michigan Avenue, Suite 1039-1040, Chicago, Illinois 60611. Her forecasts for the future include:

His Holiness Pope Paul will "resign." He will no longer be the Pope because of the heavy burdens of his church and the frailness of his body.

Indira Ghandi will be out of the government of India in 1976.

Pakistan is preparing to protect itself in case of a larger war between China and Russia in 1976. It will be almost fully prepared, with atomic weapons as well as other military equipment.

Out of China will come a startling use of atomic energy to heal the body.

Bob Hope will suffer a serious and sudden illness.

The world monetary system will be discussed and ideas presented to get it rolling by 1982. Many nations, the ten already organized and others, will participate in 1976 and on through 1982.

I predict that Britain may be under a police state before the third quarter of 1976.

Small but growing groups similar to the S.L.A. will be discovered springing up in such cities as Miami, New York, and Chicago. This will be a tremendous, growing trend throughout the latter 1970s and 1980s.

I predict that unusual conditions in Duluth, Minnesota, Kansas City, and in a particular part of Florida will cause an evacuation of cities. Also, a barrage of UFOs will be sighted, or reports of sightings will come from those areas.

Damaging mud slides and hurricanes as well as earth-

quakes will be news in China. Peru will suffer Earth changes and Japan and California will have damaging earthquakes.

A major metropolitan newspaper will begin to hint that it is to be sold. This will take place in the Midwest and will create a stir in the media field, including dramatic changes in its staff. Completion of this act will take place, I predict, in 1977.

CHAPTER 25

BEVERLY C. JAEGERS

Psychic Counselor

Beverly C. Jaegers is a teaching psychic and the author of seven books. She is also editor of *Pathways*, an exciting new magazine in the psychic field. Sample copies of the magazine are 50¢; a year's subscription is $3.50. Her address is P. O. Box 9226, St. Louis, Missouri 63117. Her forecasts are:

The economy will stabilize somewhat this year, as I predicted last year. Around the time this book will be published there will be some very encouraging news from Washington. Rumbles of gas rationing will continue. A new extraction method for utilizing formerly-too-expensive underground fuels will surface. This is happening now in several southwestern states. The new process is connected with some work done by a German chemist.

As predicted, gold and silver will be items of interest for the year. Many people will make and lose fortunes with these metals.

Weather conditions will drop from their freak stage and resume normal patterns of storms, droughts, and floods in the usual places. The seasons will continue about thirty days ahead of their usual placement. Sunspots, long known to be weather indicators, will be proven to be caused by planetary trines and quadratures, as well as oppositions. This will be another boon for the field of research astrology.

The political arena will see the surfacing of Ted Kennedy, with several strikes on him, balanced by the end run of George Wallace. Ronald Reagan will be mentioned as a running mate for both, but I don't see him moving in. Republicans will make frantic compromises. Ford will balk. A third party will gain strength, but this is going to be a real mess—expect it!

As I said last year, no Depression on the scale of the 1929 disaster. Escalating inflation will continue despite efforts to stop it. A new "brakes-on" system modeled on German efforts may be talked about, but splinter groups and factions within the lawmaking bodies will prevent any progress.

Again, common sense will go by the board in favor of private interests. A pity.

The stock market will waver throughout the year. It's no place to sink much money. African coffee will be the next commodity to watch. Coffee will be scarce sometime during the year.

There's something going on in Colombia and in Africa. . . . I see men with guns and bad weather conditions.

UFO activity will "flap" in a minor way . . . there will be some announcements out of government, but through a nongovernment source.

Watch for something unusual involving UFOs and Sweden.

We will lose some top names in the entertainment field during the year.

A top-level politician will also pass out of the picture.

There is something underway in the Arab-Israeli sector, something is building up there for an explosion. It involves a piece of fortified high ground and an old city; may be coming during 1975.

Medical; Some very encouraging news on leukemia this year. Still a power struggle involving vitamins. Almost everyone will be buying or considering a water-distilling machine, as water quality around the country continues to deteriorate. One of my good "hits" two years ago would be the announcement that the Great Lakes would be reclaimed; this occurred. But the rest of our waterway "sewers" will continue getting worse. A small portable distilling until will keep a lot of people from diarrhea and dysentery, etc. It is a good buy.

More news on successful cancer research out of Arkansas and Minnesota. There will be continued underground traffic in apricot kernels and in proven but outlawed cancer-fighting substances. A breakthrough in Laetrile research. The electrical acupuncture machine I predicted two years ago will be utilized more widely. It is still being tested but in Florida I met some people involved with its development and testing. Rulings also on who can do acupuncture will be adjusted to include well-qualified people from disciplines other than the M.D. The late seventies will see the rebirth of homeopathic and naturopathic medicine with a good response from the aware section of the populace.

The big news this year about movies will be the utterly ghastly and sick releases brought out in order to bring the 12-year-old mentality into the theatres. Porn and sick-porn

will be "the thing to see." However, mature individuals will stay away in droves, forcing the closure of a good many more theatres. It will slowly begin to dawn on moviemakers that reality can be depressing. There will be a slow trend back to entertainment, as opposed to experience.

TV will be infiltrated with R-rated shows, and a terrific battle will ensue between interest groups and moneymad czars over prime time. A TV set may even be burned in public as a protest.

Religion: The Charismatics movement in America will continue to gain ground, but some of those involved with it have strange motives. The Catholic Church will be credited with leading the way on this. It will eventually be seen that this movement can lead back into almost pagan saturnalia. It's very satisfying to the participant, but hardly a step forward.

Several odd cults will drop completely out of sight, preparing for Armageddon.

Education: A medication which seems to slow time will be utilized for cramming. Requirement levels for equivalency tests and graduation will be lowered again. It will be found that numerous groups of graduates from high school can barely read and many cannot do simple mathematics.

Government trends will be toward wrong directions. Instead of cutting spending, more will be thrown after bad. Many state and federal programs will become bankrupt. Foreign money will continue to be poured into the purchase of land, businesses, and industries in this country. Developable land lying unused in this country will continue to be ignored and crops will not be planted where economically feasible. The building trades will come up somewhat, but prices will be a terrible hindrance. The trend is to overbuild condominiums and multiple-family dwellings. Fewer single-family dwellings will be built.

Frantic reforestation programs will be begun as a stopgap measure. Steel is likely to take a fantastic jump.

Some years ago, I presented a prediction that all mining and underground stocks would be good (1969). This prediction has been vindicated, especially in coal, etc. I repeat this prediction now and feel that anyone holding or buying this type stock will make money.

Chemicals will be utilized in new sources for plastics. A soybean derivative will be helpful. Cotton and textiles will be

good. There will be a new type of bug found ruining crops, beginning in the South and spreading North.

Small operators in meat farming will again have a terrible year. It will be found that meat animals cannot be raised with any profit, as feed prices continue to soar.

International affairs will stay unsettled, with trouble erupting in the early months in South America, then in Africa, Pakistan, and Japan. The entire Southern Hemisphere is in for a bloody time of it, as the British would say.

Something new out of India.

A European cartel will attempt to exclude America.

The CIA will be blamed for everything from food shortages and coffee prices to small takeovers in Southern Hemisphere countries, with no basis in fact. New names in top-level echelon here in 1976. The Bicentennial will be a high note rising above the year's low level of accomplishment. There will be an interesting announcement during the observances.

Crime will soar to unheard-of heights, and police will plead for funds to hire new men and improve equipment. As predicted, more states have reinstituted the death penalty, and still more will do so. The courts will continue to be the source of amazement to lawmen, for once they have arrested and brought the offenders to trial, judges will acquit and release them for no apparent reason. Police morale will drop again and some will turn to new corruption in an attitude of "They don't care—why should I?"

Drugs will continue to be the top problem in America—cocaine. heroin, and several new chemically derived mood-changers. A well-known name will be revealed as a heavy trafficker in drug imports. Several rock festivals with very bad drug-related problems will occur, eliciting headlines in local and regional news. A new "ritual killing" will be drug-oriented, not psychic-related.

Psi investigations will continue to reach higher and higher levels. A method of detecting disease from Kirlian photos of the fingertips, related to medical dermatoglyphics and hand analysis, will surface during the year. The public will accept psi on a more broad-based level, realizing that it is not an "occult gift" of some sort, but a natural, reasonable, and common-sense ability given to us all. The first private detective agency composed solely of psychics will be licensed. Sug-

gestology, as I predicted some years before, will sweep the country and then the world.

Disasters: a problem in Holland, continuing earthquakes on both sides of the Andes as these reshuffle themselves. Alaskan tremors, some Midwest areas will experience 4.5 on the Richter scale. California seems to be in for a 6 or 7, with epicenters in 3 places north, south and east of Los Angeles, running upward towards San Francisco.

A new theory will prove to be helpful in preventing air crashes. Fewer superjets will be built, with the DC 9 and 10 becoming almost "uncrashable" workhorses of air traffic. A new rocket jet is on the drawing boards . . . fantastic! Australia and New Zealand will have a problem. Consumer affairs: more Victory gardens will be planted, with handymen peddling cultivation from door to door. You'll see chickens in farmyards again. Prices will continue high, with seasonal fluctuations. A new meat additive will prove harmful.

CHAPTER 26

BEVERLY C. JAEGERS and THE UNITED STATES PSI SQUAD

Psychic Detectives

The United States Psi Squad is composed of gifted psychics and others who work with police departments to psychically provide clues and information on criminal activities. They have also offered their services in locating missing persons and children. Members of the Squad have graduated from Beverly C. Jaegers' Psi Training Course.

St. Louis psychic Beverly C. Jaegers explains: "We've just had the first police-psychic official meeting in Florida. We've also just completed our work on an awful murder case. We worked with top police officials and they're going to give us an official letter of commendation for our work."

The Psi Squad can be contacted by writing to J. Kyro, U.S.P.S. Research Department, P. O. Box 9226, St. Louis, Missouri 63117. They have affiliated branches in New Orleans; Oklahoma City; Dallas; Little Rock; Helena, Montana; and Nebraska.

Members of the Psi Squad have compiled their forecasts for 1976. They follow.

Gerry Leigh—International Director:

The 1976 presidential election will be a close one. One contestant has not as of this writing let it be known that he's planning to run. He will make it known late in 1975 or during the primaries. The other is, of course, Ford. The election will be so close it will be up to Electoral College to make a final decision. This will cause much surprise in the final decision. I feel that some vote-changing will take place.

Earth changes: I feel California will not sink in 1976 but there will be many more predictions of this in 1976 than in 1975. Atlantis will also stay on the ocean bottom during 1976 but I feel that its location will be verified and exploration will take place. I see no major finds in 1976 in this area. Winter months will continue to be later. Freezing conditions going into spring will cause farmers much agony as crops are damaged or destroyed.

I see an increase in earthquake activity, especially in the

Midwest. California will have a big quake in the summer of 1976, causing many people to decide to leave the area.

I see a sudden change in the Pope in 1976. The church will see many changes, including a larger split in the church. The new Pope will make a big decision on church policy.

In science I feel that a new find in the way of producing energy will be the big news. It will come in the summer of 1976 when energy is on the minds of most Americans. I see a major change in the medical doctor in 1976 and the latter part of this century. He will be working more for prevention than for cure. I see new trends in acupuncture and related areas. I see a major investigation of the magnetic fields of the Earth taking place. Many finds will show that magnetic fields affect our lives more than we now realize.

I see many more dips and recoveries in the economy. It is a good time to stay out of stocks, unless you are an expert. The unemployment rate will stay high in 1976, causing Congress to take a harder look at this situation. Look for many new reforms in this area.

Ed Cleary—Tarot Consultant:

An organism, fungus-type, attacking Midwest and East Coast grain crop will cause higher prices in bread and bakery commodities.

Copper and tin will rise in price.

The psychic field will lean toward mystical-religious rather than psi powers.

A large airport under construction will have several major accidents connected with it.

I see large co-ops being formed in food and stores; one building with many subdivisions within store area.

1976 will be a big year for UFOs.

Diana L.:

Inflation and the economy are in for a rise.

Warmer weather is in store for the world.

Rockefeller will be our next President.

There will be a large increase of disappearances from Earth--unexplained, of course.

The popularity of psychics and psi itself will increase. Look for an increase in Earth changes and activity.

David Deggendorf—Training Director:

The Bicentennial will be sad for the United States. We will have some tragic financial problems. Henry Kissinger has an 80 per cent chance of being assassinated. This type of thing could be averted and avoided by proper type of thoughtform projections.

I am seeing visions of the entire Earth involved in volcanic eruptions.

Our entire solar system is undergoing some sort of shifting upheaval.

Golden Gate bridge will almost yield a disaster, however engineers will spot a flaw, predicted by a psychic.

Radioactive snow will occur.

A definite cure for some types of cancer.

National TV recognition for St. Louis police-psychic squad.

Vatican (Pope and bishops) will decree something major concerning the doctrine of reincarnation.

Gerald Ford will win the GOP primary. A major turnover in Congress—Republican-dominated.

Some type of nuclear holocaust (in testing).

Most AFL-CIO members will feel they are in jeopardy from some nationally established law. It will be repealed by a lot of states.

I feel three assassinations of heads of governments in 1976 time slot. The United States will not fall. It will regroup and stand tall.

The Aquarian Age effect will hit with a bang and groups all over the Earth in all governments will have a major structure change.

Extraterrestial communications will be established.

Ray Jaegers—Healing Consultant:

I predict that Kennedy will try for and probably win the 1976 nomination. However, there will be terrific problems with the election. At this time I feel Rockefeller may well be the next chief executive.

Religion will slip in membership in 1976.

There will be knotty problems caused by foreign purchasing of US businesses and land. Much outside money coming in can be good. I feel the United States will lose control of its economy if it doesn't watch out.

Psychic healing will continue to make great strides; the crooked practitioners, the ones in it only for the money, will be weeded out.

Contrary to many predictions, Wallace will not be President. It will be seen that the problems besetting this country cannot be solved by simplistic solutions. A good deal of common sense is needed, and this is lacking in the national picture as it stands.

Chris:

Jackie Onassis will remain unmarried for the forthcoming year, but within two to three years she will remarry someone who is now prominent in the public eye but not in politics.

Phyllis Kreis—Codirector, National Psi Squad:

Bracelets will become fashionable and popular. I see some very interesting ones designed on cartoon heroes and heroines like Superman and Wonder Woman.

Horses will be used more. There is a possibility that chariot races will become major sporting events in the next twenty years.

JoAnn Soltysiak:

I feel we will see civil war strife on the East Coast.... Seems to follow Bicentennial celebrations in prominent areas of American history.

More medical breakthroughs on cancer, this time relating a cancer-creating agent in genetics. This will start a wave of interest in genetic counseling.

United States and Russia will have much better relationships. China is our true enemy for their strength is in their numbers. United States and USSR have much in common, interests and goals, especially in the scientific field.

Much interest in the Bermuda Triangle and related ancient or legendary civilizations. There is a direct relationship between the two.

Look for shortages of staple foods as never known before. Shortages of foods will begin to relate to the average American family.

Kennedy will run, and it looks like he might win at this time.

R. Steib—Squad Director:

People will be more ignorant of others' feelings, until the Earth shifts start, then they will realize what "Love thy neighbor" really is.

Ford will try to run for President, but will never make it. Kennedy looks like a winner at this time because of the impressions left on the public because of his brother.

Dope and other narcotics are on the way out among intelligent people.

More and more people will be going back to nature. These next two years are the years of feast before two years of drought and famine.

The psychic field will explode as people will be looking for inner spiritual peace and knowledge, rather than the church of today.

Sam Tarli:

A big change in Rome.

A tremendous battle over abortion. Blue-law states will reject humane considerations as they always do. Feet-in-the-mud state legislators will continue to oppose any changes in the status quo.

Nostalgia will continue to grow apace as America continues to be disenchanted with the present.

More and more almost-nudity, even in public places.

The five causes of the decline and fall of the Roman Empire will be related, accurately, to America as it stands.

The oil countries will again manipulate the dollar, reducing it still further in valuation and buying power.

Magnetic fields of Earth will cause big news.

Jeffersonian-type politics will gain more prominence.

A US-Canada dispute, with the energy crisis causing problems.

Psychic healing will be studied in more and more laboratories and healers will be utilized officially in hospitals and clinics everywhere.

Chiropractic medicine and osteopathic medicine will come into their own.

Bankruptcy looms ahead for many cities and states. Businesses will continue to fold all over America, both large and small ones.

Another football scandal.

A really rotten outlook financially and politically, everything sliding steadily downhill for the next three years. The 1970s will be referred to later as the "Welfare Generation."

CHAPTER 27

DR. JOSEPH JEFFERS

Voice of Yahweh

Dr. Joseph Jeffers, one of the world's leading authorities on the Dead Sea Scrolls, is another new addition to our psychic panel. Dr. Jeffers has been on numerous radio and TV shows in his effort to get Yahweh (*Yah-way*) as the name used for God in the Bible. Alabama-born and seventy-six years old, Dr. Jeffers is a medium-sized, energetic person who looks to be in his fifties.

At one time he was in charge of an 11-million-member Protestant church in the Southwest. He has doctorates in philosophy, divinity, and eschatology. He found something missing in his church work and spent years in research and traveling, going around the world seven times.

Dr. Jeffers claims to have communicated directly with Yahweh, the Creator, who lives on the planet Orion. His efforts over the past half-century have gotten the name back into most Bibles and reference books. The New Jerusalem Bible now uses Yahweh throughout the Old Testament.

Dr. Jeffers writes of his activities:

"I get hundreds of letters, articles, books, and papers from people all over the world who believe they are proclaiming the true message and gospel of the Messiah and the Kingdom. There are millions who believe this, even as I once did, most of it until I had the revelation of the Creator Yahweh and his son, Yahoshua or Yah-Shua, meaning "Yahweh's Savior." My heart goes out to these sincere people who are church members and yet who are not real students or else they would have progressed to the Yahweh message. We are not trying to convert nor proselyte anyone, but only to bring them the truth, so that they can have the joy that we and thousands of others have, who worship only the Creator, Yahweh, and communicate directly with him."

"We have had over 26,200 radio and TV programs. We are trying our best to get His name and message out and pray that you will help us or at least pray for us. If you want any literature on the subject, please send a self-addressed envelope

to: Voice of Yahweh, P. O. Box 492, St. James, Missouri 65559. May Yahweh bless you, is our sincere prayer!"

Dr. Jeffers' forecasts are:

UFOs: Yahweh has told us that many of the flying saucers and UFOs are made and flown out of Russia for various purposes around the globe. There are larger spaceships that come from other galaxies and these will be making many appearances in 1976, along with the UFOs from Rnssia. They are not the same. We know they have both visited the state of Missouri.

Inflation and the Economy: The economic situation will grow extremely precarious in this country and the countries of Europe and Asia. Inflation will continue to worsen. All the money the government gave away will soon be spent and unemployment will worsen. The banks in Switzerland will be broke. The United States will help try and save some.

Unrest: There will be much blood flowing from the numbers 1976. Out of each number there seems to be swords coming. January has gone by. February has gone by. March has gone by. I see very much unrest, much killing, rioting—stores are all empty, people are trying to kill each other, they say they would rather die than face this. We see people who are hollering and shouting. Those months will be very hard. From March of 1976 on there will be more terror than the world has ever known. (Please remember, we are reporters—we must be honest. This is not what we would like but what we see coming!)

Disease and Drought: There is going to be a cattle disease. Going to spread like fire. It will start in Texas. Wyoming will be touched too.

Drought will be even worse in Africa, India, and even parts of Europe—100 million sick and dead from insects, drought, and sickness. Already the deadly bee has hit Mexico.

There will be great famine, drought, and failure of crops in the United States.

American and World Political Systems: There will be a completely new political system in this country and other countries of the world. Yahweh, the Creator, is preparing the world for a one world government. After the Third World War, or Armageddon, everything that is evil or bad on the Earth will be destroyed and only good and beautiful things will remain. It will be a world of peace, happiness and love among all mankind and Yahweh will set up his own king of

kings, who will rule the whole Earth and the people will follow and obey the true Creator Yahweh. We will follow the correct laws of diet and health that the people of the Earth were intended to follow from the beginning. Much of the destruction will take place during 1976 and this will be the year that will bring about the changes that were necessary in order for the world Utopia to be fulfilled.

Beginning in June 1976—Armageddon, if not sooner.

Destruction of the Berlin Wall will take place.

Russia will occupy the Holy Land.

Russia will make a deal to avoid war with China.

Russia will attack the United States, secretly in 1975 and openly in 1976.

Much trouble in Asia is coming. China and Russia will agree in occupying or controlling all Asia. Russian troops will invade some parts of Asia; Japan will cut the ribbon with the United States.

New Zealand, Australia, Africa, Mexico, and Scandinavian countries will fall to the Communists.

Australia will be taken over by Communists. Rome will be taken over by the Communists. The Vatican will be controlled by the Communists.

Fidel Castro will be out.

Russia plans to attack the United States before our Bicentennial or before July 4, 1976. It will probably be on a Sunday like Pearl Harbor.

Japan will go Communist, by necessity, not choice.

Bombs will drop on the Suez Canal, Indochina, and Panama.

Communists are getting ready to take over the oil countries and even the Arabs will be divided.

Korea will become one under Communism. Our soldiers will have to leave or fight.

Turkey will join in with Russia and then be joined with Iraq. The Shah of Iran will be out, giving Russia complete control of most of the oil companies. Russia now controls Libya.

Revolution in Brazil is coming.

Weather Conditions: Yahweh says that where it is normally hot, it will be cold and where it is normally cold, it will be hot. Weather conditions will change all over the globe and there will be many more crop failures and hazardous weather conditions and storms, such as hurricanes and torna-

dos. Eclipse of moon and planetary changes will help increase this condition.

There will be much starvation in 1976 all over the world.

There will be many more major earthquakes on the East Coast, including New York and Florida, and on the West Coast of the US.

A major earthquake will occur in Hawaii.

Great destruction is coming to Phoenix, Denver, Houston, New York, Los Angeles, Miami, and Niagara Falls.

San Antonio—a huge tornado, fires and Mexican Americans and blacks taking over.

Politics Next Year: Ford will not finish his term. The facts will be known concerning President Ford's health and his wife's deteriorating health. Kissinger will be removed from his positions. Rockefeller will be the last President of the United States. He will declare martial law and will bring about a complete dictatorship before Russia attacks. This will have to come to keep any kind of law and order in the United States.

We are headed for a Depression and the stock market will crash.

All three major TV networks, CBS, NBC, and ABC, will no longer exist in 1976. There will be only one TV network. Government control will be even more severe than in World War II.

Gold will reach $300 an ounce and, before 1978, $500 an ounce.

Personalities: Teddy Kennedy and Governor George Wallace will never reach the White House. Oral Roberts will lose his voice. Bill Graham will have mental difficulties. General Franco, the leader of Spain, will die or be taken out. The Shah of Iran will die, perhaps by assassination. Henry Kissinger may be shot. Mao Tse Tung and Chou En Lai will die and a new government will be formed in China which will be forced to join with Russia and together they will join with Japan in a drive for world Communist domination.

The Pope will be seriously ill from an operation and probably will pass out.

John Wayne will get worse, retire, and pass on soon.

Fred Astaire will have a serious attack which may be fatal.

Robert Mitchum will follow in about the same way.

Gasoline: Gasoline will go to 1 dollar a gallon and riots and crime will increase because of this. Bicycle sales will sky-

rocket because most families will use this mode of transportation.

Restaurants: Restaurants will close their doors as money conditions worsen and food and labor is next to impossible to obtain.

The Messiah will speak to the world in 1976!

Hold onto your hats—you haven't seen anything yet! Yes, in 1976, the Messiah will be seen on TV giving the last warning before the final destruction date! Keep a sharp lookout for this prophecy will surely come to pass in 1976!

CHAPTER 28

J. JOSPH

Texas Psychic

Another new member of our psychic panel is Reverend J. Josph. At the age of two he predicted his brother would not live past his fourth year. His brother died on his fourth birthday.

Josph told his wife, when their daughter was very small, that the child would be in an institution at fifteen. The couple took the girl a cake on her fifteenth birthday. She is in an institution.

He believes in reincarnation and says he has seen himself in a former life. Josph, a self-described seer, believes he is an instrument of Jesus, that he has been given a gift to help, rather than hurt.

"I realized, when I was two and predicted my brother's death, that I had been given a gift," Josph said. "All my life I've had this ability to see into the future. I've used it to help people, not to harm nor frighten them."

Josph, a Dallas manufacturer of a psychic health treatment, is a former hairstylist and makeup artist. He began his predictions by telling clients about themselves or impending events.

"I never tell anyone anything bad," Josph said. "If I see something bad is going to happen and the event is inevitable, I don't tell them. If the event itself can't be prevented, why worry people?"

Josph also refrains from publicizing specific details of an event when that knowledge might inspire "a kook" to pull a trigger.

Josph is an ordained minister with credentials from the Texas Spiritual Christian Synod in San Antonio. The religious philosophy he embraces is most like that of the Unitarian Church.

He admits he is not always right in his predictions. "If I said everything I predict occurs, then you'd know I was lying," he said. "No one is 100 per cent accurate---except God and Jesus."

Readers may write to J. Josph at 10440 Rosser Circle, Dallas, Texas 75229.

His forecasts are:

Communications with UFOs will be more positive from 1976-1977.

If astronomers and astrologers should do a traceback on the disappearance of planes and ships in the Bermuda Triangle, they would discover that when the moon is in a certain degree, it creates a double negative magnetic force with the Earth's movement which opens the door to the fourth dimension.

The third set of Biblical scrolls will be found by the year 2000. These will fit and coincide and explain the Book of Revelations.

No economic disaster in the next two years is forthcoming.

Stock averages will exceed a thousand.

Ford will not be President in 1976, but a Republican probably will be elected.

Billy Graham will hit the news but not in the way his followers would like.

The year 1976 will be the year of great changes and discoveries concerning magnetism and electrical uses that have never been put into practice.

Many interferences in radio, radar, and TV will occur with no reasonable explanation.

An ancient city under the sea will be discovered.

Fts. Hood and Shephard field will become among the two largest in this part of the country with much underground testing being done.

The boat they feel is the Ark on Mt. Ararat in Turkey is not Noah's Ark. Looking down and seeing the ice-clad boat is like looking through a magnifying glass. This has increased the dimensions of the boat. The Ark will be discovered in or near the year 2000.

In 1976 relations between Red China and Russia will be at a stalemate.

Nuclear work has not ceased in the United States—it's just kept hushed.

Kennedy will not run for President in 1976, but not for obvious reasons.

Wallace could become Vice-President. Wallace will walk.

The Kennedy assassinations will be in the news as new evidence will keep recurring.

Look for strange happenings and events in the life of Christina Onassis.

The lineup of the planets in a straight line as predicted and scheduled will not occur on that date. It will be early or late.

Kissinger will not remain as Secretary of State. Reports on CIA will shock John Q. Public. Yet this scandal will slowly fade away.

John Connally will be active in politics again.

The public will be shocked at information on the secret lives of politicians and religious leaders that will come forward in 1976.

Elizabeth Taylor and Richard Burton will be reunited.

Cher will become one of the greatest talents and win awards in 1976.

Magnetic and electric transportation will become a reality.

Electrical storms, volcano eruptions, explosions in the sea, tidal waves, and fires will be reported in the newspaper more than ever before.

Strange odors will be noticed around the world and will be blamed on pollution but this will not be so.

More religions change in this period than ever before.

Man has a need for the mystic in religion rather than so-called scientific facts. Psychic healers will be in demand more than ever before and proof of their ability will be established to where even MDs will use them.

The art of hairstylists and make-up artists will be a vanishing art. The field will be controlled by large corporations.

The life-span of man, because of scientific discoveries, will almost be doubled.

CHAPTER 29

KASKYE

A Young Psychic

Kaskye, a 22-year-old psychic, presents his predictions of the future for the first time in our annual. His most recent "hit" was forecasting marriage for Cher Bono.

"As far back as I can remember, I've always been psychic," Kaskye said. "I believe it to be a gift from God. I believe everyone possesses psychic abilities."

Kaskye is gaining recognition as a lecturer on psychic subjects. His address is: P. O. Box 446, Plymouth, Indiana 46563. His glimpses of the future include:

The President-elect of 1976 will be a "dark horse."

Inflation will be on the decline by as much as 20 per cent in certain areas during the first half of 1976. From July through September, it will rise as much as 18 per cent in other areas. From October through December, it will rise by as much as 10 per cent for the year's end.

Economic productivity, distributing and consumer wealth will be at its highest peak since the 1974 slump. From April through September the economy will experience a decline by 19 per cent. During the last quarter, the economy will have an upswing of 8 per cent.

In an overall view between inflation and the economy, America will maintain stability. Inflation will rise by only 2-5 per cent over 1975 prices. Economic productivity, distributing, and consumer wealth will decline by 11 per cent over the year's beginning.

In summary, the conditions between inflation and the economy will not be in the correct proportions. However this year will bring this correction closer. 1976 is the "Year of Hope" between our inflationary and economic problems.

Interest rates will decline by 1 per cent.

Stock Market: Value of shares will remain stable in February, March, April, June, October, November, and December. Value of shares will rise in January, May, July, August and September.

Weather: Southern states will have warmer temperatures during January and May. Western regions will report below

normal seasonal temperature during June. Eastern regions will report warmer temperatures during August and September, colder than normal temperatures in November. All Northern regions will be within normal range throughout the year.

Severe weather: Tornados and hurricanes will occur more often this year.

Crops—Surplus and Scarcity. Scarcity—apples, lettuce, pineapple. Surplus—potatoes, beans, canteloupe, watermelon, oranges, grapefruit.

Transportation: Mass transit will be the usual transportation for the masses in 1976. In twelve years, the automobile will be a luxury vehicle for the rich.

Fashion: Japanese-style clothing will begin to interest fashion designers.

Sightings of a Small UFO Colony Group: In mid-1976 there will be a sighting of a small UFO colony that will have reportedly descended upon a forest. Upon the examination of the forest there will be found small incisions drilled into a certain species of trees. Sap will have been drawn from this species. The incident will remain a mystery.

CHAPTER 30

REVEREND KATHERINE KIMBROUGH

California Psychic

Reverend Katherine Kimbrough (P. O. Box 1091, Hollywood, California 90028) has been psychic since childhood. "However, my home was very orthodox in religion and I had to hide my talents," she related. "Anything psychic was considered the work of the Devil. I could help an adult find a lost article, then be accused of fibbing because I was supposed to have hidden the article. After several experiences of that nature, I kept my psychic abilities hidden and to myself."

Minister and counselor of the Little Shrine of the Open Heart in Long Beach, California, Reverend Kimbrough travels widely giving lectures on ESP and psychic phenomena. She also teaches how to obtain a more rewarding life through her Three-Point Philosophy of Action.

Reverend Kimbrough helps people with her "lifescopes," seeing their past lives in reincarnation. "I can see a person's past lives and help to explain the present," she said. "The problems of today are often related to the past incarnations. By knowing when, who, and where one has lived before, a person can obtain better understanding of this life."

Predictions for 1976 by Reverend Kimbrough include:

The UFOs will continue to be great news but it is revealed to me that they are not friendly. They are evil and we can look forward to some very weird happenings in this field.

The economy will adjust itself when we adjust.

The US will have many storms, tidal waves, and some earthquakes but our coasts will not go under.

The Midwest will emerge as quite an earthquake center. The world will stand, regardless of some predictions.

The individual will develop his personal philosophy and find survival a great challenge. Like the frog in the pail of milk, he can sink or paddle until a mound of butter forms which he can use to jump out.

In politics we can look for Ford, Reagan, Wallace and a newcomer who will surprise all parties.

Kissinger will become a very worried man. He should look after his home life and personal health.

In time to come the Vietnamese refugee influx will prove unfortunate for the US. How many know the American Indian legend of the four ears of corn they hang by their doors? The red ear represents the United States as the Indian's land, the white one is for the white man's rule, the black on represents the black man's rule and the yellow one tells that the US will eventually be ruled by the Asiatics. We are told that coming events cast their shadows long before they are seen.

The stock market will have its ups and downs. It will be about four years before the economy is stabilized.

There will be more unemployment before it reaches the peak. More Americans will have to take jobs with less pay. Yet it is a time when the individual, through his creative power, can become rich by supplying a need or a want.

There will be many changes in all political parties. It will be quite a while before the American public will have faith in their leaders. This is due to all the scandals we've been through. There are more scandals to come.

The political "jobs" have little dignity attached to them nowadays.

President Ford will not gain greater popularity.

Former President Nixon will be in the spotlight again.

Most of the Watergate figures will receive shorter prison terms, paroles, or pardons.

The death penalty will be a topic of political concern.

Many discoveries in preventive medicine will be made, some by laymen. Chiropractors will become more popular.

There will be a gradual improvement in the environment as the people become involved.

There will be a shadow of gas rationing.

We are coming to an era of no special fashion. Everyone will "do his own thing." Men will become more fashion-conscious than women.

There will be a drop in drug abuse as the older students realize the futility of it. The money shortage will also help to erase the drug habit.

TV will tend toward more sex exploration and gory violence, until viewers become bored.

There will be a few worthwhile movies produced in 1976, but the trend will be to low-budget pictures.

There will be changes in the field of education. It will be discovered that many are overeducated for their roles in life. Depression and suicide will follow because of this.

People will learn that religion is the best tranquilizer of all.

Birth control will not only become more popular, it will eventually become compulsory. The same goes for cremation.

There is plenty of good news for the individual. He will learn how to make the best of his environment, use his ingenuity, and create whatever he needs from what he has. Women will sew, knit, and can vegetables, and find much joy in the things from great-grandmother's day.

Russia and the United States will tend to cooperate because each fears the other. Russia will become more democratic and capitalistic as its young people grow in wisdom.

In 1976 there will be less foreign travel done by Americans because they will want to see and celebrate our Bicentennial which will be very successful.

Crime will continue to climb until citizens will take it upon themselves to enforce the law.

Divorce rates will continue to increase. Many marriages of twenty or more years will go "on the rocks."

There will be Congressmen who will favor a United States lottery. It will take several years before it is passed.

Barbra Streisand has reached her pinnacle. Lucille Ball, Elizabeth Taylor, Richard Burton, Sammy Davis, Jr., and Elvis Presley should watch their health.

John Wayne will still make several successful films.

Robert Redford will continue to become more popular.

Bob Hope will curtail quite a few of his activities, but he is far from retiring.

There will be a new group of actors and actresses but they will never attain the "worship" as did the oldtime stars. There will be no glamor or mystery around them.

Jackie Onassis will continue to make the headlines. She is concerned about her children and is not the hardhearted woman she is often pictured.

I see problems ahead for Frank Sinatra and also for his daughter, Nancy.

When 1976 arrives look forward to all it will hold and make up your mind that it will be a good year for you.

CHAPTER 31

DOROTHY SPENCE LAUER

Psychometric Prophet

Dorothy Spence Lauer is well-known as a psychometrist. Editor Ray Palmer of *Search* magazine wrote about her psychic ability: "... Thus, we knew that Dorothy was predicting the death of the President (Kennedy). In fact, she had warned us several times in the past that he would die. She was right about the Pope. She was right about several movie stars. We have been publishing the predictions of Dorothy Spence Lauer for nearly ten years now. During that time she has established herself as the most accurate prognosticator we have ever encountered."

Mrs. Lauer creates her predictions through psychometry. "I prefer to hold an object in my hand that belongs to, or was handled by, the person I'm reading," she explained. "I can then obtain impressions of their future."

Readers may contact Mrs. Lauer at P. O. Box 637, Glendora, California 19740. Her predictions for the future include:

Elizabeth Taylor will eventually marry Henry Wynberg.

Hundreds of people have asked about California slipping into the sea. I don't believe this will ever take place. I see an earthquake for California, but it could be as far away as 1982 or 1983.

Jane Fonda will be in the headlines with bad news.

I do not feel that Patty Hearst will ever return voluntarily to her parents.

President Ford will not be reelected.

Ronald Reagan will run for the presidential nomination.

Jackie Onassis will be romantically linked with many men. She'll eventually wed someone she has known a long time.

Watergate will be in the news again with more startling revelations.

Barry Goldwater will make a statement that will shock everyone.

Richard M. Nixon will slowly fade out of the picture.

A cancer cure is coming.

Look for an even higher tax on gasoline.

Music will become softer, more beautiful.

There will not be a shortage of food.

There will be some inflation but the economy will come out of these problems.

Be wary of the stock market. There will be an uptrend followed by downs. This is not the time to invest.

Be cautious about buying gold or silver. There's a price drop due in these metals.

I do not foresee a Depression.

Long hippie-style hair is going out. Men will have short haircuts again.

Portugal will have an internal upheaval.

1976 in international affairs is a time when people will talk things over instead of fighting. Russia will surprise everyone by doing something nice for the United States.

Vegetarians are going to discover they risk the dangers of becoming anemic. I wish to emphasize this because a vegetarian diet lacks some things that meat provides. A strict vegetarian diet can create some severe consequences.

Look for some breakthroughs in mental health, particularly with the care and treatment of the mentally retarded.

Employment prospects for 1976 look good.

Interest rates on home mortgages will be lower.

Ted Kennedy will think seriously about running for the presidency.

England will suffer from poor economic conditions.

The Queen of England will make a statement that will astonish everyone.

Look for Princess Grace of Monaco to make an unhappy statement.

The Bermuda Triangle will claim four more airplanes.

There will be good news for arthritis sufferers.

CHAPTER 32

AL G. MANNING

Forecasts from the ESP Lab

Al Manning, a business executive turned psychic, directs the unique ESP Laboratory, where research into the paranormal is conducted. After earning his degree in business administration and a Phi Beta Kappa key, Al Manning was an executive vice-president of several aerospace firms. He gave up a promising business career to devote his time and energy to delving into the mysteries of the occult.

In addition to doing his work as a certified public accountant and his experiments, Al is the author of several books. They include: *Helping Yourself with White Witchcraft; The Miracle of Universal Psychic Power; Helping Yourself with Psycho-Cosmic Power;* and *The Miraculous Laws of Universal Dynamics* (all published by Parker Publishing Co., West Nyack, New York). His latest book, *Helping Yourself With Miracle Spiritology*, has just been published.

Readers may write to Al Manning and learn more about his experiments and work by sending a stamped, self-addressed envelope to: The ESP Lab, 7559 Santa Monica Blvd., Los Angeles, California 90096.

Working with his psychic guide, Professor Reinhardt, Al Manning makes these forecasts for the coming year:

The National Economy: Interest rates—The prime rate will remain at or below 9 per cent for the first eight or nine months of the year, but will move up to the range of 9½ to 10 per cent by year end.

Stock Market: The market trend is erratically upward until October. There will be a peak for the year in very early October, followed by a drop of 100 or more of Dow Jones Industrial Average points. This will level off and begin a gentle up trend to start 1977.

Inflation will be the major economic issue of 1976. The recession of 1974-1975 will be virtually forgotten. This will again be a worldwide problem with many foreign countries fighting a much more severe inflation than the US will have.

Unemployment in the United States will bottom out at about 4½ per cent in mid-1976, then begin to rise again to the

6 per cent range by year end. But 6 per cent should be close to the highest range for 1977 as well.

Politics: The 1976 election season will be lively—it will be characterized by voter interest rather than voter apathy.

Ronald Reagan will appear on the Republican presidential ticket. Muskie and Wallace will fight it out for the Democratic nomination, with the strong probability of a "dark horse" compromise.

Once again we will see the election of a Republican President with a strongly Democratic House and Senate.

International Affairs: The worldwide emphasis will be on trade, with the major powers pursuing the ideas of detente. 1976 should be a year of relative international peace with the possible exception of the Middle East.

The State of Israel walks the tightrope this year. Either major territorial concessions are made to the Arab countries to restore the much earlier boundaries, or the month of May will see the outbreak of another Middle Eastern war that will be disastrous for Israel.

Russian leader Brezhnev will retire to a quiet country life as did Khrushchev before him.

A coalition of Arab oil financiers will stage a tender offer for 30 per cent of the outstanding shares of Chrysler Corporation.

Movies and Television: here the trend will be away from violence toward comedy and good drama.

Motor Trends: The motorcycle is rapidly losing its "Hell's Angels" stigma. 1976 will see many older people embracing two- or three-wheel motorcycles as a form of cheap, independent transportation. Within a few years it will not be uncommon to see business executives and even the clergy riding motorcycles to work or to business conferences.

National Prestige: With the Watergate and Vietnam disasters behind us, we find a new era of decisive leadership in the United States bringing a return of the respect and prestige that we have long enjoyed as a nation.

Space: In late 1975 or early 1976 there will be a near tragedy in space—a spectacular space rescue involving launching a backup module from Earth with a rescue team will avert the disaster.

Medical-Healing Methods: Three more states will join Nevada in licensing and legalizing acupuncture by qualified non-MDs. The recognition of acupuncture as a specific for ar-

thritic and similar conditions will grow throughout the Western world.

A new vaccine for several forms of cancer will be developed, leading to an eventual 50 per cent reduction in new cancer cases.

Names in the News: Gertrude Stein and Zubin Mehta will be involved in a well-publicized scandal this year.

In June, President Ford will announce that he has changed his mind and will not be a candidate for re-election.

The name Abernathy will assume special importance in the financial world.

Summary: We see 1976 as an exciting year characterized by boom and bust, ups and downs, but with a new positive approach of the population and its leaders, taking us into a 1977 that we can all look forward to with happy anticipation.

CHAPTER 33

DR. NICKY MARCHESE

Canadian Clairvoyant

Nicky Marchese (P. O. Box 326, Hamilton, Ontario, Canada, L8N 3C8) combines the careers of psychologist, astrologer and psychic counselor, and wife and mother.

Born on the cusp of Aquarius-Pisces, with Scorpio rising and the Moon in Leo, Nicky inherits extrasensory powers and can frequently foretell the future. She insists, however, that true psychics cannot turn their powers on and off like a tap, but must wait for the vision to be clear before making any forecast.

Nicky Marchese is happily married and the mother of four grown children. She has a bachelor's degree in journalism and she also holds degrees and diplomas in natural medicine and several of the psychic sciences.

Although some of her counseling work is done in person, most of Nicky's advice is in reply to requests by mail. Before offering counsel on such subjects as marital compatibility or careers, Nicky will cast a natal chart or study the lines of a client's hand. Both astrology and chiromancy (palm reading) are sciences, Nicky says, and require no ESP powers. When studying the chart or the palm Nicky often gets a psychic flash. She also often receives such flashes of information while meditating and she forecasts events in this manner.

This Canadian psychic, of Scottish-Irish ancestry, frequently forecasts sporting results, especially horse racing. Without studying the form she casts her eyes down the list of horses' names. She says: "The ones who are going to win or place seem to stand out in blacker type." She doesn't use this gift to make money at the track. However, Nicky writes a weekly newspaper astrology column under the pen-name "Pisces," and lectures on radio on astrology and other psychic sciences. She is a member of the Astrologer's Guild of America, Inc., and of the British Guild of Drugless Practitioners. She is also an ordained minister in the Crown of Life Fellowship, a Church of All Religions, Spokane, Washington.

Nicky's forecasts for 1976 are:

The U.S. Bicentennial will see the return of many of the ideals enshrined in the Declaration of Independence. People sated by the present continuous diet of excess, sexual laxity, and violence, will long for moderation and sanity.

At the beginning of 1976, President Gerald Ford and Vice-President Nelson Rockefeller will concentrate their attention on home affairs. The reason for this is that both men were born under the sign Cancer, the sign of house and home. It is interesting to note that both men's names are household words. Their wives have suffered in the area of the breast (ruled by the sign Cancer). The fact that both ladies are recovering points to the recuperative powers of people associated with this sign.

The next President of the United States will be someone whose life is ruled by the sign Leo. He, or possibly she, will have the Sun in Leo, the Moon in Leo, or the Rising Sign will be Leo. It is possible the Vice-President may be an Aquarian.

With the constant rise in the price of gasoline, 1976 may be the year of the methane-driven vehicle.

Americans, Canadians, and others will be eating more weeds in 1976, as these delicious edibles are rediscovered again. There will be increased sales of books on ways to identify these foods of the wild. Sow thistle, pigweed, lambs quarters, comfrey, and dandelion will be on the table of many whose health will be improved thereby.

There will be a big back-to-the-land movement and a return to the family farm. I don't mean communes, but self-sufficient family units living on the land and helping to restore value to the soil.

There will be an effort made in New York and other big cities to level slums and, instead of building more houses, turn the spaces into garden allotments.

While there will be an increase of Aquarian type religious groups, there will also be a resurgence of fundamentalist type religion.

Interest rates will go up and the stock market will rise.

Many people will become self-employed. This will give them a chance to have dignified employment and will also improve the economy.

Women's Lib, having made its point, will become less militant. Women will again realize the home is an important part of life and that guidance given to a child will be the most important factor in its life.

CHAPTER 34

DARHLA McCOMB

Kansas Psychic

Darhla McComb, a Wichita, Kansas, psychic, is another newcomer to our prognosticators. Her accurate forecasts have included the attempted assassination of George Wallace, Nixon's resignation, and other world events.

Like many other psychics, Mrs. McComb believes she was born with extrasensory perception. "As a child I knew that things would happen," she explained. "It seemed perfectly natural to me. But my parents couldn't understand it and dismissed this as my overly active imagination."

Mrs. McComb is now interested in setting up a school to research various areas of parapsychology. She has also lectured intensively on the psychic sciences to clubs and colleges and has appeared on numerous radio stations. She counsels clients on past, present, and future problems. "I can also go into their past lives," she said, "to better help them understand themselves."

Readers may write to Darhla McComb at 3011 East Funston, Wichita, Kansas 57211. Her forecasts include the following:

Political: President Ford's life is in danger in public if he does not take extra precautions. President Ford will not accomplish the things he hopes to during his short stay in office.

I do not see President Ford or Mr. Rockefeller getting the next election. Rockefeller's health will stand in the way of his running next election.

I do not feel we will have strong leadership in the next election and we may find ourselves swept up in another war.

Kissinger: He will be dealt a low blow while Congress continues to investigate his past activities. It will penetrate into his past political activities.

Economy: Erratic markets will continue to fluctuate within the next four years before stabilization occurs.

Land: The nature of our next war will be over commodities and is already starting to infiltrate our walls. I want to say the problem of ownership to our land will become more

acute unless we pass legislation declaring "USA citizen ownership only."

Comment: We will soon be plowing up the cement that we have spent millions of dollars on to lay down. This will be done for future crop rotation.

Preserve Your Land: A greater move is forthcoming in this country to purchase land. The move is on by big corporations to purchase huge sections of land to further secure their positions. An all-out effort should be made to preserve our land that grows agricultural commodities and grass- and timber lands. Efforts should be made to build up, not out.

Science: "Scientists Predict Human Brain Transplants Will Soon Be a Reality." I predict that when this occurs the scientists will discover also that we are programed and controlled through the brain cells, which will again tie religion and science closer together, only the terminology will take on new phrases and words.

Medicine: In the field of medicine, we will soon be using the power of electricity to heal man. It will primarily deal with the electromagnetic field, a ratio-balancing of powers. I see people sitting in a chairlike apparatus with a large beam-like apparatus close to the top of the head (similar set-up to the woman sitting in a chair getting her hair dried in a beauty shop). The treatments will be painless; it will be used for nearly every known type of disorder of man. An electromagnetic field balancer.

Educational Field: State legislation on "psychic affairs" needs will come into being. "Prepare thyself for school," my psychic friends out there. State legislation will be in effect within eight to ten years.

On Psychic Legislation: Once in effect, man will exploit the power of the psychic for all types of information. A degree will be required by those who are in charge of various departments. Telepathy will be a known power to mankind and as always we see the good and bad side being used.

I feel this is a very important prediction in education which I received in meditation: Already government has a machine, they are doing printouts of pictures (thought-forms) into TV monitors--What you think about is printed out.

Life-Style: A new dance craze will be sweeping this country soon.

Designer's clothes will become more "tight fit" style with sharp, abrupt cuts.

Greater pressures will be felt in the next several years between the positive and negative forces in this country.

Warlike uprisings among our own people will occur.

Coming to the Meat Market: Buffalo steak, snake meat. Efforts will be made to cross-breed the buffalo and beef animals with a successful new hybrid.

Space Program: Tragedy for July space shot. Some type of explosion. All may not return. This will bring controversy. Another attempt in space will be delayed three years. New design of space vehicle and landing docks will be forthcoming out of this experience.

Energy: America will tighten belts as we go into January-February of 1976. Fresh fruits and vegetables will be sky high. Other commodities will go out of reach for the average household.

Medical: More radical surgery and chemotherapy will be utilized on animals. Shocking discoveries will be made. Animal lovers in this country will make demands on Congress to pass legislation to protect certain animals.

I received this message November 4, 1971 on the educational field: Tremendous strides and radical changes will come into being fifteen to seventeen years from now. We will enter the "mechanical age" for educating people rapidly through the flash system and photo system. Semi-trance levels will be utilized to increase capacity of learning power. Chemical drugs will come into use to bring about a trancelike state. Of course, with drugs there will always be unexpected incidents.

The field of specialist will take on new meaning, there will be so many branches it will behoove one to know which field to go into. Extreme mechanical tests will be set up for your abilities and you will be graded mechanically to that. Once categorized you will find it extremely difficult to change it. Job categorizing will become almost robotlike.

We are coming more and more into the era of automatic programming of the human mind (conscious part).

In the year 1984 America will reach a peak of trouble. We will either stand united or fall.

CHAPTER 35

DR. ERNESTO MONTGOMERY

The Amazing Black Psychic

Dr. Ernesto A. Montgomery, who holds a degree in psychology, was born in Kingston, Jamaica, British West Indies, of Royal Ethiopian parentage. He was educated in the West Indies. After graduation Dr. Montgomery served with the British Armed Forces and with police departments in Jamaica and Dallas, Texas.

During his work in law enforcement, Dr. Montgomery used his powers of extrasensory perception to assist in the apprehension of criminals.

"Since I was five years old I have been known as a person with a special gift," Dr. Montgomery said. "During my tenure with the Dallas Police Department, I made predictions that a President would be assassinated in the city."

The prediction came true and several years later President John F. Kennedy was killed at Dealy Plaza in Dallas.

A Dallas newspaper published an article about Dr. Montgomery, commenting on his ESP ability and his practice of faith healing. Reverend Ernesto, as he is called, conducted a recent ESP lecture and faith healing demonstration at the University of Nevada.

Dr. Montgomery conducts lectures and demonstrations throughout the United States under the auspices of the Universal Metaphysical Church, of which he is the founder and president.

"I predicted the assassination of President Kennedy, Dr. Martin Luther King, Senator Robert Kennedy, and the Sharon Tate murders," reported the black seer. "Prior to each of these events I tried to warn the subjects of impending danger."

Dr. Montgomery also believes that Senator Ted Kennedy would have been assassinated if he had attended the 1968 Democratic Convention in Chicago.

"I warned the Federal Bureau of Investigation and Senator Kennedy's office of my forecast," Dr. Montgomery stated. "I believe my warning was responsible for the decision Mr. Kennedy made to stay away from the convention."

As a 10-year-old boy in Jamaica, Ernesto astonished his schoolmates and teachers by predicting the start of World War II. "I was attending the North Street Congregational School in Kingston," he recalled. "I didn't fully understand my gift of prophecy at that time, but I know instinctively that the war would start and the United States and England would be involved in it," he noted.

"When royalty visited Jamaica I was called upon for prediction and counsel," Dr. Montgomery stated. "Former Prime Minister Winston Churchill, Anthony Eden, and King Farouk of Egypt have received my predictions and advice. The predictions I made for them proved true."

During his career as an officer with the Jamaica Police Department, Dr. Montgomery reported that he was granted a study leave to observe practices of police agencies in America.

"I was welcomed to Dallas by Police Chief Jesse Curry," he reported. "I informed the Dallas Police authorities that a President would be killed in the city. In fact, they were skeptical. I pointed the exact spot on a city map where the assassination would occur."

"A photograph was taken and published," Dr. Montgomery continued. "This picture showed me pointing out to police officers the exact spot on Dealy Plaza where John F. Kennedy was later assassinated."

A slim handsome man with a quick grin and a broad smile, Dr. Montgomery believes that man has the power to change the course of events.

"Human movement and the element of time and space can change events," he explained. "The free will that God gave man can change the events of the future and prove a prediction to be untrue. When a prediction is concerned with death or disaster, I am always thankful that events are changed by man so that I may be considered in error."

Dr. Montgomery's psychic impression comes to him in two forms. The first is a vision when he goes to sleep. "Once I am in a slumber, a revelation will be revealed," he said. "The other method is called psychic insight. I place myself in what is known as a transic state. That is to say, I am hypnotized into a deep and continuous concentration by focusing upon a particular problem.

"With reference to my psychic insight," Dr. Montgomery

explained, "I do see a day, date, and time. This is as if I was in the waking state and sitting before my television set."

Readers may write to Dr. Montgomery at P. O. Box 19549, Los Angeles, California 90019.

Dr. Montgomery's forecasts for 1976 are:

Inflation and the Economy: There will not be much relief for the nation in 1976 with regard to the economy. The price of consumer goods will continue to rise. Government employees and other workers will demand exorbitant raises in salary. However, such additionl money will be of no avail to the receiver, as it will be literally wiped out by the continuous grip of inflation.

Stock Market: There will be a general decline in the stock market. The first eight months of 1976 will be bad for investors.

Gasoline Shortage: There will be a gasoline shortage emerging in May 1976. There will be a boom in the sale of compact cars, owing to their ability to conserve gasoline. Gas rationing will be instituted and industries will be hard hit through lack of fuel.

War: The Middle East crisis will continue. The United States will agree to assist Egypt financially. This will allow Egypt to repay her debt to Russia. There will be a temporary warm relationship between both countries until the Egyptians, joined by Syria and Iraq, suddenly declare war against Israel. The Israeli Air Force will paralyze Egypt by knocking out 20 per cent of her industries and military installations. Russia and the United States will hurl threats of annihilation against each other. They will accuse each other of instigating the conflict. As a result of the crushing defeat administered by Israel, many Egyptians will demand that President Sadat resign. He will refuse to do so and Egypt will be embroiled in civil disturbances.

Tidal Wave: A tidal wave will hit Bangladesh and 10,000 persons will disappear and be presumed dead.

Riots and Looting: The unemployment situation will reach its zenith in May 1976 when thousands of unemployed citizens will march on Washington demanding a solution to the problem. Riots will rage in Los Angeles, Oakland, San Francisco, Dallas, Washington, and Memphis. The National Guard will be called in to restore law and order. There will be bloody confrontations between police and rioters.

Politics: A leading senator will be found dead after drinking himself to death; three others will die mysteriously in Washington.

Senator Ted Kennedy will be the Democratic candidate for the 1976 presidential election.

Tornados: Violent thunderstorms and tornados with heavy rain will bring destruction and havoc to many areas of the nation. Flash floods will drown many people in Miami and other sections of Florida.

Memorial Day: Memorial Day 1976 will be a sad day for many families. Six hundred and fifty persons will be killed and another thirty thousand injured in automobile accidents that day.

Famine: Famine will hit Tibet, Bangladesh, Mali, Senegal, China, South Vietnam, and Chad. The US will rush relief supplies into these areas. Domestically, a controversy will arise as many civil rights leaders accuse the government of hypocrisy, indicating there are millions starving within the United States. Instead of shipping food to the hungry overseas, they will contend that the hungry at home should be fed first.

Pollution: The Pacific Ocean will die from pollution from industrial wastes dumped into it. All forms of marine life will be killed by the waste.

Kidnapped: US ambassadors in Jamaica, Guyana, England, France, and Belgium will be kidnapped and held for ransom.

Prince Charles of England, heir to the British throne, will also be kidnapped.

Refugees: Ten per cent of the Vietnamese refugees now in the United States will demand that the United States return them to Vietnam. They will claim they were duped or kidnapped and forced to leave their country.

National Disasters: An armed nuclear missile will hit the United States, wiping out an entire area. An atomic underground blast in Nevada will backfire, sending out shock waves of destruction throughout the area. Homes will be lifted from their foundations. Huge cracks will appear on the Earth's surface, paralyzing Las Vegas.

New York, Chicago, and New Jersey will be affected by a giant power failure. Elevators will be stuck with passengers for almost twenty-four hours. A preliminary investigation will reveal an act of sabotage. The Pacific Palisades section of Los Angeles will be hard hit by landslides. Several homes

with prices ranging from $100,000 to $400,000 will either be swallowed up by mud or completely destroyed. Hundreds of families will be homeless.

Celebrities: Actor John Wayne will be appointed "Honorary President" by the Ex-Vice-President of South Vietnam. A Vietnamese city will be created and built in Arizona.

Actor Bob Hope will be hospitalized with an eye injury. His doctors will recommend surgery; their advice should be rejected. According to my psychic impression, if the operation is performed he will lose the sight in his eye permanently.

Actor Sammy Davis, Jr., will collapse during a performance. After hospitalization and tests it will be found that he is suffering from exhaustion.

Ex-President Nixon: Former President Richard Nixon will be completely recovered from his illness. He will be offered and accept a job at a university on a part-time basis teaching political science.

I Predict: Russia will attempt to launch a surprise atomic attack against the United States.

I Predict: Princess Grace of Monaco and Prince Rainier will separate. She will remain an occupant of the palace, but will not share the same bedroom with the prince.

CHAPTER 36

SHARON NACCARATO

The Astrological Psychic

Sharon Naccarato, author and astrologer, is a Piscean born March 8, 1936. True to her sun sign, she has written the first children's book on astrology, *Once Upon a Zodiac*. This fantasy teaches beginning astrology in the form of a fairy tale. The book has been well-accepted nationally and internationally by children and adults. The book is being used as a text in many universities throughout the country. It is published by Sharvic Publishing Co., P. O. Box 15887, Salt Lake City, Utah 84115.

Sharon is currently writing a book on medical astrology and is involved in research in astrology and criminology. She was a psychology major while at the University of Nebraska. Sharon began her study of astrology fifteen years ago. She has found the combination of psychology and astrology invaluable in her personal consultations. Unlike many well-known astrologers, she still fits personal, business, and astro-economic readings into her busy schedule.

"Many astrologers dislike reading and prefer to research, teach, or write, but it is the personal contact and the ability to help others that makes you a good astrologer," Sharon said. "When my clients used to ask me if I were psychic, like any well-schooled astrologer I would claim astrology was purely scientific. As time has passed I have begun to realize that I have used a little of both in my profession."

Sharon and a partner operate the Inter-Mountain School of Astrology in Salt Lake City, Utah. For a number of years she had an occult bookstore in this city. Well-schooled in all forms of metaphysics, she has taught accredited astrology and metaphysical courses at Westminister College in Salt Lake.

She is currently working with police departments in solving crimes and juvenile problems with astrology. She is doing research on the use of astrology in criminology; it will be ready in 1977.

Sharon has worked in public relations and copywriting for a number of years. She commutes between Salt Lake City

and Los Angeles, where she serves as astro-business consultant for a number of corporations.

Sharon does business readings; she does not do personal reading by mail. Her address is 5263 Gravenstein, Murray, Utah 84115. Her forecasts are:

There will be a greater concern for the health and welfare of the American people. A great breakthrough will take place during 1976. This discovery will be a cure for a destructive disease currently taking one out of four lives in our country. Scientists will be able to regenerate destroyed cells within the body.

The entire country will move toward a socialist health program. We'll see bills introduced to have Medicare extended for all people, just not the aged. The doctors who threaten strike in the summer of 1975 due to high insurance rates will get protection from many of these problems. However, these same laws will limit their income in a more socialistic form of medical care.

To the delight of the proverbial "dirty old man," an electronic device will appear to insure a full sex life as long as it is desired. This device will be inserted into the body by minor surgery. Only the patient will know his secret.

Illness and disease will be diagnosed by computer. This will be done by a staff of paramedics. In the future, the doctor's role will be to treat this diagnosis, releasing MDs for more valuable tasks. This program will be very successful. More paramedics will appear in 1976. Much treatment now being given by the MD will be turned over to them.

A new life-saving device will be invented to allow patients the choice of avoiding surgery. This device may be an adaptation of the laser.

Economic conditions will be difficult during 1976. Cutbacks in school, park, and recreational funding will occur. The value of gold will drop. We will find the United States' plan to dump the gold standard a very wise and beneficial move. Gold will not be recognized as a legal exchange for the next few years.

The black people will have a new spiritual leader to replace Martin Luther King. A black candidate for Vice-President will appear in 1976. Airlines will cut back on luxuries and have a lower fare to maintain a profit margin. The recreational industries will suffer greatly. Companies dealing

in sport vehicles and travel trailers are just beginning to feel the real pinch.

Marriage laws will change. More states will institute common-law unions to protect dependent children as the squeeze hits the welfare funding. Open marriage is fading where children are involved.

Our juvenile courts will issue stiffer penalties to offenders that have gotten off because of youth. More states will hold a child responsible for his actions rather than penalize the parents.

Women's lib will become more forceful and aggressive in 1976. Women will fight back as they are blamed for juvenile problems, financial crises, and soaring unemployment problems. These claims will be made by politicians. The battle for equality will continue during 1976 and 1977. We may witness a walkout by the housewives of America. Women will find that they have gained equal rights but have lost many of the privileges.

Television will encourage the lack of violence in programs viewed by children.

April and May of 1976 will begin another battle between the press and the government. The press will expose an involvement between the US and a foreign power. There will be an attempt by the government to kill the story. This event will result in legislation to limit the press where national security is at stake.

The entire stock market structure is in for a change. The claim that large companies have suffered huge losses the past few years will be exposed. Taxes will soar in a short time for large corporations. The very rich will be poorer; the poor will stay that way in 1976. There will be increasing taxes to support welfare programs. There will be greater concern for the aged, rather than the youth.

Churches which have operated big business under a tax shelter will be made to pay up. They will be watched very closely by the government.

Foreign affairs will come to a head in the fall of 1975. A sudden action toward the US will change our approach toward foreign aid. This event will binge on a treaty or promise made by the US to foreign powers nineteen years ago.

Relief from our financial crisis will not come in 1976. However, if it is any consolation, the rest of the world will be

undergoing the same pains. Our dollar value has been suffering for the past few years. There will be a restructuring of world economy. Next year you will see a move to a standard worldwide currency.

A gas tax on luxury vehicles ("luxury" will be dictated by the government) will be imposed. Owners of sport and recreational vehicles will pay an exorbitant price to enjoy their machines. All luxury and entertainment items will feel the tax pinch.

Telephone, electricity, natural gas, and the mails will be more costly during 1976. Student problems will arise as college and educational fees rise and federal and state funding is cut back.

Great Britain: In the struggle between Great Britain and Ireland, the summer of 1975 will be the turning point. Throughout 1976, they will begin to settle the problems of the past. The British will allow Ireland to operate independently. During 1976, Britain will undergo many economic problems. Their problems will continue with greater intensity throughout 1977. 1976 and 1977 will determine whether Elizabeth will be the last to hold the throne in Britain.

Canada: Canada has undergone many of the same economic problems that the United States has. However, the Canadian government will continue to expand world trade in 1976. They will end their economic problems before the US does. Although relatively new in the world trade market, Canada is becoming a world power. Canada has handled its form of socialism well. The US may look north for many guidelines in the future.

The United States and Canada may unite as Canada has a showdown with Britain and withdraws from the Commonwealth. This is a few years away, but 1976 will be when Canada begins this change.

USSR: The USSR will have a new leader in 1976. This man will rule with an iron hand in order to control unrest in that country. He will, however, gain total loyalty from the people. He will be greatly admired and respected throughout the world.

Agreements made by Russia in the past will be radically changed as it takes a new approach to world affairs. Under their new leader, Russia will become socialist in reality. A showdown between China and Russia is a year or so away; it is inevitable.

The People's Republic of China: China will appear to be more agreeable than in the past. They will open doors that have been closed for many years. Russia will warn the world that this is an empty gesture. This will happen in the fall of 1975 or early 1976. At this time, Russia may make a power play with China. The Russian warning and show of force will fail. China will then begin a move for world power. At the end of 1976, other countries will realize they have been duped. China will become a great threat to world peace throughout the decade. Their actions will be erratic and terrorize other nations.

France: France is doomed to a national economic crisis and a battle for leadership. The people will not tolerate these difficulties. France will lose its position in world politics. We will see conditions similar to Greece and Italy in this country.

Israel: Israel will lose a leader at the end of 1976 or in spring of 1976. This will usher in many problems to be faced for the next two years. Expenses in the country will rise, funding from friendly nations will be withheld. A number of tactics used by Israel will be condemned. Israel will be called to task by other nations. Israel will lose many friends during 1976.

United Nations: The United Nations will face total change to survive. It will become involved in the monetary currency crisis. This will place it in a difficult position. Look for a struggle in the United Nations from the fall of 1975 until fall of 1976. It will create a new role or fail.

General Comments for 1976:

This will be the year of the "merry widow." Many prominent men will pass away leaving some very powerful, wealthy widows.

Bank interest rates will be erratic and will frighten the depositor. This will cause huge withdrawals in savings accounts in the summer of 1976 as the stock market takes on a shaky picture. People who remember the "crash of '29" will be uncomfortable. Concern over world food shortages will be transferred to the economic standing of the country and the value of our dollar in world trade.

The weather will be difficult in 1976. Expect a late, wet spring to create problems with crops. We will have less sunshine in the next 2 years due to late springs and early falls.

Countries operating under monarchies will find their governments shaky in 1976.

Birth control methods will be enforced in many countries. They will become more widely used as the discovery of a more effective form of control appears in 1976. This method could be used by the male instead of the female.

Many privileges allowed the youth of the world (at least in the more affluent countries) will be curtailed.

Fashions will change. The youth culture will return to short haircuts. The mad rush to college will slow down. Reports in 1976 will show that a college education does not insure success. Since school funding will be slashed, the cost of a college education will soar.

Many athletic programs will be axed in public schools and colleges. Funding will be provided only for activities where both sexes can participate. 1976 will be a bad year for the "jock" who is counting on athletic ability to underwrite his schooling. Many commercial sports will suffer as the "take" at the gates will be down. There will be a number of exposés linking professional sports with the underworld. Some popular sports will be looked at with a cynical view.

Politicians:

Rose Kennedy could be very ill in October-November of 1975 and January of 1976 due to an accident during travel. This could be an injury to her back. She will have a difficult time with her recovery and will be out of the public eye until the summer of 1976.

Barry Goldwater will once again play an important role in national politics. He will be very active in the 1976 elections and gain new respect from the American people.

Ronald Reagan could easily be a candidate for Vice-President, perhaps even President, in the coming elections. His cutback in educational spending in California will be a guide for the rest of the country in 1976.

Gerald Ford will not serve another term. There are surprises in store for Mr. Ford and the American people as far as his personal life is concerned.

Hubert Humphrey will have some serious health problems in 1976. He will not be as active as he would like to be.

Richard Nixon will have continued health problems in the fall of 1975. In 1976, he may make public many details about the past as he fears his health will continue to deteriorate. Watch April! What Nixon makes public should be considered "tongue in cheek" by the public.

John Mitchell will marry a much younger woman. This may be a romance of long standing. He will attempt a new start but will never overcome the stigma of Watergate.

Eugene McCarthy will never enter the political scene again. This man's reputation will last long after he is gone. He will be seen in a different light.

John Lindsay will have health and financial problems in 1976. If he keeps everything aboveboard in 1976, he'll be safe. However, anything under the table will be exposed in 1977-1978 and lead to his public downfall.

George McGovern could stick his neck out in January, February, and March of 1976. His time to shine is a few years away; the first few month of 1976 could come back to haunt him at that time.

Henry Kissinger will overcome all attempts to smear his name in 1976. This man will continue to be a great asset to this country. Kissinger could be an expectant father in 1976. His importance to the United States will continue into 1977 and 1978. However, confusion during travel and threats to his life may occur during 1976.

Fidel Castro will find his popularity fading during 1976. Rules, restrictions, and regulations made by Castro will not sit well with the people or government leaders. In 1976 Castro will begin the groundwork to assure his replacement. This could take place in 1977.

Shirley Temple Black will change her tactics and move to a bigger, better political career in the government.

Edward Kennedy could certainly be a candidate for President in 1976. It will be a force play by the Democratic party. A draft is not out of the question. It looks as though this man will be President in the future in spite of himself. This is not a front on Kennedy's part. He really doesn't want the responsibility at this time. The health of Kennedy's son could be serious during 1976, especially around election time.

Ralph Nader will rise again in 1976, gaining popularity with the American public. Watch this man! There is more to come in the future. He is a true idealist and this can sometimes get you into trouble.

Nelson Rockefeller will retire from his governmental role after the 1976 elections. Rocky is a misunderstood man. This has always been the case. Due to grave disappointments, he has suffered the past few years. Rockefeller will write one of the most informative and important works of our time. He

will begin work on this in 1976. He is extremely creative and has never expressed this side of his nature publicly.

Predictions for 1976 in the Entertainment World: All movies, plays and TV will take on a more serious role with more philosophical material. Programming for children will emphasize the "Walton theme." Political exposé and meaty news specials will continue to haunt the government in 1976. This will cause a showdown between the press and government.

Mae West will be confronted with a number of serious health problems during 1976. However, the public will see Miss West make a grand appearance during the year.

Fred Astaire will have grave health problems during 1976. Recovery will not be easy.

Lawrence Welk will appear publicly during 1976. He is preparing for total retirement in 1977. If you want to see him, do so in 1976.

Bob Hope should prepare for an exposé in 1976. Hope is in for some serious question-and-answer sessions regarding his political involvement.

Bing Crosby may stage a slight comeback during the spring of 1976. His health will be under pressure during the remainder of the year. Crosby will not recover as might be expected.

John Wayne will retire during 1976 due to bad health. Speaking roles will be impossible for him. Expect Wayne to marry in 1976 to a younger woman of foreign background. This will turn a few heads.

Milton Berle will be unable to continue his career in 1976. His health problems will occur in the summer of 1975. They will take their toll in 1976.

Katherine Hepburn will make the most monumental showing of her career in 1976. She will be lauded by the critics and applauded by the audiences. Expect a book by Hepburn to be released in 1976.

Kate Smith will be having problems at the end of 1975. During 1976, this superstar will shine again. You will see more and more of Kate Smith during the year.

Lucille Ball will retire. She will not make any appearances during 1976. It will be concealed that her health is poor. This will cause her retirement.

Watch Glenn Ford do it again. Both Ford and Anthony Quinn will be hotter in 1976 than they have been in the past few years. They will be playing new roles and changing their

images. With this change, people will clamor for their pictures.

Joey Bishop will appear in a serious acting role in 1976. He will be very successful and popular with the public.

Ann Landers will undergo some serious problems with her editors. Her long-standing advice column will disappear in 1976. However, she may contribute serious work to the publishing world during the year.

Billy Graham could be surrounded by a public scandal involving his finances and funding. This will not shake the faith of his flock. It will set him up for public ridicule. Graham will retire at an early age. This retirement will be prompted by the findings in 1976.

Deborah Kerr will begin a new movie which will show great promise. She will be very excited about the prospects of such a film. However, due to grave personal and health problems, she will not complete the film.

Shelly Winters will become very slim and trim. She will be playing a role that is a lifetime dream. There may be a rumor that surgery helped Shelly with her new appearance; the rumor will be correct.

Watch Henry Mancini in 1976. He will begin work on his most memorable contribution to the music world.

Merv Griffin will be offered a new show which will deal with documentary and news information.

Dick Cavett the family man may not remain that way in 1976. This event will change his image, but will not hurt his public standing.

Jack Nicklaus is onto bigger and better things. Professional golf will not be his thing in coming years. He will be very fortunate in a new acting career.

Muhammad Ali will suffer a serious upset in 1976. This will result in a serious injury and may prompt Ali to retire. He will remain a public figure in the years to come.

Cher Bono will marry a most unlikely choice. This will not please her followers. She may fade from the scene for a couple of years only to return to bigger and better things.

CHAPTER 37

TED OWENS

Predictions from the PK Man

". . . President Nixon will not end his term in office. Something most unusual will occur, and he will either resign or be forced out of office."

This forecast by Ted Owens was made in our 1971 compilation of predictions.

Ask Ted Owens where he receives his prophetic ability and he mentions the "SIs."

SI are the initials for "Space Intelligence," according to Owens. He reports he first came into contact with the SIs when he was living in Ft. Worth, Texas. Owens and his daughter were out for an evening drive when a cigar-shaped UFO appeared over their car. The craft was silent, but colored lights flickered from the inside of the ship.

Owens explained there was no dramatic face-to-face confrontation with spacesuited UFOnauts. "From that day my life just changed radically," he related. "The SIs do the planning and execution. I am their go-between, a middleman to assist them."

Owens points out that he has mental contact with the SIs, who allegedly use his brain as a receiving station for their telepathic messages from outer space. "Their purpose in doing certain things is to make the people listen," Owens said. "As an example, I've controlled a government radar station, making images appear on the screen, in an experiment with PK—psychokinetic power."

Ted made a trip to Europe last year and reports:

As you know, I am called 'The UFO Prophet'—because I allegedly (as far as my critics are concerned) work with, and for, UFOs. They modified my brain long years ago. In 1965, the UFOs told me to go to Washington, D.C., and ask the CIA and NASA to back me financially to go to Europe to old haunted castles to have my brain modified once again.

"CIA and NASA, although fascinated, spent hours with me but politely refused. This year I took a plane to Inverness, Scotland, and on my first two nights witnessed many UFOs. The Loch Ness Monster stuck its neck and head up out of

the water and stared at me for five minutes. The third night in an old haunted castle in Scotland a UFO came right over me. I reported it to witnesses. The next day it was reported that many other people saw it. Newspaper reporters converged upon me. Stories were done on my work in Scotland.

"Meanwhile, while all this was happening, the UFOs (SIs) were changing my brain. One morning when I prepared to shave, my eyebrows had changed to gray hair! Before this, they had been a deep red color! So, the powers that the UFOs were using were doing something to me. I then went to England to visit Stonehenge. I was told by the UFOs telepathically that Stonehenge was a psychotronic machine with other-dimensional powers planted in it. It could be activated by me since I had a half-alien brain. They instructed me in the "triggers" necessary to activate it and I did so. (Somehow I got the impression that my activating Stonehenge was more important than anything else.) Night after night I went, alone, to dark, haunted hills and castles, after midnight. Many UFOs came out where they could be seen and heard! I even got their sound onto tape! On the famed Cradle Hill, outside Warminster, England, a UFO came down right to my location while I had my tape recorder working. Its sound on my tape machine is like a cross between a bird and an animal."

Readers may write Ted Owens, Box 48, Cape Charles, Virginia 23310. His look ahead to 1976 is:

Will 1976 be the year of the UFO? Definitely so. UFOs will appear in ways they have never appeared. The United States will discover that UFOs can save it, or it will allow itself to become destroyed.

I predicted all that is now happening in the economy in *Predictions for 1971*. I predict much worse for the future. Businesses will crash and fade out on a huge scale. Unemployment will keep going up. 1929 and its hard times will seem like "the good old days" compared to what is coming up.

More bank presidents and officials will begin to take the money and run. More banks will fail in 1976. The stock market will grow worse if that is possible.

The US dollar will shrink in value. Its value will grow less overseas. American credit will shrink and fade overseas. Foreign countries will deride American visitors and their "funny money" from America.

New auto sales will drop like a rock in 1976. The auto business will be in terrible trouble, almost wiped out. In a way this will be good because minds here and there will turn to devising better, cheaper autos with new power sources.

US railroads will go broke in a big way and practically cease to exist. The government will not be able to pour in the billions necessary to keep them alive.

Small businesses all over the US will be wiped out on a grand scale in 1976.

Giant corporations will resort to crooked shenanigans to stay in the game. Even so, many will go under.

I predict a catastrophic economic year for the United States in 1976.

The weather will be worse than it has ever been. More tornados, storms, floods, dangerous hurricanes, disastrous droughts. As the economy goes haywire, weather will follow the same trend.

I don't see "politics as usual" in 1976. There is a revolutionary trend brewing. The Republicans and Democrats will be confronted suddenly by new parties. One of the new parties may win with its candidate. Republicans and Democrats will change over and vote for an honest man.

I don't see Ford becoming President.

I do not see Wallace becoming President. I see him ill; he'll be lucky just to be alive.

I do not see Reagan becoming President.

I do not see Rockefeller becoming President . . . by vote of the people. It might be handed to him by Ford—but not by popular vote of the people.

I do not see Jackson becoming President.

Before closing the door on politics I predict that we do not need a President. We need a panel of righteous men to govern our country. The entire political system of our United States will be thrown in the scrapheap. The system we have is geared to another time and is totally irrevelant to our present needs.

I see a revolution taking place in the United States. I smell it coming, psychically. People will rise up and throw out obstacles to the progress of our great country. It will be bloody, loud, and destructive.

Watergate: It will be amazing how many of these Nixon people commit suicide, die of accidental drowning, or fall out of windows. The Rich Gang will do a clean-up job to make sure that they never talk. And that includes Nixon and Kissinger.

Fashions: These will run to sexiness and nudity. Look for sheer, filmy, see-through clothing. This trend will begin in 1976. Some fashion houses will try to push long, bulky dresses but women will go out and buy the sheer dresses for sexual impact.

An entire new educational structure will be designed and put into operation. The new system will do away with tests. It will be revolutionary in scope, giving students more freedom to think and be creative.

Bands will make a comeback in 1976. Really good small jazz combos will make a comeback.

Food and shortages should be lumped together. There will be vast food shortages in 1976. Money will be scarcer and so will food.

Economic Depression . . . mentioned earlier: The US is in for a barnburner, rip-roaring, tear-down-the-house Depression. New York is going broke, and the entire country is going to follow.

The government smells revolution brewing and in 1976 will do all in its power to scare people into line with government thinking.

There will be radical Earth changes all over the world, including the United States. There will be a tremendous quake on the West Coast in 1976 or possibly just before. It will be the granddaddy of all quakes. Packs of tornados will rake the land in 1976.

Drought and flood will sweep the United States as nature attacks.

International affairs is a dilly! In 1976 in England, France, Germany, etc., if a child says the word "American" his mother will wash his mouth out with soap! The countries surrounding us will show their hate and disgust with everything American. The US government is going to take one whale of a beating in 1976. Other countries will throw out our military bases, curtail our tourist activity, and so on. Our American dollar will lose its power overseas. American tourist travel will slow down to a trickle.

The Psychic Scene: This country has some of the finest psychics in the world, yet does nothing with them. Organized, psychics could be a priceless help to our government, not only in national and international emergencies, but in long-

range forecasting. Years ago I wrote to President Nixon (excuse the expression) and offered to organize all the great psychics in the land. I'd get Geller, Dixon, Doc Anderson, Gypsy Markoff (Countess Amaya), Hurkos, and others in the psychic field together as one superpsychic team. We'd help guide the United States through times ahead. The government would put up salaries for these top psychics so they would not want. They could devote their energies and time to helping the United States. This superpsychic team would be invaluable to the United States! Now, each psychic is helping an individual here or there with psychic powers. But the total picture would be much better if the psychics banded together to become a powerful psychic force.

Earth humans had better stay out of space. The UFOs have drawn a line and said: "Do not cross this line into outer space." The UFOs take a dim view of our bringing human misery, war, crime, and corruption of every kind onto the Moon and other places. They have warned that they will attack our spacemen if it is tried.

Investments: Very simple! Sell your stocks and bonds as soon as possible. Get as far away from the stock market and investments as you can. Do not invest; get what you can in your hand and hold onto it, for all you are worth!

The UFOs are going to kick the slats out of Texas and Nevada. I personally would not want to be living in these two states. Other "bad news" places: Florida, California, Illinois.

Farming will get worse. Big corporations are shoving out the little farmers. Nature is on a rampage, causing drought, floods, blight, livestock diseases, wild storms. I see less good food available to the people . . . a bleak farming picture.

Interest rates will zoom out of sight.

Disasters: Tremendous floods and tornado attacks in the Midwest. Huge quake on the West Coast. Roaring fires, unprecedented, on the West Coast, out of control. Outbreak of devastating disease in Texas and Florida and perhaps California. A giant hurricane or two smashing in from the Gulf Coast.

Crime going higher until even schoolteachers, policemen, and the like are apprehended for committing crimes.

Consumer Affairs: The giant corporations will be unable to block off knowledge of their corruption of products. The public will really get an education in 1976.

Mental Health: A tremendous surge of mental breakdown

is coming in 1976. Human brains are being deprived of life-giving oxygen on a grand scale. This will lead to massive breakdowns of the human mind.

Fuel and Energy Crisis: Another crisis in 1976. As the Arabs get madder at the United States and Kissinger, they will sublimate their emotions through cutting off essential fuel.

Employment Prospects: Nil, and getting worse. Over a year ago I predicted 10 per cent unemployment in 1975. My critics fell off their chairs laughing at me. It's 9 per cent now and escalating. I predict 15 to 20 per cent unemployment by 1976 or worse, even.

CHAPTER 38

DR. JOSEPH PINKSTON

Yoga and ESP

Dr. Joseph Pinkston teaches metaphysical development and ESP by using yoga. A lecturer, healer, and teacher, Dr. Pinkston gives readings by appointment only. He may be contacted at 2453 N. Orchard Street, Chicago, Illinois 60614.

Dr. Pinkston's forecasts for the future follow.

I feel the United States will get involved in a war in the East.

The next President will be George Wallace.

There will be a chance of living longer. Sixty years will be added to man's life by medical science.

There is going to be a change in the educational system in 1976.

We will be able to grow two crops a year if it is left to people in parapsychology science, by picture or thought projection.

There is going to be a great change in the weather. We will have no spring, just summer and winter.

We will try to build outer space living for people.

There will be a lot of investing in the United States gypsum for building.

Interest rates will drop real low.

We will see up and down trends in economics.

Crime will hit all-time highs in 1976.

I see earthquakes in Texas and Mexico and South America.

There will be a lot of tornados in the South, and floodings.

There will be a WPA started in 1976 for the unemployed.

Some trouble will take place with the space program with Russia and US.

CHAPTER 39

JUDITH RICHARDSON

Aura Reader

Judith Richardson is an internationally known psychic who resides in New Castle, Delaware. She is primarily an aura-reading psychic. Her psychic ability dates back to when she was two. At the age of eight, she suddenly realized, not that she was different, but that everyone else wasn't the same. She is best known for her ability to "read" people, to tell them things about themselves, past, present and future. After several thousand readings, her accuracy in this area ranges from 84 to 90 per cent.

She has made and documented many predictions, including the Los Angeles earthquake in 1971. This prediction was made three days prior to the event in the presence of nearly a score of people which included several people from the radio and news medias, several doctors, and two attorneys. In addition to pinpointing the location, she also forecast the number of fatalities to within one or two persons and the quake's measurement on the Richter scale.

Among other predictions made by Mrs. Richardson were the deaths of Charles DeGaulle and Nikita Khrushchev, the severe spring weather conditions in the United States two years ago, the Watergate scandal, and the outcome of presidential elections, starting with President Kennedy's election.

Mrs. Richardson has made numerous appearances on radio and television and previously had her own show, "Psychic Scene," on Channel 5. Mrs. Richardson is a trance medium and has participated in numerous seances and has also had some experience with psychometry. Her interest in the field of parapsychology ranges from ghost-hunting to spirit communication and from reincarnation to life after death. Mrs. Richardson has worked with several state and local police agencies on cases ranging from arson to homicide and has helped find missing persons.

Because Mrs. Richardson is an aura-reading psychic, she is able to take a photograph of an individual and "read" from the individual's aura about his present, past, future. This is

how a great deal of information has been obtained about well-known figures. For instance, Mrs. Richardson knew that Jackie Onassis would not divorce Aristotle Onassis (when many other psychics had said she would). Mrs. Richardson saw that Jackie would be a widow and would marry again, extremely well, and that it would be very happy for her this time.

Born in Philadelphia on March 10, 1944, Judith Richardson, in addition to taking care of her home and family, devotes much of her time to lecturing, giving private readings in her office, doing telephone and mail readings, and conducting seances. To contact her, write to: Judith Richardson, Frenchtown Concourse, Suite 6, 191 Christiana Rd., New Castle, Delaware 19720.

Mrs. Richardson's technique of reading auras from photographs and answering questions enables her to reach clients throughout the world. A large percentage of her work is done in this fashion. Her predictions for 1976:

Even though Mr. Ford claims he is going to run, last-minute changes in bis personal life will prevent him from running for the presidency. I further feel that Nelson Rockefeller will be our next President.

A cure for arthritis will be found in 1976. I feel that arthritis is caused by a virus. Once they isolate this virus, the cure for most major types of arthritis will be discovered.

There will be a definite cure for three major types of cancer in this up-and-coming year.

There will be severe weather conditions in the United States in 1976. Droughts will be prolonged and a great deal of damage will result. The hurricane season will be unusually high with a great deal of damage. Tornado damage will also be extremely high. Large numbers of crops and livestock will be lost due to severe weather conditions in the United States.

UFOs: We would be small-minded to think that we, one of the younger planets in the solar system, are the most advanced. I further feel that UFOs have made contact with Earth and consider it a very primitive planet of no threat to them whatsoever. There is definite proof of the existence of UFOs, but people are not ready to handle the information. It would perhaps cause panic, because many people can't comprehend life on other planets and solar systems. We will be shown definite proof in the next five years about UFOs.

The situation in Israel will be coming to a more peaceful

solution over the next three years. There will be small outbreaks; they'll be bloody, but small. There will be some peace for the people of Israel before the seventies are gone.

There will be a death in 1976 of a high official in Russia. This will create a great deal of turmoil for other countries; it will not be long-lasting, but it may be uncomfortable for a short period of time.

Many people of limited psychic ability, those who feel they have more than they do, charlatans, and frauds will surface over the next few years. There should be some kind of licensing or testing of people in this field. A great deal of damage can be done to people who have faith in psychic ability. A psychic predicts things that will not take place. A true psychic is one who can show you the path on which you are traveling. (The decision is entirely yours. You can go left or you can go right, but the decision is yours to make, and the true psychic will give you what is coming. We have a "free" will, and we should exercise this.) It is wrong for people to have 100 per cent blind faith in another individual. I feel that there are so few things predestined; simply by having a little advance warning of what's to come, we can change our lives. We can stop or try to change what we don't want and help along the things we do want.

The United States is not far behind the Russians in the study of parapsychology. Many experiments being conducted in the field of parapsychology in the United States are being kept quiet until more proof is found.

President Nixon will not live beyond the end of 1976. His blood circulation will continue to be severe health problem.

By 1976, George Wallace will be very mucb in national politics again. I do not see him walking unaided, but that will not hinder his making moves toward the presidency.

A high-ranking official in a labor union will expire before the end of 1976. There will be much upheaval with his successor.

The national economy will start lifting upward around May of 1976. However, it will take almost three years to pull out of this difficult time. There will be some inconveniences obtaining certain foods for the next three years at reasonable prices. However, I do not see a major famine in the United States as many psychics are predicting.

Howard Hughes will be in the news a great deal. This will not be a publicity stunt, as some people will suggest. Towards

the end of 1975, his health will be suffering. He will be going downhill with probable hospitalization in 1976 and possibly even be close to death.

Tito of Yugoslavia may expire before 1976. The man that replaces him will create more upheaval than that country has known in twenty years.

I do not see a nuclear war in our lifetimes or in the lifetimes of our children.

I see famous pieces of art being stolen and threatened by destruction if there is not a great ransom paid for them. I feel that this plot will fail.

There will be some trouble in the UN this year, short-lived, but very much in the news.

Greece has only just begun to fight. For the next two years I see many, many battles and many casualties, without resolving too much.

A certain queen may require surgery before 1976 is over. It will be rather serious. From that point on her health will not be stable.

There will be some sadness in the life of Princess Grace due to the death of someone she loves dearly.

I see in the Pacific the birth of another chain of islands before 1977.

Acupuncture will be more widely used in the United States. I do not foresee any problems with this. Acupuncture will be used mostly as a pain-killer for some incurable diseases and chronic disorders.

Between 1976 and 1978, there will be a child born near Roanoke, Virginia, that will possess all the powers of the late Edgar Cayce.

I feel that chemotherapy will be the most successful way of combating cancer. Cures are very close at hand.

Crib deaths, known as the SID Syndrome, will be found to be caused by a virus.

There will be a scandal around commonly used cosmetics. Some may even be causing blindness.

By 1982 another planet will be discovered in our solar system.

An automobile brought in from Italy, designed and manufactured by Americans, will do a great deal to change our automotive industry.

I see a search going on in California or Nevada for a young girl who is thought to be kidnapped. I do not see the

child as being kidnapped; rather, she wandered away. She will be found dead or near death approximately twenty-three days later.

There will be a rash of kidnappings, more than we've had in the last five years.

Before 1980 astrology will be taught in our high schools. It will be a credit course.

Before 1976, many young children who are now only three or four are going to be found to have a great deal of psychic ability.

I see a new religion being formed between now and the 1980s. This will be a very long-lived religion, much like the religion taught by Martin Luther.

CHAPTER 40

LOUIS ANTHONY RUSSO

Philosophical Psychic

Louis Anthony Russo is an internationally known clairvoyant philosopher and lecturer in the field of psychic phenomena and is involved with many phases of it: tarot, clairvoyance, spirituality, and symbolism. He is known as a psychic philosopher and his scientific approach to psychic phenomena is unique. His lectures and classes develop the attitudes and techniques of utilizing the psychic in a person's daily life and profession. People have found his down-to-earth approach both entertaining and refreshing.

Louis Anthony Russo was born on September 3, 1943, in Brooklyn, New York. He has lived in Phoenix, Arizona, for the past eighteen years. His involvement in psychic phenomena began because of his natural gift. As a result of the interest and popularity of his approach, his profession is now that of lecturer. Mr. Russo does not use his clairvoyant abilities for financial gain. His income is derived solely from his lectures, classes, and seminars. He has used his psychic ability as an aid in counseling, but he refuses to accept payment for such work.

Mr. Russo has predicted such things as Spiro Agnew's problems in office; the Watergate scandals; the oil crisis; the release of the POWs; and the withdrawal of US troops from Vietnam.

In addition to predictions, Russo's lectures cover his philosophy of psychic phenomena and the manner in which he gains insight. "I've had visions all of my life," he explained. "I just took it for granted that everyone did. I get symbols in my visions, oftentimes like flashes of movies. At other times, they're like feelings. I can get them anytime I want, but I didn't start cultivating the gift until about four years ago."

The 33-year-old psychic explained that the visions are logical and controlled. "The flashes are similar to dreaming in the conscious state," he elaborated. "I can also psych into things. I can read a book, as an example, without opening a page."

Russo claims he is able to travel astrally. "Astral travel is

done by a person when they're in an altered state of consciousness," he related. "I get into pockets of information rather than visit the planets. I don't do it consciously."

The Arizona psychic believes that time is not a limitation. "Everything's in the present," he stated. "So, death is one of the most meaningless things in the world because there is no such thing as death."

The heavyset, bearded psychic has a psychology of good and bad comparable to Oriental teachings. "I call good a positive force and bad is a negative force," he related. "It's like a magnet with two poles. You always have the free will to go in either direction."

People have found his down-to-earth approach stimulating and acceptable in areas where the word "psychic" would normally be avoided if not ignored. Louis has combined his intuitive ability with new scientific techniques in psychic seminars. Most outstanding of his seminars is a program called "list therapy," a combination of scientific psychological techniques with positive programing and intuitive correlation.

Louis has lectured at many colleges and universities throughout the US and Canada. During a recent tour he was at Westminster College, Salt Lake City, Utah, and submitted to a series of biofeedback tests under the direction of Dr. Dale Johnson, Assistant Professor of Philosophy and Religion. Although the final scores are yet to be determined, Louis' ability to produce results with this modern equipment assures that he will be received both in the metaphysical world and the scientific world as a man with outstanding ability.

Louis is currently preparing for further testing of his ability by the well-known Dr. Thelma Moss at the University of California at Los Angeles (UCLA).

In addition to spending long hours on seminars and tours with private groups, Louis has found time to engage in intuitive counseling for business. He has established a company solely for this purpose: Intuitive Data Counsel. This company is devoted to assisting business organizations in positive programing, seminars, and employment counseling. He is currently participating in a program to enable business executives to foresee the future economic climate and stock market trends.

Mr. Russo is preparing a book which will describe the symbolism of disease from the psychic level, mental level, and physical level. He maintains all disease is symbolic and that we create poor health by programing poor health. The book, as yet untitled, will be a collaboration and should be available in 1976.

Mr. Russo may be contacted by writing to him at P.O. Box 5888, Phoenix, Arizona 85010. He forecasts for the coming year include:

There will be disasters in the icy waters near North America around the Canadian borders and coasts in particular. Disasters connected with energy, oil, shipping, oil drilling, offshore drilling, mining, the supply of electricity, utilization of steam, forests and timber. This danger remains through March but begins in January.

Israel will speak to the Canadians and ask for their help, for arms, financial aid, for negotiations. In doing so it will turn its back on the United States. Israel will ride the fence between the French and the English Canadians. This influence will last for three years and will be a detriment to both Canada and the United States. It will be a stigma on the image of Israel. Israel will have great fears that the friendly nations have forsaken it. It will feel it can no longer depend on the United States; it will seek help from other nations. Canada will be empathetic and part of the secret agreement between the two nations will be that Israel will help Canada in the future with the United States, France, England, and in its relationship with Cuba.

In January there will be a great find in a national library. A group of papers or books will be examined as if for the first time. Much truth about history shall be known. These will be reprinted and will become a best seller before two years passes.

This is the year of the magna carta. Alliances, unified force, continent against continent, allies joining together against a common enemy. The foundation will begin in January.

At the end of January a light in the economy, as if things are turning good again; the winter months will be difficult for this country economically. But it will be temporary and not even last through February. Most of the good news involving the economy will come from the western part of this country.

It will have to do with the signatures of Orientals, particularly the Japanese.

In the Southwest and Midwest of the United States, as January ends, a "flame" will begin. It will be a new form of "freedom fighters." They will fight with words, agreements, votes, Congress, law, the Constitution, courts, branches of government. They will be effective in the West, feared and rejected in the South, ignored in the Northeast. It will be very reminiscent of our revolution two hundred years prior.

There will be a gold find in the United States that will really shake the economy. But it will be a false alarm. We will find that the Chinese have great resources of gold in their country. They have been mining and storing it and they will flood the economies of the world. The effects will last three years. It will destroy many economies, strengthen others temporarily, be used by many and then the world will change its monetary base and the gold will no longer be useful. They are not releasing the gold openly so they are regaining wealth. They do not want currency for the gold.

Look for massacres in relationship to China, it's satellites, and its bordering nations. To keep civil wars from happening, China will turn within and destroy itself.

Great political interest will develop in the Southern states. Candidates will arise for governorships, senate, congressional seats, and the presidency. Because there is too much diversification, they will have trouble projecting their interests in the presidential race. They will align themselves with the Northeastern states.

Scientists will discover an old volcano that existed in the central part of the United States and the possibility of its being reawakened on a minor scale. They will say that the volcano was very huge and formed the continent of North America as we know it now.

There will be great wealth coming to the West from the sea, particularly in minerals.

Museums of the United States will accept displays from China and the Orient. These will be brought by ships to the West Coast, particularly the Northwest. There will be great controversy about what is presented. At this time too, the Orientals will have great bargaining power with the industrialists of North America. They will let their power be known. The United States will claim that we are being reconstructed

by the Orientals as we reconstructed them after the last war. It will be said that Vietnam is dead to the free world. It will not be, but it will seem that way.

There will be great outrage about how the money has been used in celebrating the birth of the nation. This will cause great apathy among people, the government, and committees. Black people will cause great controversy. Many others will say they have ruined the celebration. They will be pointing out truths difficult for this nation to swallow. A black minister will emerge to become the new Martin Luther King.

There will be an important conference on religion in this country, drawing people from Europe and Asia. Its importance will not be known for many years; many will ignore the fact that it happened.

A movie star who died years ago will again become important to the nation. It will be as if she has produced new things such as music, photos, writings, drawings, and books. Only now will they be released.

There will be an important paper signed in June for the betterment of the entertainment and communication world.

It seems as if the United States will celebrate the birth of our nation but the people will ignore it; they will be dissatisfied and uninterested. For many the celebration will not be for two years. There will be more criticism of 200 years of wasted effort. There will be talk of revolution, that it is time to change the government again. Look for an enactment of the Boston Tea Party. It will be dangerous and there will be a real "tea party" that will become a part of our history whether it is tea or not. The United States will feel as if it has been invaded by Canada. There will be great concern about whether our President can continue because of conflict of interest. He will remain but there will be sadness at the White House during the celebration of our nation's birthday.

There will be controversy over fresh-water fish, salmon, and tuna in relationship to these fish and health as well as price.

There will be plans to make physical connections between the United States and the Asian continent through the Pacific Ocean. Look for discussion of other physical connections that are there now, like cables. The electronics industry will have a great boom because of this discussion. The telephone

company will show the magnitude of its power in world governments.

I predict rioting in the Northwestern states and other places involving blacks, Indians, chicanos, and Orientals as summer ends. This is a time of argument or great heat, fire, and explosions that are both emotional and physical.

A new monument to a President of long ago will somehow bring joy to the people; an awakening of an old pride and promise of freedom.

A flame will be the symbol of August, both positively and negatively. Look for strange weather conditions, extremes, oddities in all of North America and South America.

A religious or spiritual leader from the East will celebrate a great day in the United States. It will be the beginning of his end. We will have many dignitaries coming to the United States, but they will be interested in places other than Washington, D.C.

A respected king will visit the United States. He will be in grave danger from his own people while here.

Colleges will accept a text that will cause great controversy.

UFO activity will be great in the North America Continent, Europe, and Asia in the fall. They will cause power shortages and disturbances of energy and communication.

There will be a great peace and flowing in the countries that relate to the Suez Canal. It will be as if this is the first of its true opening in this decade and in history.

A royal personage in Europe will publish a book that may be divided into two or three volumes. It will shed great light and controversy on history from World War I through the present time in Europe. It will imply great things about Winston Churchill.

In Europe there will be a great epidemic among domestic animals that will bring grave danger to people. This will also touch Asia.

The winter will be colder and in many places everything will stop because of ice and snow. It will also be as if the economy of many a nation is frozen. Some will say it is the death rattle. It is not. It will be difficult for people to hold onto what they own. If they can, things will be better.

There will be accusations by the Canadian people of other countries in relation to the Northwestern territories, the North Pole, and the Arctic.

The Pope will free some people with a blessing, and there will be many changes of leadership in religions all over the world. There will be controversy over time, time changes, and time zones as scientists try to synchronize time in the world. Measurements of all types will be discussed. There will be an agreement signed by many nations of the world about measurements.

A nuclear sub will cause an explosion in the ice and snow. It will be unfortunate and an accident. We will learn of a great cavity under the Earth that will probably be in the Nevada area. Science will think of utilizing it for storage, for experimentation, and as a laboratory.

At a time when the world celebrates great spiritual remembrances, many spiritual leaders will be laid to rest. Staffs, symbols, and the flames of leadership shall be passed. It will be a sign of new beginnings of 1977, which is the year of mysteries, mystiques, and mysticisms.

This year, 1976, we will not know who in fact is our President, who is making decisions, who has won the election and who will take office. For this reason there may be a delay in swearing in the President and or Vice-President. This could last as long as several months.

There will be a scandal involving alcohol in high places in government.

There will be a revival of an old music form. Some will say the atmosphere is that of prohibition.

There will be aggression to nations who border China on the west.

Pompeii will be in the news because of volcanic activity.

The Earth will not only cover things that now are exposed but will expose things that have been covered.

We will find there are minerals in volcanic ash and rock that are useful in energy, but that the energy comes from the stone. That it is useful in converting other substances to energy will be found.

England will have three great sadnesses. Not all will connect with death. Basically, it is the ending of an era.

Ireland is in danger of natural disasters rather than national disasters.

From Scotland will come literary works that will become popular very quickly all over the world. They will be fiction based on truth.

From Persia comes art, music, and the theater which will develop very quickly and find acceptance in other countries.

India will find itself negotiating with two other nations in relationship to water or canals.

Pakistan will talk about joining forces with a nation other than India. Some will say this is the unification of two nations into one.

Egypt will lose a leader and will respond with inactivity for six to eight months. It is as if the fire and steam has been taken out of the nation.

Israel will project superiority, an attitude of having won victory, and yet this is not so. Some will speak of leaders from other countries leading Israel. Much of this will be true. The leaders from other countries will have more power with the people than do the Israeli leaders themselves.

There will be a unification movement in small Asian nations like Vietnam, Cambodia, Korea, Thailand. It is as if they are being unified as one, yet carrying on as separate entities. This will be detrimental to the free world. It will be a block of nations similar to those around Russia. It will be as difficult to free that block as it has been to free the Russian satellites.

Russia will export diamonds and other precious stones. Russia will take on popularity throughout the world as if it is a great teddy bear. Other Communist nations will see this as a great weakness and the Russians will get criticism from both sides, but the true bear will sleep while the teddy bear plays.

Hungary will loom as a free nation, becoming more capitalistic and less Communistic than any of the Russian satellites.

The Czechs will feel more imprisoned, more restrained, more blocked off.

West Germany will become extremely important in the United Nations. It will be as if West Germany is a blossom in the snow bringing spring to Europe. However, the free world must know that behind that blossom is a cancer that will again infect the Earth.

Switzerland will donate or contribute to the world great new political thought, philosophy, and concepts of religion. All of these will be controversial, rejected by most of the world, but not ignored. The new thought will challenge the

morality concept of world nations. The morality is good, the presentation is not.

France will lay groundwork to become the enemy of many European nations including West Germany, Italy, Portugal, and Spain. It will loom as an enemy of the United States, Mexico, and some of the governments in Central and South America. It will cause strain in the Panama Canal Zone, challenge Mexico, infest and corrupt Canada. It will become a very strong ally of China, who will be playing games with Russia so that Russia will not know truly how China stands. France will be anti-Israel, anti-Rome, anti-capitalism.

Italy will lose great amounts of money in its factories and industries connected with automobiles. Much will be lost in art by natural disaster or by the decadence of people who care little about the things they have guarded for centuries. The Vatican will become more isolated within Italy. The Pope will spend time in other parts of Italy and in other European countries in the future.

Morocco will have great internal pressure and civil strife. There will be talk of civil war and the threat will be in Africa and Europe.

The western border of Brazil will be again a great tourist attraction, drawing people from many nations.

Chile will be shaken with earthquakes through the year.

Venezuela will declare itself a democracy in the strictest terms.

Columbia will be plagued with many diseases.

Uruguay will become industrial and develop very quickly. Within the borders of Uruguay will be found the ruins of a great civilization.

Costa Rica will be filled with civil strife.

The Panama Canal Zone will again have great pressure upon its freedom of traffic.

The middle of the year will see Mexico making changes in economic standing, currency, and government. It will be a long time before we can tell if this is a stabilizing or disruptive force.

From Mexico will come a spiritual leader who will walk into the United States, proclaim his spirituality, and be rejected.

In the US there will be large amounts of rain, snow, sleet, ice, and humidity from the middle of 1975 through 1976. This will continue in some areas through the middle of 1977.

A state other than Nevada will begin to become the gambling capital for the United States. The whole state may not be open to this, just its major city.

A young man will claim his royalty but will not be king in Europe. It will mean that history will have to be rewritten. Many will disclaim him. He is of the blood line but has no throne to claim.

A queen will visit another country, but she will not see it. It will be necessary to protect her to the degree that she will not experience the happenings of the country itself.

There will be a great influx of fish into the Gulf of Mexico.

Lady Bird Johnson will be called into a judicial system to defend President Johnson. She will find that Mr. Johnson did not want to be a Vice-Presidential candidate. The situation bringing him to that was unique.

A foodstuff imported into the United States from Mexico will contain poison or will be unfit to eat.

There will be a great effort to understand the mind, how it can be changed, reprogramed, challenged, and interpreted to heal the body and itself. Healing medications will be developed to replace drugs. Substances will be put into the system that will eliminate drugs. This will also deal with vitamins and minerals.

The occult and the scientific world will make great strides this year in preparation for joint efforts in 1977.

Look for talk of projection and putting a psychic into space.

Watch for strange images projected from satellites in space of strange faces or shapes, superimposed, as if from other civilizations. In the middle of the year a government investigation of psychic phenomena will show that world governments have knowledge and acceptance of these forces.

There will be bones found of humans of the past that have either a sixth finger or only four fingers. There will be discussions saying that they are not humans of this planet.

Discoveries will be made that will quicken the healing of broken bones and burnt flesh.

There will be talk of helping amputees grow back parts of

their bodies, particularly if a section of an arm or leg needs to be removed while most of the appendage is healthy.

Man will learn how to energize or multiply cells quickly and deenergize them from growing.

CHAPTER 41

HAROLD SCHROEPPEL

Advanced Psychic Perception

Harold Schroeppel, an ordained spiritualist minister, is primarily a teacher in psychic and spiritual development. Having developed his own psychic abilities through the practice of yoga and dianetics, he believes that everyone has the potential to grow psychically and spiritually.

He has been teaching and working with people for twenty years. Seven years ago he established the Institute for Advanced Perception. It is located at 719 S. Clarence Avenue, Oak Park, Illinois 60304. This made possible the training of teachers and group classes in productive psychic development.

"We expect our students to get healthier, happier, and have better control in the real world," he says. "The classes cover spiritual development which gives the individual much better control of himself and his universe. It increases his ability to communicate with people and the opportunity to be at peace with himself. Our courses are taught in a yoga framework adapted from the Sutras of Patanjali."

Two years ago a branch of the Institute for Advanced Perception was established outside San Francisco at 81 Coronet, Mill Valley, California. This branch is headed by Joel Katz.

Courses offered include advanced perception, astrology, tarot, hatha yoga, and spiritual healing. "Psychic repairs," psychic couseling, psychic and spiritual healing, and readings are among the services available. The staff are gifted psychics with a personal commitment to Harold, to each other, and to their students.

Harold served with Chenault in China as a flying radio operator with the Flying Tigers. Later he received a B.S. from Eureka College. He has been primarily a research and control chemist since 1948.

His work and study with dianetics in the early fifties opened his mind to the potential of the spirit. In his quest for answers he covered yoga, the eidetic foundation, the works of

Edgar Cayce, Paul Brunton, Stuart Edward White, and many others.

Using what he had learned for himself and from teaching others, he then laid out a structured course for psychic and spiritual growth.

Many psychic abilities manifested themselves as a result of Harold's personal development: psychic healing, telepathy, clairvoyance, radisthesia; ability to see the individual's past, present, and future; ability to see and describe distant places (as in radio and TV readings); ability to create deliberate emotional atmosphere to promote communication. These abilities are used through teaching, counseling, lecturing, and reading.

Lecturing is one of his favorite activities because it gives him an opportunity to share his knowledge. Harold's forcasts are:

The international scene will maintain a "pins-and-needles" level of excitement. Many local efforts by guerrilla groups to get a major power atomic war started will occur. I feel if war comes it is later and not major.

I expect that in 1976 people will still be cleaning up after a major quake in California. I feel this one should hit near the end of 1975.

This is going to be a period of major changes and transitions. Much rebalancing of production in the auto industry; look for shifting of industries to have better access to power or fuel in many new directions. A major fight is shaping up over whether to destroy the money system (allow higher wages and inflation) or cut federal and state spending, especially welfare and unemployment allotments.

The oil and gas shortages will continue to grow. This will become real to many who at this writing feel it's a phony shortage.

Government deficit (fiscal 1975-1976) will be much larger than planned by either Congress or the White House. This will be due largely to the lack of profit in several major industries. Dependence of jobs on the health of these industries will become obvious even to the most dedicated socialists.

Look for a revolution in Portugal as Communists intend to take over. They are going to have to kill a lot of people to make it stick.

Technology for the military use of lasers from space exists. These items will be orbiting by early 1976.

The use of guns as murder weapons will decline significantly by the end of 1976. Many liberals will be given a very bad time. Several will leave public life because of the violence that their theories have not prevented.

The underground teachers of revolutionary murder will be systematically hunted down starting in late 1976. They will have been shown to be a major source of hate, violence, and disruption.

A major change in companies listed on the stock exchanges will require a new method of estimating stock market values.

New York City will fail completely to meet its payroll by the end of 1975. Other cities will follow the same route in 1976.

Rent control, taxes, and welfare payments in New York City will go completely chaotic by the end of 1976. In many cases the city will assess more taxes on a building than its controlled rents can pay. Since the payments have to come from welfare allotments, the city will starve itself, literally recycling poverty and starvation.

Many people will die in 1976 because of the unavailability of medical care. In many cases it will not be a matter of money.

Volcanic action in Hawaii will require the evacuation of a large city: Hilo?

Tremendous pressure will be applied to some labor groups to move to other locations for employment. In most cases this will include a change in trade or vocation.

Moonlighting will be a major source of employment in the building trades. The union scale will be so high that even the government will be unable to afford it.

Most states will be out of unemployment funds by the end of 1976. There will be a lot of free food distribution. Many people will move outside the "money economy."

City, state and or federal government will take its taxes "in kind or trade" or do without.

Sun power and wind power units will be offered for commercial sale by the end of 1975.

Companies which manufacture "throwaways"—especially throwaway containers—will strongly be taxed or prohibited in a few areas.

Car size trends towards compacts and minis will be obvious by the end of 1976. The bulk of traffic will be small cars. This will cause a lot of pressure to separate truck routes from passenger service.

I feel there will be a few solidly confirmed UFO incidents, with one or two landing areas definitely located. But I expect some very peculiar official conduct in reaction to the data.

Weather! I expect the wide-swinging temperature ranges in the US to continue. I feel that high level of tornado destruction will continue. Crops in 1976 will sustain some weather damage, but not as much as in 1974.

The gradual drift towards commune groups will continue, with more cooperatives.

Depression? We are as "depressed" as we can get right now. But pockets of unemployment will be very bad for some time. Those who fail to move or adapt will starve. Consumer-use patterns will change greatly.

Violence on American television will be cut back. Certain writers will be banned, others censored.

More automation in education. Teacher excess will remain high. Several breaks will be made in the tenure system. Look for certain tenured professors to be fired for ethical considerations and/or failure to teach.

The trend to natural food will continue.

Spot shortages will occur. This is largely due to economics or production. Specialty drugs will fall in this category.

Success of birth control methods will become apparent.

Watch for a breakdown in government control by legislation in several areas. Laws will be passed but unenforceable, because of lack of personnel, equipment, or simply because they will not be compatible with real possibilities.

Public space programs, except for service satellities, will be minimal.

Interest rates will stay high in spite of government pressure to lower them. Below a certain rate, money will just disappear.

Mental health care will break down in some states and large cities. Some people who should be confined will be turned loose. Others will be lynched when caught, particularly in Latin or chicano areas.

Earthquakes? I see some volcanic action at Etna, several earthquakes in southern Japan, on Hawaii, and a new one

along the US West Coast. Near the California-Oregon border?

I see several large floods in the news. High water at Calcutta will cause many deaths. The Mekong river system will be out of control; mostly crop damage on this one.

CHAPTER 42

DR. INGRID SHERMAN

Poetic Prophecy

Dr. Ingrid Sherman (The Peace of Mind Studio, 102 Courter Avenue, Yonkers, New York 10705) is internationally known as the First Lady of poetry. She is also accomplished in teaching handwriting analysis, metaphysics, and foreign languages.

Dr. Sherman's forecasts for the coming year include the following:

Animal acupuncture will be gaining popularity.

Automobiles: Out of necessity America has to go into competition with Europe and start manufacturing its own smaller cars. Prices will rise higher in gas and oil. This means we will see lower-priced, smaller cars on the market.

Consumer Affairs: Consumers will no longer sit back and accept things. They are quite disgruntled and will start fighting for their rights. The result will be many changes for the better.

Crime, particularly in the streets of large cities, will stay with us until drastic new laws will be enforced. Juvenile crime, vandalism, assault, rape, and murder with deadly weapons by juvenile criminals will be corrected in time. Some states will have "labor" in the form of painting buildings, constructing roadways, and felling trees by prisoners.

Riots by whites and blacks will result from the rising cost of living and growing unemployment. Look for further demonstrations in the coming years.

There will be food riots after unreasonable price hikes.

Disasters: Train derailments will increase, particularly freight trains, due to negligence in track maintenance and unskilled labor in the US.

Train travel abroad is safer, except for a couple of major accidents involving many.

An airplane crash with many passengers lost will occur in Japan. There will be sabotage on a boat on the high seas on the way to Africa. Entirely too many killings of innocent people by the Communists in Vietnam is quite a tragedy.

Drugs: Teenage drinking, particularly in colleges, will increase.

Marijuana will be legalized in the state of Alaska. Other states will follow.

Economy: Watch for an increase in Social Security for Old Age recipients. Higher benefits for the disabled will eventually eat into the limited resources of this fund. There will be farm subsidy hikes on crop production of grains, particularly corn and wheat. Look for higher meat prices and food in general.

Unemployment benefits, at present prolonged, will be shortened because of lack of funds in the future. With the loss of stability in government, the banks and other financial institutions will also lose their stability. It has a snowballing effect that will eventually affect the public.

Federal taxes and most state and municipal levies will be rising faster than inflation itself and will cause much uncertainty and unrest. There will be shortages of many textiles due to unskilled labor and high cost of materials. Despite the current recessionary trends and the rising unemployment, purchasing power will remain high for the time being.

The recession, however, will continue even though corrective steps are being taken in many areas to adjust the economy. The upward rush of inflation temporarily will be easing off a bit in the coming year and a decline in long-term interest rates can be anticipated. It will average out by mid-1976.

Much maneuvering and contemplating will be done, all without too much success, for as soon as interest rates settle, future earners will make unreasonable demands. It is an ever-losing battle.

Employment: More unemployment and wage cuts. However, plans will be worked out to create many small jobs, also part-time jobs.

Fashions: Hats will be coming back in style for a while. Hair styles for the spring 1976 will become more conservative, shorter cuts and curls. Within the next few years clothing styles for men and women will be changing toward more simplicity and practicality. What is worn will be very comfortable, leisure-type wear during the daytime but, on the other hand, complete dress-up for special occasions at night.

Fuel and Energy Crisis: There may be a bright outlook here and there. But this is a mere fooler. On a whole, the crisis will stay with us and gradually worsen. Advice: Become

self-sufficient! Move to a new location, where you can grow your own produce and have your own well or spring water and develop your own energy needs. People have already started to form groups moving together for this specific purpose. You are neither too old nor too young for such an undertaking.

Health: A new plant drug will be found to help heart patients. A certain type of glaucoma will be cured via a new laser beam technique. Some new pills will come on the market before long to help chronic bronchitis, asthma, hayfever, and particularly emphysema.

Dental x-rays will soon be a thing of the past. A new device to detect tooth decay, abcesses, and other troubles will be invented.

Marriage, Divorce, Separation: Marital separation is on the rise in all age groups. Divorce rates of couples married twenty years and over is disturbingly on the upswing. It will hit an all-time high. Many will be living together unmarried. New marriages will have fewer children than previous marriages did; some will have no children.

Medical: In time the American Medical Association will no longer be able to protect its professionals. A new ethical concept will be followed by weeding out and revoking licenses of incompetent doctors to protect patients.

I had rightly predicted a few years ago the trouble in the medical profession. This will be settled. General changes for the better will come about.

Within three years there will be an X-ray substitute—a "sound system" for medical diagnosis.

I predict that dentists and lawyers will be next in line for possible trouble.

Music: A refreshing new type of jazz-style music will be making inroads.

Folk rock music will be making a comeback.

Books: Sales will be rising for spiritual, religious, health, and self-help books. People are searching to solve their problems through higher means and channels.

Occult: Since the birth of the book and film about exorcism, requests for exorcisms have been and will be on the increase. Unfortunately, people who are not possessed by so-called "evil forces" will be led to believe that they are and will spend much money on fakery. Thus be careful and beware!

Many more people are becoming interested in astrology and will take study courses in this subject. Numerology will gradually find its place and will be widely used.

The interest in black witchcraft will prevail for some time.

Personalities: President Ford, a Cancer-born, will be influenced by mixed forces during the coming year. He is not one of the most-liked Presidents. On the contrary, he will be blamed for the present economic problems. Despite this, he has a good chance to win the 1976 presidency.

Jacqueline Kennedy Onassis: Things will not go well for her for a while. She has to make adjustments; it will be a time of reflection for her. She may be seen with some new friends here and there. In time she will have a third marriage to a man closer to her own age. I see a gentleman of a high-ranking British background.

Henry Kissinger: In some research that I have done, I found him to have been in the Egyptian government in a former lifetime. Hence the strong pull toward constant negotiations in the Middle East. His insecure form of speech turns some people off. He will resign from his present post before long as the work is too hectic.

Ex-President Nixon is making slow progress in recovering from Watergate. It has left a deep mark for life on his subconscious and is bound to lessen his days on Earth.

Mary Tyler Moore: After the present TV role is concluded, she will not accept another one. She will try for a film career instead.

Barbra Streisand: Jon Peters is her latest flame. They have marriage intentions, as they are very much in love. The marriage will not survive.

Richard Burton: I see trouble if he does not stay away from drinking.

Elizabeth Taylor: With new zest she will jump into another marriage within a year to the young man she has been seen with lately. Their happiness will not be the same as she had experienced in the early part of her marriage to Richard Burton. There is doubt of a long survival.

Postal Service: A postal service slowdown is visible. A possible 30 per cent rise in postal rates is inevitable. A planned strike will be prevented temporarily.

Psychic Scene: Psychic healers will come into the foreground and will be working with doctors. Professional

psychics and scientists are making studies in this field and are coming up with some astonishing conclusions.

Sex: It is claimed that we are living in a "sex-crazy" world. As a result of the new life-styles, a change in sex roles will take place. Communal living is a visible solution for some.

Space and Science: The planned US-Soviet space flight in early July will not be without trouble at takeoff and outer space connection.

Spiritual Guidance: During the next decade or so the Blessed Mother will appear to a number of God-fearing individuals the world over. She will be giving divine messages to alert mankind and plead for them to walk in God's path.

Aura and pyramid healings will move into the foreground due to their effectiveness. I have performed healings through both media.

Stock Market: Even though the stock market has seen a rise for many consecutive months, it will not remain that way. I see a decline that may cause Americans much anxiety by June 1976.

Student Affairs: The present school system will slowly be destroyed, unless drastic measures are taken soon. Juvenile deliquency is on the increase not only in big cities, but in small towns. Look for more teachers' strikes and more layoffs to cut expenses.

Travel: Jumbo jets will undergo closer inspections for safety. I see flying-saucer-type machines being built in the future for faster air travel.

Some of the former railroad beds will be converted into trail paths for jogging, walking, backpacking, bicycling, and horseback riding.

Foreign travel will decline for the tourist trade. European rail travel, particularly in Western Europe, will reach an all-time high with faster, more efficient service.

We will in time see a restored, speedier train service across America.

By the end of 1976 the New York subway fare will be almost double what it is now. Highway tolls will rise higher in some areas.

UFOs: The opportunity for telepathic or personal communication with UFOs is not too far off. Some very interesting facts will be revealed.

War: I believe there will be trouble in the Middle East. The Arab-Israeli conflict can hardly be avoided. Israel will go

through intense suffering. In the end Israel will be saved through the heavens, not through the sea this time as was formerly the case. Heavenly flying saucers will come to its aid!

I would appreciate if you would read the following verses with an open mind for the most benefit, for that is why I penned them:

Never belittle
Your fellow man
But build him up
As much as you can.

Do not say words thoughtlessly
While you pray
But say them meaningfully
Such effort will pay.

Nature is unsurpassed
Nature will forever last
Even if we are long gone
Nature will still carry on

Fear not the evil
That possesses man,
But find the good
Wherever you can.

Contradiction
Leads to confusion
Proper suggestion
To right solution.

Never postpone a duty
That you are supposed to do
Do it calmly and smilingly
Real duties are but few.

He may not speak aloud
The merciful God
But does not leave a doubt
As to where to trod.

Do not be discouraged
It is exhausting
Rather be encouraged
It is revitalizing.

Each of us is "A Miracle from Heaven."

CHAPTER 43

CORA SITRUSIS

Colorado's Scientific Astrologer

"Astrology is an ever-expanding field," said Cora Sitrusis, Colorado astrologer. "My education continues every day because there is a constant flow of new data in the field."

Cora, who holds a bachelor of arts degree from Indiana University, studied astrology with Dr. Frederic Mazine in San Jose, California. She then went into advanced studies at the Kretona Institute at Ojai, California. "Astrology has brought me many new and interesting friends," she explained. "I feel that each of my clients is a respected friend."

The Cora Sitrusis School of Astrology (P.O. Box 10295, Denver, Colorado 80210) offers an "Astrology by Cassette" correspondence course. "This has been accepted quite well" Cora stated. "Once a student has completed the beginners' course, he may proceed into intermediate and advanced study."

Cora Sitrusis also offers beginner, intermediate, and advanced astrology courses at her Denver headquarters for students who live in that area. The same courses are also offered at her School of Astrology branch offices in Boulder and Ft. Collins, Colorado.

A beginning course in astrology is also being taught by Cora at Colorado University, Boulder; at Colorado State University in Ft. Collins; and at Arapahoe Community College in Littleton, Colorado. "Students receive standardized instruction through textbooks I've developed," reported Cora Sitrusis. "I have written *Astrology for Beginners, Astrological Signs by House Placement,* and *Advanced Astrology*. I am currently completing a textbook on esoteric astrology which will be offered through the schools."

Cora lectures frequently to various civic organizations. She has also appeared on many radio and television programs in the Rocky Mountain region.

Looking to the stars for the next twelve months, Cora Sitrusis has made these forecasts:

January: During January 1976, the entire nation appears

to be restless and unable to settle down to the business at hand. Contradictory legislation comes from Congress with more discussion of giving to those who don't need by taking away from those that do need. We seem to have our accent on the wrong segment of the population. We will be subjected to campaigning for the November elections from this month on. A catastrophe or major union strike will tie up an overtaxed commodity or vital service. This will cause further restrictions and limitations on the general public.

February: The changing weather pattern and condition will catch most of the nation off guard and could bring many hardships to us. I believe the politicians will appear to be most concerned, with all different forms of advice to alleviate the situation with completely inane, impractical, and impossible solutions. As usual, the solution will come from the most unexpected source for a do-it-yourself program. A new, rather surprising personality could emerge as a national figure, with talk of her attempting to gain the nomination for a high national office.

March: We could feel some unusual pressures from another nation and find our thoughts dominated by this pressure. I believe we will succumb without resistance with slightly negative influence upon the general public. It will be necessary for us to make some sacrifices in order to have some business gains and advantages from this small nation. A lack of determination or self-control could work toward or be to the general public's detriment. An increase in the Women's Liberation Movement will be seen at this time and it could result in further legislation to equalize some imbalance in our laws. However, there is also an indication of much agitation coming from splintered women's groups. This will divert the attention of the general public and direct energy into unnecessary and inconsequential areas. A new leader could emerge from one of the small groups that will enable the entire movement to concentrate on the important matters. You will see greater activity in the political areas from these groups. I believe these groups will form some unusual alliances and associations to become more successful in their activities. There is a possibility that a member of this large group will stand for or be elected to a high government office in November.

New international associations and cooperation will be evident during March 1976. We seem to enter these associations vigorously and with high expectations which are unrealistic. Typically, we will hear much about the reasons for these new "friendships" but will see little, if any, practical results. Further negotiations regarding our fuel situation and energy crisis will be in the news once again, but with better results and more accurate information than we have had in this area for some time.

April: Once again, I find the United States standing alone and facing the world without the support of "friends." The lack of good judgment of our policies will be most evident, causing unnecessary problems. The general public will be restless, uncertain, anxious and nervous. Quarrels or misunderstandings with others could cause strains and tensions in our international position and interrupt diplomatic negotiations. Internal unrest and dissension will make it difficult for our representatives to present a united picture to our allies. A larger-than-usual slate of nominees for our national offices will be presented this month. There will seem to be little difference of opinion, attitude, and principle among the field of politicians. Be prepared for an excessive amount of "cosmetics" to cloud the issues and individuals at this time.

May: New scientific or artistic discoveries and techniques will be announced during May. These appear to be unique and most unusual, but will have very practical application for general use. The exchange of entertainment and art projects between our nation and other nations appears to be on the increase. This will promote more understanding than all the politicians have done. As a result of changing philosophical attitudes and opinions, we will see a separation from a former friendly nation that will be fortunate for us. I find the United States will express clear-cut objectives so the general public will understand our diplomatic actions and this will meet with approval from the people. An increase in national pride will be apparent, with more cooperation from opposing groups than we've had in the past.

June: A protective attitude toward an associate or friendly nation will be strong this month. However, the general public must keep emotions in check so as not to influence our representatives unwisely in this situation. This could be the cause of termination of agreements that have been in effect for a long period of time. Quite naturally, the Spirit of '76 is

increasing and will divert our attention from international affairs. Nevertheless, this is the time our elected officials should keep their attention on the important matters so we will not be lulled into feeling safe and secure. The general public could face some difficult times and endure restrictions on its freedom. This will be an excellent time for such things to slip by without a protest. Our government will push many "sugar-coated pills" on us thinking the public can be fooled to accept most anything while its attention is on the Bicentennial celebration.

July: The entire country should be alerted to radical groups disrupting the celebrations taking place during July. This is the opportunity they have been preparing for; they will utilize it to the fullest. Acts of violence will call attention to these inharmonious and disgruntled groups. A general sense of well-being will be prevalent. Many other nations will take advantage of this attitude for their own selfish reasons. A rash of new people will use this time to kick off their campaigns, exploiting the patriotism of the time.

August: There is an indication that an international figure or government head will die. This will arouse much sympathy and sorrow. He will have been a friend to many; his loss will be deeply felt. This could cause a temporary state of chaos and result in strong tensions in surrounding countries. The United States will utilize this situation favorably. Force is successfully used. Any impulsive actions on the part of the United States could result in violent repercussions. An unusual association will be the outcome of this event.

September: How quickly we forget our "togetherness" demonstrated during July! Dissension seems to be the order of the day for September. Political campaigns are getting down to innuendo. Strange, unwise, and unhealthy partnerships seem to be forming, using "the-end-justifies-the-means" judgments. Unholy alliances, bosom pals become strong enemies, and incompatible philosophies combine with intolerant theories. A general mix-match which can only come to a tragic end will be all around us. It will take a ouija board, crystal ball, pendulum, and jackleg lawyer to decipher the communications from these groups. Clashes of will meet with unsympathetic followers. The potential of violence is ready to be exploded. Watch for several threats and assassination attempts on national figures.

October: Some losses due to wastefulness or speculation by our government will come to light this month. This arouses the public to an angry mood. We will feel more restriction on our purchases. There will be limitations on our freedom due to wastefulness in Washington. Those in power will attempt to play down this situation. The opposition will not allow it to be pushed into the background. On the international front, we will be held responsible for activities in other countries that we have not participated in, leading to our being slandered by the world.

Finally, our government will listen to the electorate and ignore the insults from other nations. It is necessary for the government to protect those in power and give the public more consideration. A large fraud, similar in size to the Watergate involvement, will come out in the open. It will involve a government agency that has escaped publicity in the past. This particular incident could sway the elections during November. It could cause a completely different type of administration than we have had for a number of years.

November: Get ready for the fireworks. It will be like the Fourth of July. The sudden disclosure of a candidate will finalize the elections before we have a chance to vote. I find there is a possibility that we will have a new, different government after this election. Expect an active, attractive, energetic, intelligent and knowledgeable woman to be elected to a high national office. She will be respected and become one of the best public servants that we've had for a long time. Many other upsets will cause old heads to roll and new lights to shine. Confidence in our government will increase.

December: Getting down to business will take some doing this month. The holiday buying season will be good. The general economy will be on the incline ever so slightly. Merchants will find more profits this year than in 1975. Close associations and alliances will be formed early. This will enable Congress to make better progress and eliminate much confusion during the change of elected officials. You will find stronger female influence in political affairs. The transition will be smooth from male domination to male-female co-rule. A scientific advancement in the medical field could be announced during this month. It will be beneficial to all man-

kind. It will be quickly used and copied by other countries. It will be a long sought after cure for a serious disease; we'll share it with all people. The economic conditions will be improved over 1975.

CHAPTER 44

BRIGHT STAR

Interplanetary Predictions

June Young, Bright Star, an attractive black psychic and UFOlogist, is publisher of a semiquarterly newsletter and monthly newspaper of Three Elohim, 3118 N. 13th Street, Milwaukee, Wisconsin 53206. She has joined our panel of psychics for 1976 and will be prognosticating on her specialties—weather and UFOs.

Last year she informed us of her contact with an angelic source and space intelligences. Her latest message is a prayer given to her by Archangel Michael for release:

O, Lord, save us!
Don't let our cities or
Nations be lost!
If we have transgressed
against our laws,
PLEASE FORGIVE US!!

For the past three years she has been on radio station WAWA, Milwaukee. The *Milwaukee Courier* publishes her predictions.

Her predictions for 1976 include the following:

Railroads will talk about stopping some of their lines or going out of business entirely.

Auto sales will have a roller coaster effect, with ups and downs. I see a car that will be run by a pill dropped into water. I saw sparks unite and the small car shot forward.

Look for more bomb threats. Some bombs will be exploded in public buildings in New York, Chicago, and Wisconsin.

Crimes will reach new record highs in the Western world. Murder, purse snatching, burglary, and stolen goods will head the list.

Depression? No! A recession in 1976.

The unemployment rate will still be high. Lots of people will be forced to obtain welfare.

Prices of food for 1976 will be a yo-yo—ups and downs.

We will, in 1976 and 1977, hear more about solar energy; it will not be disbursed as are our present day utilities.

Fashions: The early 1930s styles will still be going strong.

It seems like winter won't be as long in 1976 as it was in 1975. There will be no budding of the trees until middle May.

Investments: Real estate and radio communication are favorable for 1976.

I predict massive tremors in California and more earthquakes for Peru.

I saw people on the move, crossing a bridge, bombings, buildings crumbling in the city of Lin, Thailand.

Bob Hope will make a fabulous comeback and do more world tours.

Medical Discoveries: A new drug that will combat and arrest sugar diabetes. Look for more talk of cancer cures. Help is coming for sickle cell anemia.

Politics: President Ford: I saw a flashing green light. He won't finish out his term in office. Rockefeller will probably be the next President. He has an excellent chance. Governor George Wallace will not be the next President.

Ex-President Nixon will have more scandal and accusations thrown at him. Nixon should watch his diet and stop getting angry. He must keep his blood pressure down.

Ted Kennedy will be under attack by a well-known magazine. They'll claim to publish the true story of his life. A scandal story will also appear in a big metropolitan newspaper. I don't see him running for the presidency. If he does, he will drop out of the running because of dirty politics.

Look for more talk on the hows and why of John and Robert Kennedy's deaths.

Kissinger will have to have bodyguards this summer and fall.

Religion: Unheard-of religions and cults will appear in 1976. Look for still more changes in the Catholic and Lutheran churches.

Storms: I see more electrical winter storms, power outages, and extreme damage. Look for lots of rain and flooding in the Wisconsin, Illinois, Iowa, Missouri, Michigan, Indiana, Tennessee, New York, Connecticut, and Massachusetts areas. People will be evacuated to higher grounds. I see Red Cross and Civil Defense helping stricken areas.

Nursing Homes: There will be a big scandal of how the poor and the needy aren't properly taken care of in several big rest homes. Something will happen to some of the patients and their relatives will demand a full investigation of why they suddenly died.

There will be a lot of talk in 1976 of a different money system. The American dollar is still depreciating fast. Coming up in the not-to-distant future is a run on banks. People will try to get their savings out of the bank and cash in their insurance policies. This movement will put a big damper on the whole Western world's money system. More business firms will sell out and move abroad.

Stock Market: Same as 1975. I saw a roller coaster—ups and downs.

1976 will be a year for test-tube babies. Watch your paper for this.

T.V. Personalities: Johnny Carson, Merv Griffin, and Mike Douglas—I saw a ladder, meaning still climbing to fame.

UFOs: Startling discoveries concerning the planet Mars which will be in the news. This will not be hushed up but will spread like a barn fire. People will readily admit their sightings and their trips on fantastic crafts. Watch Saturn: a big discovery concerns this planet. Venus and Mars will play a big part in world affairs this year.

Wars: War will break out in the Far East unexpectedly. The war is not over. Maybe hushed, but certainly not over. You will think it's Pearl Harbor, but I don't believe it will last more than two years. I see something smaller than the naked eye and get the impression of germ warfare.

Betty Halstead (1324 N. 45th St., Milwaukee, Wisconsin 53208) is Bright Star's student. She contributes these forecasts for 1976:

Crime will continue to increase because of shortages of work and money.

Farmers will continue to have a bard time because of flooding. This will create more shortages in food and produce.

Earthquakes of major proportions will hit Los Angeles, China, and Japan.

The medical profession will find that people in mental in-

stitutions are mineral starved. This will be corrected by the proper intake of minerals and diet.

A well-known Western movie star is going to be in another battle with cancer of the throat. I feel he will lose this battle.

President Gerald Ford will not finish out his full term in office.

CHAPTER 45

FREDRIC STOESSEL

Psychic Businessman

Fredric Stoessel is an author-publisher who has received press and public comment due to his psychic abilities. From 1962 until 1970 he published an economic-political newsletter and also was a business broker. The accuracy of his predictions impressed author Hans Holzer, who featured some of them in his 1971 book *The Prophets Speak* and included a section in *The Ghosts That Walk in Washington* pertaining to Senator Kennedy.

He was born in Chautauqua, New York, in 1928. His father was the late Albert Stoessel, American conductor and composer. His mother, the late Julia Pickard Stoessel, came from an old New England family who were among the original Pilgrims. A cousin, Walter Stoessel, Jr., is currently the United States Ambassador to Soviet Russia.

Fredric was educated at the Collegiate School in New York City, attended Oberlin College, and graduated from N.Y.U. He served in the Korean War as an officer on a destroyer in combat. After a period as a salesman for a printing concern, he founded a television syndication business and then a publishing business.

Between 1965 and 1971 Fredric worked actively with police forces to combat the growing menace of organized crime and exposed as much of it as possible in his writings. He can be contacted during the winter by writing to Box 5012, Woolsey Station, Long Island City, New York. During the summer he may be contacted at Box 338, Weirs Beach, New Hampshire 03246.

Fredric Stoessel's predictions for 1976 follow.

In late 1975 or 1976 three of the most famous national mysteries will be solved. It will be ascertained that Amelia Earhardt was on a spy flight in 1937 for the United States. She was brought back to the United States under cover in 1946, although it is unclear to me if she is still alive or not. When the full story is told, it will probably betray an unseen

side of the character of President Roosevelt. It may indicate that Pearl Harbor was unnecessary.

The true assassins of the late President Kennedy will be revealed. It will show that certain Texas politicians, along with the crime syndicate and oil interests, planned and executed the assassination. The same group had an interest in the elevation of President Nixon to office. When Nixon ended the war in Vietnam, this group planned his political assassination, since it was impossible to use physical violence.

The long-simmering case of Alger Hiss versus Whittaker Chambers will finally be solved, although it is doubtful if a legal reversal will take place. What will be shown is that Chambers framed Hiss in 1938 and told this to Representative Nixon in 1948 who, with the same small group, engineered the indictment and conviction of Hiss as a traitor to the United States.

One of the main figures behind all of these manipulations will turn out to be Howard Hughes. Again it is doubtful if any legal convictions will ensue, but for publicity reasons, his behind-the-scenes maneuvering will come out. It will also be shown that Hughes had dealings with the Japanese prior to World War II and a hand in the Earhardt tragedy and ultimate release.

The Political Scene: At this writing it is clear to me to expect a Democratic victory over the White House. It is unclear to me exactly who will be the actual President. My psychic feelings are as follows:

Governor Wallace is a sleeper with a great deal of unsuspected strength. He will be the major force to contend with. At this writing his strength is larger than he is being given credit for. I am unclear as to his winning the nomination.

I do not believe Ted Kennedy is destined to be President. There will be a desperate attempt by the Democrats to draft him with John Glenn as a counter-Wallace force. Should he be nominated he would win. He would not last long in the White House and, as a candidate, he faces terrible threats of assassination.

I tend to see unknown candidates coming up. The name of former Senator Harold Hughes has good vibrations as does Senator Stevenson. The key to victory lies in the candidate who can capture the discontent vote.

In the Republican field, Governor Reagan leads as the possible candidate. He will not win the election. I do not

foresee Rockefeller or Ford as candidates or winning. The Republican conservatives under Buckley and New Hampshire Governor Thompson will likewise be a force to contend with, but will be nowhere as powerful as Wallace.

The actual winner is unclear to me; I believe it will be a Democrat, but it may go into the House of Representatives.

By and large the people are fed up with politicians and unless one comes along who is honest and blunt, people will pay little attention to the coming election. I sense John Connally will be in the headlines, but he will not be nominated, although he will be responsible for some necessary reforms.

Nixon: Former President Nixon in mid-1975 is far from out of the mainstream. He is an active force, especially as an influence on Henry Kissinger. The change to Ford and possibly Rockefeller was worked out in advance so that this influence would remain active. My feeling is that Nixon will rise up for one last time and then fade away either to the next dimension or as a viable political entity.

Kissinger: The real force behind the United States is Henry Kissinger. Kissinger admires German manipulator and dominant figure Bismark and is unconsciously influenced by him. Neither President Ford nor Rockefeller, who admire Kissinger, understands his massive influence or the Nixon connection. However, it will be seen that some Latin American problems were actually manipulated by Kissinger via his National Security position.

Kissinger will never be President. Most likely by 1976 he will have resigned. As a consequence, no Secretary of State will ever again hold the position of National Security Advisor to the President.

The Economy: The probability for 1976 is a massive drought in the Midwest. Unless prayers and spiritual work are instituted to reverse it, this will come about.

America will enter into a golden economic period starting with the end of 1976. However, oil prices may cause some problems in the upper regions of the nation which depend on home heating oil. The winter may be severe.

The problems faced by the City of New York will multiply to include the federal government and, as a matter of necessity, layoffs and cuts in spending will be instituted. The problems of our cities are a prelude to the problem of the federal government. The currency structure will be changed.

The current desire of the treasury department to go off the gold standard will be reversed; a strong stand for peace will take place when the government goes back on the international gold standard.

The CIA: Politicians will try to stop investigations of the CIA. The CIA will be seen as a potential Gestapo over the lives of Americans. Most of the problems mentioned in the national mysteries will be seen as products of the CIA; the answers will be found in its files.

Likewise, the FBI and outraged citizens will eliminate organized crime and the armies of legitimate business figures which front for it. A distinct possibility remains that a socialistic bureaucratic influence will set in. As a result, money for business and investments will be curbed as this socialistic trend develops.

I do not see the investment community as a viable place to work. More and more government regulation is to be expected and, unfortunately, is necessary.

Investments: The best growth investments will be small, well-managed companies with a good, marketable product, run by ambitious and energetic management. These companies will come out over the counter at 1 to 2 dollars and be moneymakers from the inception.

The large corporations, such as the blue chips, are now mainly run by people with no imagination. They have to turn to the new companies and to outside sources for imaginative selling and promotion.

Rather than investments, I foresee growth in companies who actually do the marketing and selling to the consumers. These companies will be profitable.

Religion: 1976 is a year in which a great many well-known organized religious figures will not be as admired or respected as in the past. Regretfully I place Billy Graham at the top of this list.

Two well-known Protestant church groups will be found to have substantial investments in questionable, but profitable, enterprises and may be found to have been an outlet for underworld funds. Corrections as to investments will come from alert and outraged clergymen within the church.

With the great emphasis on do-it-yourself books and mind control courses, organized religion will continue to decline. There will always be a church around for people who want it and need it, but more and more will fall away.

While I do not know if it will be in 1976, there is a time coming when the voice and direction of J. F. Kennedy will be actively heard and will be actively guiding the nation. President Kennedy was cut off early from his work and is hovering around the Earth plane guiding and helping. His voice will help mortals to realize there is no death and continued physical life. Most probably it will come to a Catholic source.

The great trend in religious things is towards courses on mind control. There is great danger that these teachers may go on ego trips and lose the humility which makes them great. One or two will do so in 1976, ending up in legal troubles and causing headlines. This will be because of the teachers, not because of what is taught.

The Arts: In 1976, Dixieland jazz will make a great comeback as a popular item.

The big-band sound will start to develop again.

Unfortunately, the trend toward violence in movies will continue. A great many actors will band together to stop it. 1976 will see the start of TV executives trying to stop this trend, but the lure of profits is too great. As a result, TV will continue its downward slide.

One famous TV show and management will fold up with a small scandal attached to it.

Education: 1976 will see the start of private education and the fall of public education. Private education is the coming thing in America, as funds decline for public schools.

The Roman Catholic schools will become more oriented toward social work and social consciousness.

Many colleges will face a serious financial squeeze in 1976. As a result, radical teachers will be forced out; only those able to teach and communicate will remain. Colleges will return to research and basic facts, rather than teaching social change.

My conclusion is that 1976 will be a year in which America realizes it is at an impasse. It can not go back, it can't stand still. It will find ways to get around and go forward, but the old ways are definitely out.

CHAPTER 46

MARK VITO

Predictions from Space People

Mark Vito is a young astrologer and writer who claims to have been contacted by people on UFOs. He is the author of a manuscript on Christ's life. His address is 4970 Virginia Street, Gary, Indiana 46409.

"My second contact occurred on March 19, 1975," reported Mark. "I received the following message, which was given to me by mental projection: 'United States founded by Higher Beings, extraterrestrials. Study the Great Seal of the United States on reverse side of dollar bill. Our messengers responsible for its design. We are the Flying Eagle. Thirteen of us responsible, as shown by the thirteen stars above Eagle. Washington, Adams, Franklin, Jefferson, Madison, a few of our coworkers. Divine Plan in operation. We bring you sweet tidings of great joy. This is the beginning of remarkable golden goodness. You have no idea of the magnitude of our work. The Great Seal of United States appears on our ships.'"

The Flying Eagle says that in 1976, at the time of the Bicentennial celebration, the United States will witness the most astounding UFO activity to date. Many young people will be contacted openly and will reveal their information to the press and they will be written up in the news. One individual in particular will stand out, because the space people will leave him with a star map which includes their solar system. The map is actually extraterrestrial in origin.

Also, the space people will influence television and the movies very strongly in 1976. There will be more stories centered on UFOs and extraterrestrials than ever before; there will be TV "specials" on UFOs that will enlighten people. Religious institutions will be affected.

The Bicentennial celebrations will be quite a "bang," because the US was originally founded by these space beings.

Another revelation will be the fact that many young people today are extraterrestials in disguise. Their true identities will be revealed to them. They are working for the space people. You can tell them by their habits (their eating requirements).

These "ETs" are well-hidden in places like college campuses.

More women will be adopting babies in 1976. The thing about this is that some of these babies are not from this world. They have been mysteriously "dropped off" to grow up undetected to bring in the Aquarian Age. The space people are coming to prepare some of us for an evacuation to another suitable world around the year 2000.

There will be more mysterious disappearances. Some people will be teleported to other worlds and refuse to come back. The space people infiltrate our society to help purify it.

Many young women will give birth to children who are not from this world. Many male spacemen will be disguised as normal men and entice these young girls into intercourse to mutate the race into a better species.

I see a motion picture which will shock the public with its extraterrestrial message and its revelation about the New Testament in 1976.

CHAPTER 47

LEO ELLIS WAGNER

Inspirator and Prophet

Leo Ellis Wagner (2051 Monte Vista Street, La Habra, California 90631) is a psychic and hypnotist who attracted national attention by predicting the headlines in advance of a newspaper's publication. A psychic and hypnotist, Mr. Wagner feels his work brings out the best in people. He has compiled a lengthy record of prophetic accuracy and has been active in the psychic field since 1952.

Mr. Wagner's forecasts for this year were made from his hospital bed in La Habra, California. He is confined because of paralysis of his legs. Readers may want to send cards and letters to cheer Mr. Wagner during this stressful time in his life.

Mr. Wagner's forecasts for 1976 are:

I predict a huge shakeup over the Howard Hughes interests.

Vice-President Rockefeller is in by design and intent.

Attempts on Kissinger's life overseas will fail. He will fall from view for a spell but will be on a secret board of constituents now being reorganized.

Look for startling news concerning motion picture star John Wayne. His interests will turn more spiritual.

Be prepared for remarkable proof of life after death in the year ahead.

One with the initials "BB" will have a new breakthrough in electronics to open an old but reliable healing technique.

Albuquerque, New Mexico; Phoenix, Arizona; Florida; Reno; Mt. Shasta; Germany; New Zealand; Idaho; Colorado; and Utah will produce startling new medical methods.

Penal systems will change as more value is given to thought waves and mind-to-mind communication.

A wicked system of control that feeds on false statements will come to light in full force by May 1975-1976-1977.

We are due for more uncovering of the covered as the public awakens from its lethargy.

War potentials will increase, will reach sudden peaks, and

stop. We will have negotiations to prevent an onslaught into the Middle East impending catastrophe. Russia and allies want to get to Red Sea for potash.

Oil will be found in a most unlikely overlooked place in our country.

A place with initials "VM" offers a very special system of motive power. This will be a remarkable advance that, with one slight change in chamber, will be the acceptable answer in the automotive field.

Color healing, music, and subliminal techniques will prove effective on body cells. I see two or more new metaphysical recuperative centers legally able to bring out things known for years but never tried.

There will be several well-known psychical spiritual healers working with medical doctors whose interest has been stimulated by kirlian photography and new biochemical approaches to medicine.

I am guided to give this prophecy in rhyme through a source I know as Ashtar—the many communications given before have proven correct. They like to write in spontaneous free-flow rhythm as even the universe works in rhythmic flow.

Heed all those with spiritual souls attuned.

Heed well the power of the spoken word and in writing and we from the Council of the Deven Lights directing one of our channels can inform you of much-needed information to bring you greater assurances in your Shan (earth) years of the concern of the Hierarchy of Elohim-Jawah-El-Supreme. There will be in 1976-1977-1978 the following events:

We come as messengers of Love and Peace.
We would have your hatred cease.
We would want you all to know
Love has a power God does show.
The war your hearts in greed have held.
God will intercede and will broken promises weld—
First you will know of barren land
and prophecy that is in command.
You will see Our Signs in the sky.
And unearthed evidence comes to eye.
Quakes around to show how quick
Those not on beam could leave sick.
God is Love and wants all well.
Man by wrong makes all his hell.

We on Venus know the fact.
Moving forward what Love will back.
You are in stage now as we once were.
And we are around to help secure.
In February of 1976 Great news unfolds.
Such treasures of spirit long too cold.
A man with pseudonym S Binteals
Will bring a message with all details.
Listen to this man.

In 1976 you will have proof the Incas were in contact with the planet Venus. The Third Eye spoken of in the Bible is in reality a great cosmic seat in a spiritual frequency of light. It is the light of wisdom. I predict several readers will add to and confirm what I now predict.

A man from outer space will meet a special group here in US. His body will be perfectly balanced in a golden tan. His piercing violet eyes will bespeak of true wisdom of the soul.

The Communists will start a blockage against the Suez Canal in a clever move to force an international incident before the end of 1976. This is prelude to war.

From a place in Iowa will come a startling new grain-growing and recovery process with great merit.

Ecologists will also bring forth a process that not only improves the grain but will have such reproductive qualities that it will offer an answer to famine.

Man must turn back to God Almighty—the Universal Supreme. I saw a mass of flesh circling the globe in the most evil of degradation. Then I saw a huge mass of angelic beings sweep away the mass of fleshly beings—engaged in their acts of dope, evil, and wrongdoing. Then I was taken to the black hole recently spoken about by those with scientific concern. I entered the black hole and a voice spoke loud and clear for two hours answering the questions I asked. I was told such things that in the very near future as a channel in the service I may be privileged to reveal. Returning back a huge cone-pyramidal shape I saw in clear sight vibrated over my bed where my body was still. Suddenly my whole body rocketed out, shaking the bed. Within one year the names of Richard Wardell, Ruth Greenwood, Fuller F, Johnson, Dr. Stack, Strong, Cotter Institute of Hypnosis, Jon Cox, Cotten, Lucians, Carte, Diane Harmon, Bob Beck, Warren Smith will

sing out in proof of many things we have to say and serve as a channel.

Light will prove to be effective in the cycle of sexual activity.

In 1976 we'll have more births because of the karmic law. Certain souls must return for one more Earth opportunity to adjust their bad karma. Those alive under good karma will live in the flesh and not know death again. When scientific new evidence comes to light, man will have no reason to live an allotted time, pass on, only to come back again. Reincarnation will take on new scientific and esoteric proof.

Cancer cells will be proven to have mental stimulus. The fear of cancer will often promote cancer. Cancer cells take on a very special rhythmic vibration in the body and, if out of balance, attacks an outside form or entity. This is usually treated as demon force by some healers. Japan has a cancer cure now held back by the control system that prohibits the humanitarian healing. This will come to light.

Look for very unusual and startling sightings of space crafts from Venus under the command of Ashtar and Altoa.

Once again, more proof that Atlantis is not a myth. New evidence in 1976.

The projection of the mind through mental electronics will be proven and reevaluated. Thought is the greatest power and God is pure thought.

A new color-healing breakthrough coupled with music and sound.

New improvements in old-fashioned hospital equipment such as bed pan needs, etc.

Electromagnetic principles in medicine will be effective.

CHAPTER 48

CARSON WEAVER

The Virginia Psychic

Carson Weaver (Box 104, Bealeton, Virginia 22712) is a psychically gifted young man who was raised on a farm. "I found the quiet environment of the country to be excellent for meditation," Weaver explained. "In time, I discovered it was possible for me to see the future. I have been able to foresee certain events since I was fifteen years old."

Weaver stressed the difficulty of psychic forecasts. "Getting an answer can be a difficult task," he related. "If the answer doesn't come instantly, I expend considerable energy to get it."

Weaver offers a counseling service by mail. Readers may receive a reply by writing to him and enclosing a stamped, self-addressed envelope. His forecasts for the next year include:

There will be an increase in unemployment due to high interest rates imposed by government to stop inflation. The construction industry will be hurt more than other industries. Building materials will go up in cost as a result of inflation.

As an election year, 1976 will be known as a year for cuts in defense and nondefense spending. We will also see some troops withdrawn from Europe and Asia, with no concern in halting further Communist advances. Legislators will only be thinking about voters on election day.

Following the election, the members of both houses will be largely Democratic. A Democrat will also be elected President, in hopes of straightening out the economy. He will work to provide more jobs and get more people off unemployment compensation and the food stamp program. There will be three million more people on the food stamp program than in 1975. The lawmakers will take a second look at the country's welfare programs to decide who needs help.

The stock market will be a poor place for many investors. 1976 will bring great losses. People will turn to rare coins, stamps, antiques, and paintings as a good investment. These items will rise in value.

I see George Wallace's health improving. He will be walking. The pain he has during the day will get less and less as times goes on. He will reveal that he still wants to be President. Wallace's campaign will attract some attention, but he will not be elected President.

There will be an increase in the cost of electricity, gas, and oil. When this happens, the price of wood and coal will also make advances.

There's also going to be a shortage of copper and silver. Supplies will be very limited.

I see Jackie Onassis getting married again, but to a man more of her equal and age. I also see Jackie Onassis campaigning for Edward Kennedy to win the Democratic party's nomination for President.

VD will increase among a growing number of young people, many in their late teens.

There will be a decrease in the number of babies in the United States because of birth control methods becoming increasingly popular due to higher medical and hospital costs.

An increased amount of unexplained UFOs will be seen in different parts of the world.

Strikes and food riots in cities will headline the news during the summer months.

I see Ronald Reagan as a strong contender for the leadership of the Republican party.

There will be worldwide food shortages, but the United States will not be affected.

New Zealand and Australia will attract more tourists and provide investment opportunities for American investors.

The Cook Islands will become the most popular tourist center in the Pacific Ocean.

CHAPTER 49

LOU WRIGHT

Psychic Consultant

Ms. Lou Wright, a native of Indiana, was born October 17, 1936, under the astrological sign of Libra. She is the mother of two children—Teresa, sixteen, and Bryant, seventeen—both of whom are psychic. During her career, she has traveled extensively throughout the United States and Europe. She and her husband, a retired Air Force colonel, enjoy living in the small, scenic community of Booneville, Indiana.

Ms. Wright reports that she has been blessed with her psychic gifts since birth. She relies on God for her ability to help others and gives Him all of the credit. Lou finds time for all who need help and does not turn anyone away, regardless of his circumstances. Among her gifts is the ability to read Akashic Records, which relate to not only past lives but to the present and future. She is able to "tune in" to people by picking up on their voice vibrations, observing samples of their handwriting, psychometrizing articles of clothing, jewelry, and photographs. She also often "picks up" numbers around people, indicative of age or birthday. Lou has also experienced astral flight. She uses psychic healing to help others. She is also called upon to help locate missing persons.

Readers may write to Lou Wright, Stonehaven Drive, Booneville, Indiana 47601. Her forecasts are:

Patricia Hearst will return to public life in 1976. Emotionally and physically, however, she will be a completely different woman.

Prince Charles will be given additional responsibility by his mother in a reigning capacity.

Cher's television series will not last during all of 1976. There will, however, be a new marriage in store for her.

The stock market will make a good comeback.

There is serious surgery for John Wayne, due to a recurring illness.

In 1976, Oakland will be a strong contender for the World Series.

A. J. Foyt makes a successful comeback for the Indianapolis 500.

There will be a new, successful television series for both Glenn Ford and Robert Redford.

The Mayaguez incident will be proven to be contrived for the morale of President Ford.

The price of uranium will rise drastically.

Oil prices will rise. OPEC will not fall apart.

Utilities, fuel, and chemicals will be the best investments.

The President elected will produce positive results with negotiations in the Middle East. At this time, also, Henry Kissinger will be preparing for his resignation.

During this period, President Sadat will seek foreign monies for improvements. The reopening of the Suez Canal will bring an upsurge to Sadat's Egypt, with more rebuilding during 1976. This will benefit Russia by giving it faster access to clients in East Africa and the Persian Gulf.

There is death surrounding another leader of the Middle East.

There will be workable relations with Fidel Castro in 1976.

There will be a marriage for Jackie Onassis.

Kennedy will be drafted for the presidential elections. Wallace and Reagan, in general, will start on an upward trend.

There will be normal precipitation. Crops should have a better yield.

As the recovery of our economy occurs, the trucking industry stock will snap back. Railroads will also make a comeback.

There will be more investigation of problems with the Arab oil embargo.

There will be another tax cut with lower interest to industry.

The price of gold will stabilize.

Health care prices will soar higher; there will be Congressional hearings in regard to socialized medicine.

There will be the recurrence of a Mideast war during 1976.

Platinum and silver will be making a good rise.

Minor earthquakes will occur in California, especially in the Los Angeles area.

There will be another siege in Ireland with much more fighting involved.

Psychics will be called upon for medical advice and criminological studies.

Marked changes will occur in the Catholic Church, beginning with the Pope.

Dear Reader:

We want to thank you for buying this AWARD paperback book, and we do hope that you enjoyed it.

Our aim is to publish books that you want to read. Therefore, we would like to ask a few questions concerning your personal reading habits and preferences.

If you will check off your answers to the questions listed below and return to Award Books, Dept. RJA, 235 E. 45th Street, New York, New York 10017, we will be happy to send you a complimentary copy of one of AWARD'S current releases as our way of saying, "Thank you."

1. I decided to read this book because of:
   ____Personal recommendation
   ____Advertising. Where? ____TV ____Radio
   ____Newspaper ____Magazine
   ____Book Cover. ____Other
   ____Knew of hard cover edition
2. Where did you purchase this book?

THE BOOK OF CHANGES FOR 1976

IT'S 1976 AND YOU ARE THERE AS . . .

*Henry Kissinger enters a new field

*Jackie Kennedy Onassis marries again

*A woman is nominated for the Vice-Presidency

*Relations between the U.S. and Cuba improve

*Relations between China and Russia deteriorate almost to the point of war

*Profound changes rock the Vatican

*A hidden city of gold is discovered in the Andes

*Ladies of fashion begin wearing blankets outside in cold weather

These are some of the hundreds of predictions made by world-renowned psychics and clairvoyants like Greta Alexander, Joseph East, Dorothy Spence Lauer and Bertie Catchings.

Printed in U.S.A.
