Crippling drought hits southern Australia

news scope

SYDNEY, Australia (UPI) — Australia was reported Monday to be on the verge of a crippling drought that could turn the southern half of the continent into a giant dustbowl in a month.

Thousands of kangaroos already have perished in the Outback areas of the states of Queensland and New South Wales and agricultural experts said millions more will die of thirst and starvation unless rain comes soon.

Towns in New South Wales are running low on water and plans are being made to transport water from other areas for domestic use. The use of garden hoses to water lawns has been banned.

Prime Minister of Australia

Dear Sir:

I can save your country. Can give Australia all of the rain that it requires, immediately that you accept my services.

For your information I ended the killer drought in England a few years ago...see the hardcover book "Mysteries" by Colin Wilson (Putnam and Sons)...where this is documented.

You can secure a scientific report on my work by sending $7 to [redacted] Washington Research Center, 3201 Washington St., San Francisco, California, 94115. This report was done by scientists led by Dr. Jeffrey Mishlove. Just ask for the scientific report on TedOwens (PK Man).

A book has recently been written about my life and work (including the ending of droughts) by D. Scott Rogo (published author with 18 books) at 18132 Schoenborn St., Northridge, California, 91324. He is a parapsychologist and scientific investigator, and collaborated with scientists in the writing of the book, which is a critical, scientific evaluation of my work.

If you have access to copies of Fate Magazine, a popular American magazine, secure the copy for February, 1979, and read the article written by a scientist entitled "Angry UFO Pro phet Creates Psychic Havoc." The December 1979 copy has my rebuttal to a critic [redacted]."

I am half human, half alien, and work for and with UFOs.

Sincerely,

Ted Owens (PK Man)

200 NE 76th St.
Vancouver, Washington 98665

PS...I recently controlled the State of Florida. Ended its drought and caused other things to happen there. All thoroughly documented with scientists. You can check with Wayne Grover, Air Force Weather Expert, 3282 Parade Place, Lantana, Florida, 33462, and you will find that it is true.
