1964

July 4, 1964

Lonnie —

I wrote you a letter, some time ago, telling you we are at the Congress Hotel, Rm 600 12th & Walnut, Philadelphia, Pennsylvania.

Also I sent you a giant letter describing the circus. But you have not written.

I want a letter from you telling me you got my long circus letter.

I never held mail from Pat & you kids away from you, even if it caused me lots of trouble. I effect that same privilege to be given me.

If I do not hear from you — then I will know you are not being allowed to get my letters. Then I'll let PK settle the matter.

Love,

Dad

P.S. Enclosed is program from Pres. Johnson's shindig, which we did Saturday.

07/25/2025 16:36

Kids - thought you'd like this as a souvenir of the beginning of the exciting PK Man work. You were there !!

To: STATE DEPT.

FROM THE BEGINNING...

(written Before Sir)

October 19, 1964

Gentlemen:

I strongly urge you to read this incredible report, because the facts in the report cannot be challenged for validity. I have actual witnesses, and written predictions of these happenings, which are of interest to you, were sent to Government agencies before the actual events took place.

For the first time in the history of our world, PK (psychokinetic power - mind power) has been used under absolute control, with fantastic success, to affect government military operations.

For the first time, a definite control over ESP (extra sensory perception) has been demonstrably exercised, and proven.

Briefly, five geographical areas of the United States were "attacked" with PK (thought force) under definite control, and these five areas were, in each case from one to three weeks later, declared officially a disaster area. In four of the five cases U. S. Government military operations were the target of the destructive PK. Purpose of the PK attacks - to convince the U. S. Government, by actual demonstration, of the reality and existence of this new form of power, so that the U. S. Government would then accept the fact officially and allow PK to be used for, and no longer against, the U.S.

I shall stick to documented fact as much as possible. If I should digress, or get part of the material in wrong order...it is because I am not a scientist, writing a scientific report.

Before going into the actual Report - allow me to repeat a fact. The U. S. Government has, within its hands, at this time, a weapon and a tool available to no other country in the world. A weapon and a tool which will open up an entirely new field of science, in its application and study. A weapon and a tool which can spell ruin to Communist activity and progress. IF, that is, the Government avails itself of the tool and weapon.

REPORT ON "PK MAN"

My name is H. T. Owens. I am married, and have three children. My wife's name is Martha, and my teen-age children are Harvey and Lornie, ages 14 and 15, respectively. (The youngest is Beau, only 2 years, and of course he takes no part in any of this activity.)

In August, 1963, it all began. We lived in Phoenix, Arizona, and rented a house from Frank Boggio. It was terribly hot, so my son Harvey and I decided to try to make it rain and storm (my grandfather, John Owens, had shown me how, when I was a child, in Bedford, Indiana. But only once in my life had I attempted "weather control" - when working for Lee Construction Company in Houston, Texas, in 1947. At that time, with three witnesses present, I made lightning strike close by our office on the ship channel, on a clear, sunshiny day.)

So August 15, 1963, Harvey and I began our rain-making. On Aug. 18, Phoenix had perhaps one of the worst rain storms in its history.

Encouraged, my boy and I...and my daughter joined me for a while... decided, in order to prove it no accident, to prepare a series of storms,

08/02/2025 15:45

without cease, for that area. I wrote to the local newspapers to that effect, signing my letters "Rainmaker." Something told me I should have something on record.

Then followed, within days of each other, eight successive storms... so devastating that the area was officially declared a disaster area.

We had to move, then, to Los Angeles, and I read in the LA papers that Los Angeles was suffering from drought and needed rain desperately. So Harvey and I decided to furnish the needed rainstorm. I wrote to both the Los Angeles papers to that effect, on March 12, 1963. And we went to work.

March 17 Los Angeles had a terrible windstorm which blew down trees, signs, houses, etc., and started roaring fires. But no rain. We kept on working. March 23 we brought in the rain. The LA Times paper headlined "Rain Plays Havoc." They get their needed rain.

While in Los Angeles, during this period of time, I gave considerable thought to the possibilities of what we had done and what we had discovered, and wrote letters to the State Department in Washington, offering to put our abilities at the use of the U. S. Government (weather control being quite a useful tool, both in war and peace.) But no answer. So I decided to force an answer, if possible. I wrote to the State Department and announced that I would "attack" the space center at Cape Kennedy in Florida with PK...and that I would attack Operation Desert Strike, which was to take place at a later date in the Needles, California, area.

Shortly thereafter a Ranger VI rocket failed at the Cape; and the Operation Desert Strike turned out to be a deadly, murderous comedy of errors.

Also during this time I informed my ex-wife, Pat Shannon (who lives with her husband, Jim Shannon, in Inglewood, California) of my tremendous discovery. I discussed it with my brilliant landlord, Apparicio Ranghel. (Mr. Ranghel can now be reached through the Colombian Consulate in Washington, D.C.)

My family left Los Angeles, and proceeded to Las Vegas. We decided to give Las Vegas a storm. In two days they had it. June 8, 1963, the newspaper headlines read "Hurricane Force Winds Lash Vegas." (When they used that word "hurricane" I had no inkling of what was to come later on.) While there, we needed money, but had only $25...so I gambled for three days at the craptables, experimenting with the use of PK. I found that it worked, but slowly, and percentage ate my small amount of money away before the PK could build.

While in Las Vegas, I took my son and daughter to the office of the Las Vegas newspaper to see the Editor...and I typed out my work with PK, what we had done, etc., for the Editor, and explained it to him verbally, hoping that perhaps there might be a way of getting the attention of the U. S. Government. I suppose the Editor still has the typed information gathering cobwebs in his file, because nothing came of it.

We then drove to Myrtle Beach, South Carolina, and there I began my work in dead ernest. I wrote to the Space Agency at Cape Kennedy the last week in July; also the State Department; and several other places -

08/02/2025 15:49

10/19/64 p3

that in the months ahead I would have my own private "war" with Cape Kennedy and its space work. That I would cause lightning to strike it; would cause human error; fires to start; magnetic disturbances; breakdowns in space equipment; and that I would bring hurricanes into the area.

Omit

As I have said, this was the last week in July, 1964, and I described my plans in detail, using a map, to Eric Bremmer, a man of German nationality whom I met there. He was a waiter at the Bowery, and was instrumental in my getting a booking there at the Bowery. (Eric is blond, blue eyed, has a wrestler's build (we exchanged judo knowledge) is covered with tatoos, and travels with his "wife" who lives in Columbia, South Carolina. He had been arrested before on the East Coast for armed robbery; also arrested in Florida for running guns to Cuban rebels...he told me.) Bremmer is not his real name.

My family, of course, knew what I was doing, in detail, and my son was working with me on some of my projects with PK.

My first big result came on Aug. 19, when lightning struck the Titan II rocket at the Cape, on its "lightning-proof" pad. We had been working for days specifically for lightning strikes. I wrote to the Cape and told them I had caused this, and to look out for havoc and confusion at the space center which would follow in the weeks to come.

Hurricane Cleo formed, and I guided it, with my control methods, straight onto my target - the Cape. Now, it is interesting that, before Cleo even reached Miami, I wired to the Cape, offering to stop (divert) Cleo from hitting it, if they would answer and request it. They did not, so I let it strike. A two dollar wire from them would have sent Cleo off to the right into the Atlantic, and saved several hundred millions in damages.)

It is also interesting that, as an experiment, when Cleo was officially pronounced "dead" in the papers - I brought her back to roaring life with PK. I did the same thing with Dora, later.

Then Titan III was sent up at the Cape, and I brought it down with PK, splashing into the Atlantic.

Then newspapers publicized "OGO" - the monster satellite that would be sent up from the Cape. I wrote the Cape again, Aug. 30, warning them. They disregarded the warning, and went ahead. My PK ruined OGO.

Meanwhile Hurricane Dora had formed. (My PK method includes the knowledge of how to form hurricanes, as well as how to direct them.) I worked hard to make Dora turn left, because she had been formed aimed in the wrong direction. She did turn, and obeyed, and struck not far from the Cape. Close enough to bother the space center. (While I was giving all of my attention to Dora, Hurricane Ethyl got away from my control and went straight north. I learned a lesson from this.)

Would like to point out that, during all this chaos at Cape Kennedy, as I had predicted, missile centers in California were having success with their shots...and this has applied during my months of war with the Cape.

Mind you, lightning had stmmkk their Titan II; Titan III came down; OgO had been ruined; and they had had two hurricanes track across them... and still they didn't believe me! All within three weeks time!

STATE DEPT.
10/19/64

10/19/64 p4

On Sept. 3 I again wrote to the Cape, outlining what I had accomplished, and what they yet had to expect. I told them there would be other hurricanes to follow.

Then in the papers I read about troop exercises that would take place in North and South Carolina. So on Sept. 5 I wrote the State Department (I have my copies of these letters) that I would use my PK against these military exercises. Result: The area was declared a disaster area, during the exercises, from storms and floods.)

And, of course, the Cape Kennedy area was declared a disaster area, from Cleo and Dora.

On Sept. 5 I again wrote Cape Kennedy. No answer.

Hurricane Gladys formed, and I brought her in on a straight line at the Cape...and for the first time, I erred. Secure in the belief that she would hit the target, I went to bed. Next morning I discovered that while I'd slept she had veered away atthe last possible moment, up the coast. I learned a lesson from that.

Then I read of an atomic test to take place in a salt dome in Mississippi. So I hit the site with PK. That was Sept. 17. They haven't been able to set it off yet, and I should not like to be near there when they do.

Then I read of NATO ship exercises and sub exercises...and sent PK at it, to cause confusion and accidents. But evidently I accomplished nothing. At least, nothing was published on it. So I do not know.

At this point, irked with the slowness of the U. S. Government, I wrote to President Johnson, Edgar Hoover, the National Security Council, and the State Department...that I would extend the PK field in the Florida area to cover the entire U.S. area (only military operations) and would make a "Cape Kennedy" disaster area out of the California coast. (Although this takes a bit of time...it is not done overnight.) I went to work.

Three days later came the disastrous fires on the California coast. It was soon declared a disaster area, officially. (I also worked on an earthquake there, but it has not yet developed. It will, of course. Looking at my percentage of success, would you bet against it?)

They got up a Minuteman II missile at the Cape at this point...which I then hit with PK...and for some reason the PK failed. (They also got a big Saturn up and operational, and I had special PK on it...do not understand why I failed on it. But I had a couple of failures.)

On the 29th a Minuteman I missile was shot up from the Cape. I destroyed it.

Then an Imp satellite was sent up. I hit it with PK, and it failed.

Then Hurricane Hilda formed. I was, at the time, preoccupied with pressing personal matters, and neglected Hilda during her important opening moves. Seeing that she was going too far West to make my Cape target, I guided her onto the new space activity at Michoud, Mississippi.

43 miles from New Orleans, also my Betsy target (NASA - Saturn)

08/02/2025 15:49

(5)

10/19/64 p5

Then my family read an article in the newspapers that brought about hysterical laughter. It was an article from Moscow, Russia, saying that the U. S. Government was controlling hurricanes and running them onto their communist countries (Cuba). Well, at least Russia was more discerning than my own U.S. But they had the wrong guilty party. After all, it would be ridiculous for the U.S. to take hurricanes back and forth over their most important space center, true? (Cleo, Dora, Gladys and Isbell.)

Well, from Hurricane Hilda the New Orleans (Michoud space center) area was declared a disaster area.

Next the Russians anounced that they would send up two space ships, each containing three people. So I decided that enough was enough...that I would begin hitting the Russian efforts. On Oct. 11 I wrote NASA and the National Security Council that I would attack this Russ space shoot with my PK work, and force the space ships down.

I directed PK at two space ships. One went up. I do not know what happened to the other one. And the one that went up, came down prematurely. Because, it is believed, there was "trouble." I can assure everyone that there was.

Then Hurricane Isbell formed, and I guided her straight onto the Cape target. (With each hurricane making "hits" I have had to correct its direction usually one or more times. Cleo started to turn left into the Gulf, and I had to correct her to the right. Dora was going north; I had to correct her to the west. Isbell was going off into the Gulf; I had to correct her to the right. And I might mention that I was successful in experimenting with Cleo in making her circle and hover, for one or more hours, in an area.)

There you have a factual report, unbelievable in content, but perfectly true. Perhaps I have written it poorly, but it has happened, and the facts cannot be denied.

The question is: What is the U. S. Government going to do about it? Will they use this tremendous ability and power I have stumbled onto by accident...or will they continue to ignore and disregard it?

I think that any country in its right mind would immediately contact me and begin tests and assignments. After all, this controlled PK has a wide variety of uses, both constructive and destructive.

And I will tell you that I feel that President Johnson must remain our President, for the safety of our country...and am directing harmless PK against his opponents to utterly defeat them. As I say, PK works in a variety of ways.

[redacted]

This is sworn to be an absolutely true report.

SPACE CENTER, CAPE KENNEDY

SEPT 3, 1974

GENTLEMEN:

AM AFRAID THAT IN SPITE OF THE FACT I'VE HIT CAPE KENNEDY WITH LIGHTNING; HIT CAPE KENNEDY WITH CLEO; AND KNOCKED DOWN TITAN III... YOU STILL ARE NOT TAKING ME SERIOUSLY.

YOU CAN CONTINUE TO WATCH DRASTIC STORMS AND LIGHTNING AND FIRE AND HUMAN ERROR — GOOF UP THE EAST COAST OF FLORIDA, FROM DAYTONA TO MIAMI, — OR YOU CAN GET IN TOUCH WITH ME.

LATER, IF I GET TOO IMPATIENT, YOU'LL HAVE EARTHQUAKES IN CALIFORNIA (HAVE TESTED, THEY ARE EASY) AND YOU'LL HAVE PROBLEMS WITH WEST COAST INSTALLATIONS.

(Censored)

H. Owens
(PK Man)

08/02/2025 15:49

Aug. 30, 1964

9/3/64 p2

In the interest of science and ultimately helping the U S, I have extended a "PK" field over the area from Daytona Beach to Miami, some six weeks ago.

PK, as you know, is Psycho Kinesis — powers of the mind over matter.

Question - Can Russia, by finding top ESP personnel, attack US people, US missile bases, Polaris subs, etc — by using PK?

It is fact that I can do this to Russia, for I have discovered a "control" method.

Your particular area has been my proving ground for 6 weeks. The lightning and the hurricane were my creation.

Around the entire Cape Kennedy area I have set up a PK wall so formidable that technically no missile should be able to take off and become operational Planes and personnel (human error) can also be affected.

The main things to beware of are:

(1) Lightning strikes Titan missile & ground controls; Moon Pad Rocket Gemini-5

(2) Tornadoes and hurricanes: Cleo, Dora Isbell Betsy '65

(3) Breakdown of small, delicate parts.

(4) Fires. Space Eye

(5) High % of human error.

↑ These entries added later

Your area was set, turned on (like an alarm clock) six weeks ago, and will be (and has been) heavily affected by the above. I could do the same to the California coast, New Mexico installations — but do not intend to. Yours is the proving ground for PK. in the military. But I have. - "Electra"

(T. PK'ing)

Dept. of Inventions, NASA

Dear Mr. Eastwood: —

— SEPT. 8, "BETSY" HIT ON "ELECTRO" (DAYTONA BEACH TO MIAMI)

Just a note to tell you*that have begun my PK work now, as I did last July on....to start hurricanes south of Florida and then guide them to Florida, and across Cape Kennedy.

In other words, the Cape will be target area again. And I learned much last year ... so that this year should be much more successful.

Included with the hurricanes will be lightning strikes, freak accidents, sudden storms of less than hurricane intensity, etc.

In the event that a hurricane gets away from me, due to an oversight, which happened once last year...then I'll do the same thing I did last year... try to guide it over to the Michoud space complex in Louisiana, near New Orleans.

I also may do some work on Houston, Texas.

It is my hope that some day someone wise will believe in my rare PK ability, and allow me to proceed with the work that I am now blocked from doing, by the U.S. Government.

Respectfully,

P K Man (c/o Owens)
Congress Hotel, Room 600
12th and Walnut
Philadelphia, Pennsylv ania

Lightning Kills Worker At Saturn Launch Pad

Cape Kennedy, Aug. 4 — (UPI)—Lightning hit a crane used on a Saturn 5 moon rocket launch pad yeserday, killing one man and injuring five others.

The dead man was identified as A. Trieb, 33, of Mitchell, S. D., one construction worker was hospitalized and four others were treated and released at a base medical center.

A spokesman for the Army Corps of Engineers, overseer of the construction under way here, said the men were pouring concrete on the 40-foot level of the launch complex when lightning traveled down the crane's cables to the wet concrete. Workers standing near the concrete were burned and knocked down by the flash.

...U.S. Pole Bases

MY LTR. RE HEAT AT POLAR BASES—

'Flying Saucer' Is Reported

SANTIAGO, Chile, July 8 (AP). — From the Antarctic Thursday came official reports that a mysterious lens-shaped flying object, maneuvering and moving at great speed, was sighted last Saturday.

A Chilean base commander in the Antarctic reported the object was "yellowish red, changing to green, yellow and orange."

In Buenos Aires, the Navy issued a communique saying personnel at Argentina's Antarctic base saw the flying object and photographed it.

Mario Jahn Barrera, commander of the Chilean base, told the Defense Ministry by radio that it would be too much to say that "all of us saw a flying saucer, one of these science-fiction things."

"However," he continued, "it was something real, an object that moved at amazing speed, maneuvered quickly and gave off a blue-green sheen. It also caused interference in the electromagnetic apparatus of an Argentine base which is facing ours on a nearby small island."

The interference was confirmed by the Navy communique issued in Buenos Aires.

"The object was yellowish red," Jahn said, "changing to green, yellow and orange. It would zigzag quickly. Then it stopped and we promptly reached for field glasses, telescopes, anything at hand to sight it. We watched as it remained quietly there for about 20 minutes."

Jahn said a corporal took color pictures but there are no facilities for developing the film. The men must wait for eight months to be relieved to have the film developed on the mainland.

1965

March 9, 1965.

orge: (CIA

ght I got a real shock. Someone called home before I got home from ice, and my boy, Harvey, took the call. It was someone from St. Paul, interested "in my offer". My brilliant son did not get the name or ication...the party said they would call back...but they never did. almost had an offer from somebody interested in PK, before I strike out ek at Gelman.

..back to the same theme, George. I guarantee (and look at the astounding I have had with practically all my projects) to reverse the current f the U.S. getting the shaft every day, in every way....and can change mate in V to winning for us, and bringing about what the U.S. wants. n be done with PK as easily as bringing about storms...knocking down ..putting officials in the hospital, etc.

t Mr. McCone's sister passing away...and PK had nothing to do with that, re.

ne if Mr. C. thought it had...he would send me to V and have me dropped rachute over VC headquarters.

There are two interesting things now to tell you:

(1) Nature has told me to tell you that to prove it is using me as its representative, it will do something without my using PK, or knowing any of its workings. Nature will, in the near future, change the North and South Poles. As the message came to me, I believe it will use extreme heat to affect those two places...and change the magnetic condition of the Poles. Nature added that you won't have to check with any Bureau on it...that the result will be strong enough to make the newspapers, where you can read about it.

Note: this is the first time anything like this has occurred. I don't know what Nature is talking about, or what it plans. Will be interesting to see.

(2) Exercise Silver Lance was useless, for test purposes. An invalid experiment. Any results from the Exercise are not worth the paper they are printed on. Why? Because Silver Lance was conducted in a growing, active PK field, with a wide variety of mechanisms at work in the field that would undoubtedly affect the Exercise to a large extent. The field is Electra; the California coast. If you doubt this statement, just look at Electro, in Florida, and what has happened there in my first PK field. Since July the entire area has been like an elephant with the nervous shakes staggering around drunk in a china shop. There have been hurricanes criss-crossing the place; planes have been falling down; President Johnson narrowly escaped bad injury on two occasions; the Space Eye burned down; and over a dozen rockets and missiles either blew up, fell down, or got up and went haywire. So don't tell me the PK doesn't work on an area. So, Silver Lance, to be a true experiment in the logical sense of the word, would have to be held somewhere else, without PK affecting it, to get a valid idea of its results, test-wise. Check?

Hoping the U.S. Government will use this tool, sometime this week, I remain

PK Man

08/02/2025 15:54
