

Oct. 26, 1979

Mr. Wayne Grover,
National Enquirer.

The enclosed documentation should fascinate you.

- (1) Xerox of my May 30, 1972, letter to Drs. Hynek, Sprinkle, etc., stating my intent to control the City of Cleveland, Ohio, by various means. See especially: "The people in the area... behaving peculiarly..."
- (2) Xerox of newsclip July 23, 1972, "Heat Stirs Up Crackpots" "...The flow of those claiming to hear the voice of God, receive messages from outer space, or be secret agents on secret missions started to climb last Monday and remained at a high level all week..."
- (3) Xerox of Otto Binder (famous author) notarized affidavit re my control of Cleveland...and describing my method of working with my UFOs to direct the sun's rays down onto Cleveland...exactly as I have done with Florida (important to keep this point in mind.)
- (4) Xerox of West Palm Beach article May 28, 1979, "Crazy, Weird Things?" "...More is to come, Owens says, from giant UFOs deep in outer space. 'One of those will be reflecting the sun's rays down on Florida,' Owens said. 'It should cause people to do crazy things, Weird things.'"
- (5) Xerox of my "PK Map" used to control Florida, dated March 2, 1979, but with the addition of the two "sound towers" on June 8, 1979, to cause "crazy, weird human behavior" in Florida.
- (6) Xerox of my letter to you of June 8, 1979: "Just talked to you long distance. Now am going to add something else to "PK" attack on Florida! Other-dimensional sound! This will cause ~~XXXXXX~~ humans, animals, fish, birds...to go cuckoo! Act completely irrationally. They can't stand it! Owens."
- (7) Newsclip taken from today's newspaper, The Oregonian, here, dated Oct. 26, 1979: "Miami (AP) STUDENTS, TEACHERS GO 'WILD'" "...Students and teachers...went "berserk" Thursday, kicking holes in walls, ripping down doors and screaming about demons." 'The whole school went berserk,' said Miami police officer Harry Cunnill. 'Teachers and students were running around tearing up things.' ...300 students...'Some of the kids were collapsing, falling over,' said Miami Fire Department spokesman Dan LeMay. 'There were students lying on the floor, they seemed to be in a hysterical state...Some other kid said (something supernatural) had possessed him.'...When the police arrived, they found 'people yelling and screaming they were possessed,' Cunnill said.
- To sum it up: I have given two demonstrations bringing my aliens (UFOs) into play...one demonstration onto Cleveland; one onto Florida. Both demonstrations involved the use of a giant UFO to direct the sun's rays onto target...both times for the purpose of causing crazy, weird human behavior inside the target area...and in both demonstrations you can read newsclips of just that happening. Not only that, but in BOTH instances, demonstrations, the newsclips referred to 'receiving messages from outer space' (Cleveland) or 'being possessed by something supernatural' (Florida).

TO MY SIX SCIENTISTS...

Am now embarking on a fascinating project. One which I believe will delight you as far as research into psi-force phenomena goes...and one easily checkable.

Before going any further...let me stress...that I do not intend to harm anyone at all.

Now...I am going to use some of the 150- odd different mechanisms (of which PK is only one) to strike the Cleveland-Akron, Ohio, area, with psi-force directed by my mind...and cause...effects there. Here is what to look for...in time ahead...

Power blackouts there...big ones.

More than the usual number of fires.

All kinds of electrical disturbances.

Lightning storms...with lightning striking many places there.

Planes being forced down; power failure, etc.

Ships sinking just offshore.

Blazing hot drought.

The people in the area...behaving peculiarly (more so than usual, that is).

Odd animal behavior (dogs, cats, etc.)

Possible epidemics.

60-90 mile-per-hour winds.

(Sj's)

Am doing this for a reason, and have cleared it with my Six. I was badly treated during my last ten days visit there...by some people...and I think, and the Six's concur...that it would be most appropriate...to demonstrate to the people of that area...that I am quite real, and that my connection with the UFO's is quite real. That my "Claims" of documented miracles...are not empty claims. In short, the people there need to be taught a lesson...as only PK Man can teach a lesson.

Now, note: any persons there who were friendly to me, and helped me during my visit...like Mike Reineri, of WELY radio, Alan Douglas, TV Show; Clive Thomas radio show...and so on...they know who they are...these people will not be affected while my PK attack is going on. Also, the people who wear my disc...will not be affected, either.

Am setting up this psi-force attack mechanism now, today...and the power will begin to build...as days go by...and I assure you that you will see some mighty interesting things happen...in the Cleveland-Akron area!

Today Offers Hope

Cleveland Swelters for 6th Day in Row

Greater Cleveland sweltered again yesterday as stifling heat and humidity continued for the sixth day in a row.

The National Weather Service at Cleveland Hopkins International Airport said the temperature again hit 90 degrees — the fourth time this week. That and the 62% humidity "made for uncomfortable conditions," the weather service said.

High was 91 degrees at 4:15 p.m., eight degrees below the record for the date.

The humidity was attributed to a southerly wind bringing warm, moist air north from the Gulf of Mex-

ico. A high pressure system settling over Ohio diminished the possibility of relieving winds.

THE NORMAL HIGH for this time of year is 83 to 84 degrees, the weather service said.

The record high for yesterday's date was 99 degrees July 23, 1952. The record high for July was 103 degrees July 27, 1941.

The weather service anticipates the same temperatures and humidity for today and tomorrow. However, a cold front moving west from the Atlantic coast is expected to drop temperatures Tuesday into their normal range.

Heat Stirs Up Crackpots

Whenever an extended heat wave hits the city, the crackpots swarm to City Hall to see the mayor, according to Mrs. Rowena Gordon.

Mrs. Gordon has served as executive secretary to Mayors Ralph J. Perk, Ralph S. Locher and Anthony J. Celebrezze.

The flow of those claiming to hear the voice of God, receive messages from outer space or be secret agents on secret missions started to climb last Monday and

remained at a high level all week.

ONE OF THE ODDEST was the man who telephoned from what he said was British Columbia. He claimed to be a representative of billionaire Howard Hughes.

"Mr. Hughes has heard of beautiful downtown Cleveland and wants to know what it needs," the man told Mrs. Gordon.

Mrs. Gordon shot back. "A few million dollars."

The man said he would let her know.

Note: Billy Graham talks a good game... but, aside from counting the house (and genuflectors) he is impotent. Why, with this "inside" with God and 'mix on... didn't he cool things off?

Ted

City's Streets Are Buckling, Manholes Blow Their Tops

Streets buckled and manhole covers popped as the temperature climbed above 90 degrees in Greater Cleveland yesterday.

Cleveland police reported a number of calls about ripping streets and exploding manhole covers at 4 p.m., an hour after the mercury hit 90 degrees at Cleveland Hopkins Airport. High for the date was 88 degrees in 1950.

The Cleveland street maintenance department said sections of at least 10 West Side streets buckled because of the heat. Buckling also was reported on the East Side.

THE STATE HIGHWAY Patrol's Chardon post said two sections of Interstate 90 — the westbound lane west of Ohio 44 and the eastbound lane near the Little Mount Road overpass — also buckled, but were quickly repaired by state highway department crews.

"In this kind of heat," a patrol spokesman said, "the pavement just explodes."

Power was being consumed yesterday at a record clip, as people kept air conditioners, fans and ice-cube making machines running almost continuously.

CLEVELAND ELECTRIC Illuminating Co. said it set a record power consumption yesterday, as 2,800,000 kilowatts were used in one hour. That surpassed the last record of 2,653,600 kilowatts, set Tuesday.

TOWEL WEATHER—Dr. Billy Graham in Stadium.

Billy Graham Talks of the Devil on a Fire-and-Brimstone Night

By Alvin A. Forisick

Presson Editor

It's hotter than Hades at the Stadium last night when Billy Graham talked about the devil and satanism. The temperature was 92 degrees in parts of the upper stands and 86 degrees on the platform where Dr. Graham spoke beneath blazing television lights.

The second largest crowd of the Graham crusade, 40,000, filled both levels of the center section of the Stadium. It was young people's night, devoted to Dr. Graham's announced message on youth and the devil.

"Ten years ago if I would have talked on the subject to university students I would have been greeted with sneers and laughter," he said.

"TODAY'S STUDENTS WANT to know about the devil and witchcraft and the occult."

When he came to the platform before the crusade session, Dr. Graham was wearing a silt-toned sport coat. He took it off far to minutes before he spoke, but put it on again and wore it throughout his sermon.

When he left the platform, the coat was off again and his sweat-drenched shirt was visible.

TO WHOM IT MAY CONCERN

Ted Owens, known as "The PK Man", informed me in June, 1972, that he was angry at the Cleveland-Akron (OHIO) area...because of the way that key people there had treated him during his visit there to give lectures... and Owens informed me that he would use telepathy to contact four huge giant UFO's positioned around our Earth...and direct these four UFO's to use a technique peculiar to them, the UFO's, to deflect the sun's rays down onto the Earth (much as four giant magnifying glasses)...to converge the rays onto the Cleveland-Akron area.

Not long thereafter...the Cleveland-Akron area was stricken with intense heat. The people there were doing odd things, as reported in the newspapers (and as Owens had said in advance that they would); the sidewalks were buckling and crumbling from the heat; power blackouts were prevalent; lightning attacked the area violently; and various unpleasant things happened, as Owens had said would happen, from his connection with the UFO's.

He had told me that he would even "hit with PK mechanisms" the Cleveland Browns pro football team...following which the owner, a Mr. Modell, accidentally walked through a plate glass window and is now on crutches. Owens intends to teach the Ohio area...to respect his powers...and his connection with the UFO's...by controlling the Cleveland Browns to lose, this season, many of their games, and especially their key games...and not to be able to win the Super Bowl.

Moreover, and perhaps even more interesting...after Owens directed intense heat onto the Cleveland-Akron area...and the heat then struck...the sun itself had tremendous storms and directed energy from these storms down onto the earth, affecting the United States. Such storms on the sun, with blasts reaching down to earth, had never been seen before...and particularly was it puzzling to scientists that it could happen at this time. One noted scientist said that it was like snow falling in July.

Could this phenomenon happening from the sun...have any connection with Owens signaling the UFO's to work with the sun's rays? If this were so, then the possibility exists, obliquely, that Owens can control the sun, as it were! *(THIS SUGGESTION CAME FROM MR. OWENS HIMSELF)*

At any rate, all of this is absolutely true and accurate, to the best of my knowledge.

Crazy, Weird Things? — Blame UFOs

Whether **Ted Owens** is really Mother Nature or not is a matter for discussion, but there is no question of the research help provided by free-lance writer Wayne Grover who brought it to our attention. Owens says part of his brain is alien — and he certainly says strange things.

By ROBERT BURNS

Post Staff Writer

A Vancouver, Wash., man, who claims he caused South Florida's April floods and heavy rains by communicating with UFOs, says he has begun a year of disastrous weather for the state as a demonstration of his power.

Ted Owens, a psychic "brought up as a baby" by aliens, says Florida will experience drought, intense heat and hurricanes as further proof of his contacts with "space intelligences" for a Lantana-based national weekly newspaper. "The National Enquirer challenged me to a demonstration, so I obliged," he said.

Owens says he began the weather March 2. "I gave a quick demonstration to end the drought," he said, and asked the UFOs for

rain some 10 days before the record down-pour of April 25.

More than 18 inches of rain fell in Delray Beach. Floods caused an estimated \$48 million damage in the county. More is to come, Owens says, from giant UFOs deep in outer space.

"One of those will be reflecting the sun's rays down on Florida," Owens said. "It should cause people to do crazy things, weird things."

The rain also will cause a drought, drying the water table "from the inside out," Owens said. Nor, he forecast hurricanes, storms he's asked to hit the coasts, programmed not to unnecessarily take human life.

"Actually the people of Florida should be alerted because they shouldn't get out and drive 50 mph in heavy rains," Owens said.

Owens told the Enquirer of his weather control plans as early as Feb. 16, saying he would zap a hurricane in on Florida, bring

floods to the state, sear the land with heat and sun and produce lightning attacks, all with the aid of the UFOs' electromagnetic power.

Earlier predictions for the tabloid paper included war between the United States and China, a gasoline and oil blockade, the political downfall of President Carter and Russia control of most of the world. The Enquirer had little to say about Owens or his predictions.

Turn to OWENS, C2

Expert Puts Little Stock in the Matter

Forget Ted Owens' flying saucers, says meteorologist Buck Christian. In forecasting weather he'll take a satellite photo and new radar over an alien's predictions any day.

"Last weekend, I spent some time with three aliens and they assured me we wouldn't have any more storms like this last one (on April 25)," joked Christian, head of the National Weather Service's Palm Beach International Airport station.

"All kidding aside, I personally don't subscribe to anything like that," Christian said. He'd rather base his forecasts on scientific information.

"Those three I spent the weekend with weren't too sharp," he said.

But just like Owens, Christian says there will be hurricanes this summer. "They'll be in the southern Atlantic and where they hit

nobody knows," he said.

"In all due respect — I believe as American as (Owens) has a right to say it but I wouldn't put any store in it," Christian said.

Instead, Christian says Owens should use his powers to determine more pressing questions. "Check with him and see what gasoline situation is going to do."
