April 7, 1980

Mr. D. Scott Rogo
18132 Schoenborn St.
Northridge, California 91324

Dear Scott:

Well, as you can see by the enclosed newsclips, I have successfully done in the Portland Trailblazers, as I told you I would when you were visiting here some time ago getting material for your book on my life. (Incidentally, the completed manuscript that you sent me is excellent not to mention brilliant...what's the current action on it?)

As you point out in your and Dr. Mishlove's book, I have been able to successfully demonstrate empirically the application of psi force to pro basketball and pro football games...thoroughly documented, as is this Blazer demonstration since Halloween...ahead of the scientific community. That is, I have trod where scientists fear to tread...and brought it off in a manner to satisfy scientists with proper documentation and procedure.

You and Dr. Mishlove have been able to "observe" me, as it were, through newsclips and proper documentation...while I controlled the Portland Trailblazers to an ignominious end in their season. (Bearing in mind that I had nothing against the team itself; but due to the double-cross of Bosley and Boule it was necessary to select a symbol for the city that humiliated me, and teach it some manners (we would hope that they have been taught something.) Of course I will not repeat any further with the Trailblazers...unless I am further double-crossed, insulted, or challenged in some way by the Portland community.)

In this Trailblazer file you will easily recognize my "pattern"...crazy, weird happenings a la the Trailblazers...to the extent that they actually contacted a psychiatrist to try and figure out what was wrong with the team; and later on a psychologist to help one of the team. I struck the team, during their games, over either radio or TV with psi force...threw them off their game, made them miss shots they should have made, made them commit errors, and so on. Just as I have done in the past with other teams elsewhere (Baltimore Bullets, Virginia Squires, Philadelphia 76'rs, Phila. Eagles, L.A. Rams, Baltimore Colts, etc., all thoroughly documented and "empirically demonstrated.")

I am glad that you were able to actually sit in my study at home...and witness my control of the Trailblazers during your visit, as described in your and Dr. Mishlove's book, which will be published next winter.*

Best wishes to you and yours...

Sincerely,

Ted Owens (PK Man)
