

February 1, 1971....TO ALL CONTACTS

Last Saturday at 2 PM, the day before the actual launch of Apollo 14...the Si's broke through into my mind...with the clear, strong communication that the spacecraft was faulty, even though it had been checked out...and that it was entirely possible that the astronauts would be killed because of it. Now, Mon. through Fri., regular office hours, I have a connection with the govt. I could have phoned about this. But on weekends, and at night, if some terrible thing develops that the Si's warn me about...there is no way to warn the govt. A very stupid situation, considering the value of tipoffs which I've given the Govt. in the past which have paid off. Well, I tried to call Otto Binder in New York about it...but he was out. And he didn't call back, either. Next I tried to get hold of Larry Bonko, a columnist here in Norfolk who might be able to get the word through somehow...but I could only get the city editor of the Ledger-Star...I gave him the information and asked him to get it to Bonko. Next I called Mrs. Dyer and gave her the information...because I did want to get it on record. Sat. evening she drove by and I supplemented the verbal information I'd given her with a written document about it.

Next day, Sunday, of course...all hell broke loose.

I have no xerox...so will have to type you the signed affidavit I have from Mrs. Dyer concerning this:

"February 1, 1971 (Monday)

TO WHOM IT MAY CONCERN

-- Ted Owens (PK Man) has asked me to verify the fact that he telephoned me on Saturday afternoon (January 30, 1971...the day before the Apollo 14 launch) and he told me that at 2 PM that afternoon the Si's (UFO intelligences) had communicated with him and instructed him to warn the U.S. Govt. that there was a serious fault in the Apollo craft...which had not shown up in the checkout of the craft...and which made it entirely probable that the astronauts would be killed. He said the Si's said something about the craft's power.

-- Later Saturday evening I took some typing work over for Ted to do...and he gave me a written document containing the above-mentioned material; also he told me that he'd tried to phone Otto Binder in New York, but that Binder was not there; and he had phoned the local City Editor of the Ledger-Star to give this important material to Larry Bonko, a local columnist and a contact of Owens.

-- The next day, Sunday, late in the day there was a special bulletin on television...to the effect that the astronauts were in serious trouble...because no docking could be achieved. They finally were able to dock by using an unorthodox maneuver, but the question now at this point in time remains...should they try to land on the moon...for if they do, then try to go up and dock and not succeed...it could mean the deaths of all three astronauts (according to a newsmen on a TV program Sunday evening.)

-- This completely unexpected, serious flaw that has turned up in the craft...and the possibility of resulting death for the astronauts if they gamble on a later docking and fail...certainly bears out the accuracy of Ted Owens' warning yesterday, a day before the actual launch of Apollo 14.

-- I swear that this is a true and factual statement, to the best of my knowledge.

/S/ Mrs. N. Dyer
Court Reporter and Notary Public
Plaza One Building, Rm. 401
Norfolk, Virginia."

-- Now, a couple of people have asked me about my "NASA PK Project". Okay. I'll explain it. Cape Kennedy used to be PK'd to a fare-thee-well. But a while back I took down this structure completely, to free Cape K of this. However, NASA as a whole was thoroughly saturated with PK years ago...to wreck NASA...and I tell you, it's done a thorough job. The reason for it? Because NASA wouldn't listen to the Si's, or to me, their representative; or try to help the Si's. So the Si's decided to show them their 'muscle'. And they have. NASA now is about broke; has lost yeax many of their good, key personnel; has a lousy morale...and of course, after lightning hit Apollo 12; then a miracle got the men back alive from Apollo 13, on a very unsuccessful flight...and now Apollo 14 is bollexed up...you can imagine the trouble the NASA program will be in, in the future. But Cape Kennedy...is clear. The Si's were TRYING to give NASA a message recently, before the Apollo 14 shot, but you see, NASA is so smart, so brilliant...it doesn't listen to Ted Owens.

On Jaunary 23, 1971, newsclip: "ASTRONAUT CRASHES COPTER INTO RIVER." Another man for the Apollo 14 flight...was flying a helicopter in Florida over a river. A witness, William Quinlivan, said: "It was only four or five feet above the water. I was struck by how low it was flying. Then, without any evident loss of power or violent maneuver, he struck the water with a big plume of spray. Within two or three seconds after impact fire broke out and burned violently... within one or two minutes I saw a person in the water. He appeared to be all right."

Now, if you're right bright...the above will ring a bell in your head. It hasn't been long...since you've read almost those same words from a witness to an 'accident'. Remember? Get out your contact letter telling you about the death of the top man in our nuclear testing program...who was flying low over the water in Nevada near Vegas...and "it seemed like a giant hand pushed the plane down into the water."

Okay. Now, pay attention. January 30, 1971, newsclip: "MOON LAND CRAFT CRASHES IN TEST." "A 1.8 million moon landing trainer used earlier this month by Apollo 14 commander Alan B. Shepard, Jr., crashed Friday...and was destroyed...when the electrical power system failed..."

-- SO HERE YOU HAVE TWO ACCIDENTS, CRASHES, WITHIN A WEEK...BOTH INVOLVING MEMBERS OR INSTRUMENTS OF THE APOLLO 14 SHOT.

As I have explained before, the Si's sometimes 'talk' by creating actions. A flying saucer once led a string of police cars for a hundred miles to a town named "Freedom, Pennsylvania". They were 'saying' that they could lead us to freedom, if we'd follow their lead.

The purpose of these two significant crashes...was to warn NASA...not to put up this Apollo 14 shot that went up yesterday. They were trying to show us... by creating these two accidents...that the flight could be ill-fated.

I've been asked also...about my "terrible blow dealt to America" prediction. Well, for one thing, the Cambodian Air Force was wiped out...45 aircraft. You think this wasn't rough on America? Those were our planes we'd given them. AND NOW WE HAVE TO, ARE GOING TO, REPLACE ALL 45 OF THEM!

Also, for another thing...the entire U.S. has been wracked up with hurricane winds and disastrous weather...killer weather...about 30 people have been killed in it. There was 120 mph wind in nearby N.C. alone.

Add to these two rough deals...the fact that Apollo 14 mission might go down the drain...and I'd say the U.S. would have been dealt a terrible blow, wouldn't you?

-- Re my arming helpless animals, world-wide, with an attack -PK mechanism against any hunter who kills them needlessly...did you read recently where two hunters went out in Idaho...shot a deer...then a storm enveloped them...and one went for help, and when help returned...the other hunter had shot and killed himself? Very...interesting.

So...you might be doubtful that my PK systems work? Read my last contact letter...Jan. 14...the last paragraph about my PK'ing Africa. It's just taken 16 days for my psi-power mechanisms to slam into Africa! Now, one of the mechs was to bring water to the animals dying for lack of it in Africa...I aim to fill up all the rivers and streams and pools and ponds in Africa...in the weeks and months ahead...for the animals. Well, Jan. 31, 1971, newsclip: "STORM FELICE STRIKES AREAS IN THE NORTH" Goes on to point out that torrential rains poured down for days in East Africa...then a tremendous cyclone struck on top of that, driving a wall of water which covered thees twelve-feet high over the countryside. The flooding affected an area of 20,000 square miles! On Feb. 1, 1971, today, another clip: more rain is pouring into the area already flooded by torrential rains! And the clip says there was a surprisingly low death toll. Only 20 deaths in an area inhabited by several hundreds of thousands of people.

So...it begins.

What will follow: Plagues. Plagues the like of which has not~~X~~ been seen since the days of Moses. Plagues which will affect only the white people in Africa, and drive them out of Africa. The ~~b~~ack people will not be affected, and will remain in peace and harmony...to make the country grow back to health again. Also infestations of insects and rodents...same as in the time of Moses...to bring about the same result. And rain rain rain everywhere in Africa...and storms. And 'human' storms, too. Blacks against whites.

Let's get back to the just-over Pro Bowl. On the key play...weird, freak play.. that actually won the game for the Colts...Renfro, the Cowboy who was supposed to have tipped the ball to a Colt who ran for a touchdown...claimed he did not touch it! (Remember now that weird freak play where I was PK'ing the Chiefs and the ball took off on its own into the hands of an opponent for the winning touchdown and beat~~X~~ the Chiefs?) Renfro said this, in a newsclip: Jan. 25, 1971: "I didn't think I touched it. But I saw the films, and the ball changed direction...so I must have touched it." (1) As far as he was concerned, he did not tip that ball, and (2) he saw it change direction.

While we're talking about pro football...you'll be fascinated with my plans for next pro football season. I'm going to PK half of all the pro teams! That's right. Thirteen pro teams. These thirteen (unlucky thirteen, I tell you) will suffer more injuries than the other thirteen; will lose more games than the other thirteen; and NONE OF THESE THIRTEEN WILL BE ABLE TO WIN THE BIG PRIZE, THE WORLD PRO CHAMPIONSHIP! The 13 hard-luck, snakebit teams are:

KANSAS CITY CHIEFS
DALLAS COWBOYS
NEW YORK JETS
CHICAGO BEARS
WASHINGTON REDSKINS

BALTIMORE COLTS
SAN DIEGO CHARGERS
MIAMI DOLPHINS
LOS ANGELES RAMS
DENVER BRONCOS

HOUSTON OILERS
BOSTON PATRIOTS
PHILADELPHIA EAGLES

You'll notice...I picked all the weakest teams. (That's a joke, son.)

-- Before I forget about it, let me tell you something most interesting. Not long ago a friend of mine in Sarasota, Florida, told me he'd buy 700 shares of stock...and if I could use "PK" to make the price of the stock go up...he'd give my family the money to help in my work with the Si's. Okay. The Si's told me to tell him...to take a disc I'd charge especially for the purpose and put the disc in a box containing the shares of stock, seal the box tight and hide it away. The Si's assured me that the disc would make the stocks "grow" in price. JUST SINCE THAT TIME...THE ENTIRE STOCK MARKET HAS BEGUN TO CLIMB! The whole stock market has gone up...since the time my friend sealed that disc in his box of stock!
(And Andy, when you read this...will you kindly send me a signed notarized affidavit to the above...for my files...please?)

What else now has happened in my Nevada PK Project? Well, Earl Wilson in his column, from Las Vegas, states: "The Gold Must Go." "Those famous Las Vegas salaries must come down. Jack Entratter of the Hotel Sands says so...some of the gold has gone out of the gold rush. Joey Bishop was up there on stage at the Sands talking about that very thing in comedic vein. "You're my favorite audience -- a small audience," Joey said. "With a small audience, if you don't do good, not too many people know about it." (The gist of this column was...that not many people are going to Las Vegas now. This article is dated January 20, 1971.)

-- And there's something else in the Nevada PK Project. Couple of weeks ago 1,400 sheep mysteriously died in Utah. They showed the poor creatures on TV. Angus Ingram, sheep man, said "I've never seen anything like this, and I've been on the desert since 1927. I think it came from something in the AIR." The best clue as far as you contacts are concerned: THIS HAPPENED RIGHT ON THE NEVADA border, where I told you previously several UFO's are operating to produce just such phenomena...and drive people out of Nevada.

Well...I've been kind of quiet lately. Time to stand up and stretch, with my psi powers. (1) Recently I made an offer to use my mind to drive the twenty-five million birds out of Scotland Neck, North Carolina. Evidently nobody believed that I could...because they didn't take me up on it. All right then. I'll give a demonstration. Here is what I'm going to do...am going to activate the four HUGE "Emmy-Emma" craft at the four corners of the earth...to throw out psi-sound...which will cause insects, birds and rodents to go wild all over the earth. Coming up in near time ahead...will be the strangest, doggondest display of insects, birds and rodent 'plagues' since the time of Moses, world-wide. (Make that insects, fish, animals, birds and micro-world). (2) Am setting up a 'grid' today over the ENTIRE UNITED STATES, same as the one you'll read about in March '71 Saga that I set up over Norfolk last summer. What this 'grid' will do: it will cause electromagnetic (EM) havoc all over the United States...cause power blackouts...confuse radar, confuse TV signals. It will be an EM circus! It also might confuse airplanes, but let's hope not too badly.

-- In closing, the Si's now have accomplished the first part of their objective, with the Saga articles telling their story. But Saga has a temporary, limited readership. The Si's want it told in lasting book form...to be carried in the bookstores...so all peoples the world over get a chance to read about it. Now, the Saga reports will negate a lot of demonstrations the Si's would have put on, for there's no need now. After the book is out...and somehow me, their representative, has financial backing to carry out their two world objectives (castle and lectures) and I'm fixed safely with a house and my Sota church...then the Si's will fade out and quit demonstrating altogether. That's what they say.

Ted Owens (PK Man) *Ted Owens* Box 3134 CHS, Norfolk, Virginia.
